16K RAMs, defect instances of storage ICs in the free time regime *(German)* 3−27344
256 KB dynamic semiconductor memories, MH B4116 and K565R U3A *(Czech)* 3−38541
adaptive filtering for noisy failures 3−32601
adjustable operating system, supporting standbys and repair facility, operating characts. analysis 3−41136
computer maintenance and repairs management *(Czech)* 3−29047
data processing systems for planned maintenance *(French)* 3−25059
digital computers, cooperative failures, appls. of hierarchical precharging algorithms 3−24270
dynamic RAM, plastic encapsulation, moisture induced failure study, prevention techniques 3−34439
equivalent components in first-order system reliability 3−26141
fault diagnosis, graph model 3−24271
flight control system, afTI/F-16 DFCS developed summary redundancy management system 3−33560
gracefully degrading systems, dynamic workload model for performance/reliability anal. 3−38707
IBM 3081 processor complex, diagnosis of thermal conduction modules failures 3−42636
large-scale systems, failure detection 3−41469
LSI memory test program for failure anal. *(Japanese)* 3−35831
memory card select net failure isolation 3−42516
minimal cut set failure and repair 3−26139
MOS microprocessor, reliability testing and failure rate study 3−34055
MOS VLSI DRAM, breakdown behaviour of thin oxides *(German)* 3−27345
multiple failure mode system, fault tree analysis method 3−26153
multistate system with two repair distributions, mathematical model 3−26156
personal compluters, performance versus reliability *(Italian)* 3−30656
plastic encapsulated PROMs, nichrome corrosion, model for failure mechanisms 3−34438
power system modelling, failure processes *(Russian)* 3−35795
reliability measures of repairable systems 3−26140
single server two unit repairable system, failure and inspection, busy period analysis 3−41135
single server two unit repairable system, failure aspects, cost-benefit analysis 3−41133
single-server n-unit repairable system, cold standbys and inspection, cost-benefit analysis 3−41141
software failure description model, Bayesian analysis 3−43129
standby redundancy, three mode two unit system, stochastic behaviour and failure analysis 3−26155
standby redundant system, three mode operation, stochastic behaviour and failure analysis 3−26154
structuring free form verbal descriptions in equipment failure reports 3−31832
system and component burn-in methods, S-curve model for failure and reliability analysis 3−41139
TTL IC failure rate estimates from field data 3−33976
two dissimilar unit standby system, preventive maintenance and failure analysis 3−41138
two unit repairable system with single server, failure and inspection, stochastic behaviour 3−41123
two unit standby redundant system, failure and preventive maintenance, stochastic behaviour analysis 3−41137
two-unit warm standby system with inspection time, busy period analysis 3−26157
VLSI circuits, testing for failure analysis 3−38213

farming
AgriStar farming network 3−28353
computerised vehicle location system application to from vehicles control recursive algorithm 3−37757
computing in farm management 3−35532
microcomputer introduction to small business *(French)* 3−43472
pig production, dynamic programming model 3−26279
rural American farm marketing information system possibilities 3−39947

farming continued
telematics and farm management *(French)* 3—43480
water pumping stations telecontrol by signals transmitted over power lines *(Russian)* 3—26605

fast amplifiers *see pulse amplifiers*

fast Fourier transforms
Am29540 fFT address sequencer gives easy access to the frequency domain 3—34010
ASAM programming system for stochastic analog signal spectral analysis *(German)* 3—25443
assembly-language routine for Intel 8052 3—28427
atherosclerosis detection, computer-assisted anal. of backscattered ultrasonic signal appl. 3—40275
back-to-back algorithms, time-space tradeoffs 3—37962
bird-song anal. and synthesis, FFT-based software system 3—40142
bulk data processing, FFT algorithm for input-output time minimisation *(Russian)* 3—33785
CMOS FFT processor, 16 MHz single chip device, design and redundancy features 3—34357
conformal mapping and analytic continuation, num. method derivation and implementation 3—23845
cost effective FFT processor using memory segmentation 3—34337
direct FFT scheme for interpolation, decimation, amplitude modulation and single side band modulation 3—32794
discrete, cross-correl. of input signal 3—30163
fast algorithm for solving a Toeplitz system of equations 3—26036
FFT, audio meas. appl. 3—34316
FIR digital filter 3—38422
floating point arithmetic architecture for FFT 3—34235
frequency-hopped M-ary FSK waveforms, high dynamic range FET processors for multiple channel receivers 3—34359
Gold-Bially FFT algorithm, performance on SBC 86/12A 16-bit microcomputer 3—26947
image processing, large vector AR model identification appl. 3—41262
implementations for signal processing and digital 3—33904
linear circuits, symbolic analysis giving sorted network functions with respect to some kinds of identical symbolic elements *(Japanese)* 3—40412
linear equation systems, numerical solutions *(Russian)* 3—33786
machinery diagnostics by microprocessor-based FFT spectrum analysers 3—42077
mixed base FFT algorithm, matrix derivation and modification 3—23886
moving object tracking in noisy environment 3—26207
MTF, digital computation for arbitrary bar configurations 3—31948
multichannel processors, used for complex mathematical functions 3—26235
multidimensional transformation, economic algorithm 3—33791
optimal smoothing of noisy data, spectroscopy computing appl. 3—35703
parametric discrete FFT, discrete, signal decomp. in time or freq. domain *(Russian)* 3—33784
performance analysis of FFT algorithms on multiprocessor systems 3—38044
pipeline computers with bit- and indirect-vector facilities, parallel algorithm 3—42188
processor realization, stored-product ROMs appl. 3—34364
psychological appls. of online computers, conf., Minneapolis, MN, USA (1982) 3—40590
radar signal processing with fast digital ICs *(German)* 3—27176
real-data FFT algorithm for image processing applications 3—29260
reconfigurable signal processor for high throughput applications 3—27279
recursive Fourier spectral analysis with unevenly spaced data 3—32792
residue number system/optical waveguide circuits: a new technology for very high speed data processing 3—42461
sign/logarithm arithmetic for FFT implementation 3—38368
signal processing 3—26254
single-chip digital signal processors, capabilities expansion 3—42510

online international cash management 3−39745
operational planning and accounting software, balance and integration 3−31443
optimal portfolio mix, demand for a preferred mix 3−36981
planning for small computers 3−24998
planning packages for microcomputers, review 3−28243
Plessey, use of micros in corporate finance dept. 3−35428
PlusPlan, financial planning package for IBM Personal Computer 3−39704
property management software, The Landlord, program review 3−35541
purchase ledger packages 3−28242
Real Estate Analyzer, a computer package for real estate 3−31464
share monitoring on Sharp MZ 80K, BASIC program *(German)* 3−31446
small business computers in financial management 3−35453
software packages 3−39713
spread-sheets, second-generation software packages 3−43361
spreadsheet and financial-planning software, survey 3−31472
spreadsheet evaluation, Micromodeller review 3−39726
spreadsheet packages, capabilities and evaluation methods 3−39701
spreadsheet packages, description and appl. 3−35449
spreadsheet program, Formcalc appl. to time series anal. 3−39738
spreadsheet program, TK!Solver, user test 3−40777
spreadsheet program for ZX-81, Formcalc in BASIC 3−31473
spreadsheet programs, comparison of Context MBA and 1-2-3 from Lotus 3−28257
spreadsheet programs, evaluation and comparison 3−28241
spreadsheet programs for Apple II, VisiCalc and Multiplan 3−31470
spreadsheet programs for financial modelling, reviews 3−28239
spreadsheet software, ECalc, for Epson HX-20 portable micro 3−39737
spreadsheet software, Multiplan, user review 3−35446
spreadsheet software package, survey 3−43360
spreadsheets for low-cost business forecasting 3−39718
State of the Art, financial software for microcomputers, review 3−35444
TASO−an APL toolbox for financial planning 3−35425
tax assessment software, Microtax, user view 3−39736
tax consultancy using Siemens 6.600 office computer *(German)* 3−28254
tax return program for ZX-81 personal computer *(Spanish)* 3−35450
telex-service charging-data processing desk *(Japanese)* 3−28670
The Financial Planner, modelling tool from Ashton-Tate 3−43356
TOPIC system at the Stock Exchange 3−35553
TPLAN: a table driven planning system 3−35424
TRADES, interactive financial model, university appl., effectiveness meas. 3−39672
university financial aid office, on line computer, INFAMOUS 3−35412
university financial planning model, report generator 3−35410
university financial planning model 3−35409
updating financial software 3−43346
VisiCalc capabilities and limitations 3−28264
VisiCalc cursor movement utility, Quik-Vis, for Apple 3−39715
Visicalc for HP-75 portable computer 3−40081
wage reporting via magnetic media 3−25004

finite automata
ω-regular languages 3−23909
algorithm implementation, estimation of cost of control unit *(Spanish)* 3−24093
algorithms for implementing finite automata in homogeneous arrays with faulty cells 3−42216
cascade networks description in terms of codings and coverings 3−33861
cellular array implementation, of arbitrary computational structs., di-graph appl. 3−27144
cellular automata, propagating context dependent Lindenmayer systems, relationship 3−30194

finite automata continued
- communication protocols based on finite state machines 3−24366
- deterministic, automatic testing of quantised statistical distrib. of meas. variables *(Czech)* 3−30066

equation implemented language for PLA 3−39310
ESPRESO—a system for process control software specification 3−39274
expert natural language interface to online databases, IR-NLI 3−31674
expert system languages 3−41219
extensible language for computer aided design 3−28644
EZ programming and command language 3−39301
Fable: a programming-language solution to IC process automation problems 3−40411
FET LSI chips, packaging electrical analysis algorithms in a high-level language environment 3−35852
Flavors programming language, suitability for artificial intelligence and expert systems 3−35073
floating point FORTH 3−24663
FORTH, appl. to 6502 macroassembler 3−39349
Forth, appl. to distributed process control 3−31177
FORTH, disk implementation for Atari 400/800 3−27980
FORTH, for board module computers 3−39311
FORTH, high level strucure 3−39334
Forth, multiuser version for M68000 processor from Hemenway 3−31178
FORTH, with text interpreter *(German)* 3−43072
Forth advanced features, arrays and random number generators 3−24669
FORTH discompiler 3−39350
FORTH interrupt handling 3−24664
Forth language for microprocessors 3−43080
Forth PI, programmer portability 3−43089
Forth programming language 3−24684
FORTH recursion techniques 3−24541
FORTH relationals and multiplication operators 3−24661
FORTH selection for DATA ACE system 3−43230
Forth tortoise graphics functions *(French)* 3−34998
FORTH word defining techniques 3−24665
FORTH words definition 3−24662
FORTH-based development system for multimicrocomputer controllers 3−42484
fourth generation computing in different business environments 3−39558
fourth generation languages, definition and future 3−43065
fourth-generation language hazards and lack of standards 3−35069
fourth-generation language implementation conflicts, costs and benefits 3−35070
fourth-generation language technology-software engineering and financial appls. *(Italian)* 3−24651
functional language $ 3−27989
functional programming languages, experiences with Berkeley FP 3−28002

high level languages continued
- functional shell 3−39300
- fuzzy relational inference language, query language for expert systems 3−35097
- GEM database language 3−39249
- GEST 81 modelling and simulation language, reliability improvement 3−24703
- graphic programming language using flowchart like structures 3−35079
- GTL specialised problem-oriented language for applications in mechanical measurements *(German)* 3−43081
- hardware description languages, from academic projects to industrial production tools 3−31217
- hardware design specification, graph-based system for parallel processing 3−38224
- higher-order language simplification for high-integrity systems 3−32027
- IBM Personal Computer, programming languages 3−31194
- IC tester programming, measurement-oriented language MELAN *(Polish)* 3−35086
- Icon, generators and goal directed evaluation 3−31198
- Icon programming language, book 3−39309
- IF, specification language for dialogue user interfaces of interactive systems 3−39320
- in-circuit testing, programming language developed by Zehntel *(French)* 3−31880
- information retrieval, command languages, quick reference chart, and compilation 3−25167
- information systems conf. Ann Arbor, MI, USA (Dec. 1982) 3−34927
- input and output of high level languages 3−43078
- integrated CAD system for logical electronic circuits 3−43868
- integrated programming language, guardians and actions: linguistic support for robust, distributed programs 3−39388
- integrated robot system architecture 3−37656
- INTERPRET programming language framework for designing user interfaces 3−39296
- JOVIAL, air force language before Ada 3−24673
- KODAS, natural language interface for personal databases 3−31195
- L language, scope rules 3−39299
- LALSD II, computer hardware description language 3−43084
- LOGLAN language *(Polish)* 3−24678
- Logo, educational computer language 3−24686
- LOGO, microcomputer implementation 3−35072
- Logo, problem solving 3−27864
- Logo as an educational tool 3−24672
- LOGO computer language for child education 3−32082
- Logo language, package comparison 3−24671
- LOGO learning on Apple II, book 3−43082
- LOGO programming tool for handicapped children 3−36119
- machines, programs, and languages: a simplistic introduction to computer science 3−42620
- MAUS specialised problem-oriented language for applications in mechanical *(German)* 3−43081
- MC68000 address modes and instruction set for high-level language, implementation 3−38148
- MCMESS specialised problem-oriented language for applications in mechanical measurements *(German)* 3−43081
- message management systems, routing specification 3−39651
- messages vs. remote procedures is a false dichotomy 3−31204
- methodology directed language design 3−39259
- microcode automatic generation from experimental high-level language 3−39106
- microcomputer languages, future choice 3−39256
- microprocessor high level software testing, Intel PSCOPE system *(French)* 3−24745
- microprocessor languages, BASIC, FORTRAN, PASCAL, FORTH *(Spanish)* 3−43075
- microprocessor software tools 3−31216
- microprocessors, high-level languages, program assembler, interpreters and compilers, tutorial series *(Spanish)* 3−39352
- microprogrammable processor design by instruction set description language 3−42442
- MIRKON specialised problem-oriented language for applications in mechanical measurements *(German)* 3−43081
- mission planning, KNOBS expert system 3−31492
- MODEB, real time operating system kernel written in Modula-2 3−43196
- modern computer languages *(German)* 3−35074
- Modula-2, specification and implementation of abstract data types 3−35049
- Modula-2 and Pascal, comparison Pascal and Modula-2, comparison 3−31218
- Modula-2 machine-oriented modular language *(German)* 3−27981
- Modula-2 strengths as Pascal successor 3−24657
- modular C 3−27988
- modular hardware design using ADL computer hardware description language 3−42441
- multimicroprocessor robot for PC and Winchester disc drive assembly 3−37604
- MUMPS, language to link micros to mainframes 3−27978
- natural language data base interface 3−31673
- natural language data base interfaces 3−31179
- natural language descriptions in databases 3−31678
- natural language interfaces, isolation of domain dependencies 3−31676
- natural language processing and machine translation in Japan 3−28850
- natural language retrieval systems, research at New York Univ. 3−43571
- natural-language interface capabilities and characteristics 3−27977
- natural-language interface to DBMS, example of EUFID 3−31671
- NIL: an integrated language and system for distributed programming 3−39294
- NIL, network implementation language for distributed system programming 3−39272
- nonprocedural languages, design strategy, system maintenance reduction 3−39112
- numeric error algebra 3−38383
- object oriented languages 3−24666
- Occam, multiprocessor language 3−27993
- OCCAM, programming language for parallel processors *(French)* 3−31193
- Occam programming system for distributed systems software 3−42963
- OL, EDP project language *(German)* 3−35088
- operating system courses, personal computers and Edison language use 3−36282
- optimal computer arithmetic, realisation in COSY language 3−24109

high level languages continued
- OWL, robot language design 3−39297
- parallel architecture to execute pure LISP in parallel 3−42452
- parallel execution model of logic programs 3−39448
- parallel processing language to express and exploit MIMD parallelism *(French)* 3−31208
- pattern-directed invocation in systems programming languages 3−39331
- Pilot authoring languages 3−43073
- PILS: picture interpretation language for silhouette *(Japanese)* 3−35092
- PL/M for reduction of local and global redundancy in facsimile *(German)* 3−27957
- PL/M-51: a high-level language for the 8051 microcontroller family 3−43090
- PL/M-86 for DT-1223 terminal as economical Kanji terminal, control program development *(Japanese)* 3−34576
- Pla, language for music composition 3−32101
- PLAIN, privacy and security in information systems using programming language features 3−35082
- Plato authoring languages 3−43073
- PLOUC: another general purpose programming language 3−39319
- portable natural language interface, TEAM 3−31675
- PRL, for cardiac catheterisation, DAMARS database management and reporting system use 3−43677
- procedure-driven software for ATE 3−33689
- procedures and pointers in C 3−35078
- process control languages 3−35998
- processes, tasks, and monitors: a comparative study of concurrent programming primitives 3−39276
- programmer controlled approach to data and control abstraction 3−39291
- programmer-defined control operations 3−31176
- programming, future survival 3−35076
- programming language issues in software systems conf. San Francisco, CA, USA (June 1983) 3−39290
- PROLOG, fifth generation language kernel, development 3−39264
- PROLOG, fifth-generation language, introductory review 3−39251
- PROLOG, LISP comparison 3−31203
- PROLOG, nonprocedural language *(French)* 3−43095
- Prolog, symbol-processing language 3−24688
- Prolog for logic programming, fact dependency system appl. 3−39094
- Prolog implementation of Query by Example 3−43233
- Prolog language in software system design 3−39324
- PROLOG with graphics 3−39265
- protocol description language, PDIL 3−30842
- PS-ALGOL, algorithms for a persistent heap 3−24693
- PSI, interpreted language for statistical anal. 3−35083
- PSYCHLAB, programming system for expt. control programs 3−25609
- psychological modelling of highly-skilled behaviour, CAPS language 3−40597
- query language extension for incomplete information systems 3−26964
- Rapt, off-line programming for CAD/CAM methods 3−31184
- real-time distributed microcomputer-based systems, operating system and appl. language 3−43193
- real-time language selection criteria 3−43071
- real-time software test language IDA *(French)* 3−35155
- recursion in PILOT 3−24548
- relational database languages *(Japanese)* 3−31335
- request language to a factographic information system of a filing service *(Russian)* 3−28419
- reusability, language features 3−43079
- RMX86-PEARL implementation for microcomputers *(German)* 3−39282
- robot command language using English 3−43063
- robot software, languages 3−41808
- Savvy personal language for business programs on Apple II 3−24658
- SCHEMAL: yet another conceptual schema definition language 3−39258
- SCHEMAL step towards the automatic maintenance of the semantic integrity of databases 3−31317
- SDL, 1984 CCITT recommendations 3−31209
- SDL, Soil Data Language for information retrieval from ARSIS, interpreter design and coding considerations 3−40058
- SDL development 3−31212
- semantic network control *(Japanese)* 3−35091
- separate compilation and the development of large programs in CHILL 3−31214
- SEQUEL, CSG based DBMS for CAD/CAM and its supporting query language 3−35276
- SIGNAL, real time signal processing language *(French)* 3−30499
- simulation, computer graphics issues 3−22948
- single-chip microcomputers, high-level language programming 3−35096
- Smalltalk, introduction, syntax 3−43076
- Smalltalk, Xerox's new high level language 3−24689
- Smalltalk for IBM PC 3−39271
- SNOBOL 4, implementation on p-System micro 3−35071
- software development, high level languages use for simplification 3−27875
- Specification and Description Language (SDL) as a formal description technique of communication protocols: background and examples 3−31211
- specification and design methodologies, in research and industry 3−39095
- SRL, signal representation language 3−31207
- standard syntactic metalanguage, introduction and handbook 3−24695
- StarMod analysis of language models for high-performance communication in local-area networks 3−39293
- statement labels 3−27994
- strongly typed languages 3−27975
- system design methodology based on SDL 3−31941
- system development, high level language appl. *(Norwegian)* 3−34930
- TAO—a harmonic mean of LISP, Prolog and Smalltalk 3−39289
- task-oriented languages, for robotic software 3−31191
- teaching OS principles, structured approach 3−25852
- teaching programming using Modula-2, relationship with Pascal 3−28956
- test program generation for testing in electronics *(French)* 3−35859
- tools, methods and languages for scientific and engineering computing, conf. Paris, France (May 1983) 3−39072
- translator from structured FORTRAN to JOVIAL/J73 3−35133
- Turtle Graphics II, language for Commodore 64 3−31186
- two-dimensional macro extension of high-level languages 3−31088
- type hierarchies and semantic data models 3−39525
- UMESS specialised problem-oriented language for applications in mechanical measurements *(German)* 3−43081
- user adaptation in interactive information retrieval 3−40037
- user languages in software development 3−39325

- **high level languages** continued
  - VAL, assembling robot control language, experience and adaptation *(Hungarian)* 3—23567
  - VIC PILOT language program 3—43980
  - Wise authoring languages 3—43073
  - Zeus, hardware description language for VLSI 3—43101
- **high-pass filters**
  - digital filter, using 'active low' inputs 3—38402
  - IIR digital filters, high-pass, bandpass and bandstop, design 3—24123
  - variable high-pass wave digital filter derived from an elliptic prototype network 3—42462
  - variable lowpass/highpass wave digital filter implementation in same realization 3—42464
- **high power amplifiers** *see power amplifiers*
- **high-pressure techniques**
  - regulator for phase transitions expts., using manganin pressure transducer 3—26476
  - ruby luminescence spectrometer, pressure determ. appl. 3—28456
- **high-temperature techniques**
  - *see also pyrometers*
  - No entries
- **high vacuum gauges** *see vacuum gauges*
- **high-voltage engineering**
  - *see also high-voltage techniques*
  - 1 kV transistor modules for AC power conversion and control 3—23439
  - automating high voltage coil manufacture 3—33400
  - deterministic and probabilistic approach to voltage stability of series-compensated EHV transmission lines 3—33309
  - digital simulation of multiterminal HVDC systems using a novel converter model 3—31834
  - extra-high voltage transmission current capacity rise by reversing static compensators *(Russian)* 3—41721
  - field distortion parameters computing for nonaxisymmetric cylindrical transmission line 3—43751
  - high-voltage regulator with thyristor-controlled booster transformer connected to common neutral of autotransformer 3—23457
  - HV and EHV networks, synchronous compensators with additional cross-field windings on rotor, appls. *(Russian)* 3—26583
  - HV thyristor controlled transmission line voltage regulators, performance evaluation 3—41754
  - new relay scheme for EHV/UHV transmission lines 3—29790
  - steady-state stability of an HVDC system using frequency-response methods 3—33314
  - voltage drop protection in reservoir capacitors in a system controlling high-voltage thyristor units 3—33326
- **high-voltage techniques**
  - HV control and protection system for Culham mult-Megawatt beam line 3—23379
  - new control method for multiterminal HVDC transmission without fast communication systems 3—29764
- **hip joint replacements** *see prosthetics*
- **history**
  - computer appls. to historical research, APL suitability 3—43938
  - computer museum in Massachusetts 3—25804

indexing
see also information dissemination; vocabulary
ABI INFORM backfile, revision and correction 3−40054
abstracts, full text search using automatic indexing, MASQUERADE system 3−40039
automatic indexing of manuscripts, strategy *(French)* 3−43556
bibliographic retrieval, interdependence of specialists, users and indexers 3−31685
book index data management program in BASIC 3−28871
Citation index program, version 2.0, hard disc storage, menu-driven operation 3−40020
complete statistical indexing of text by overlapping word fragments 3−35614
computer-based system for electronics industry 3−40031
concordances and indexes, automatic prod. 3−43935
data filing system creation 3−43984
database for lexicographic research *(Italian)* 3−32110
descriptor indexing and co-ordination model *(Spanish)* 3−35613
electronic filing−key to electronic records management 3−35372
electronic publishing impact on abstracting and indexing 3−40022
history of indexing technology 3−28397
indirect access to maps via online databases 3−40045

indexing continued
intelligent data base for image analysis, storage, and retrieval in radiology 3−40176
keyword information retrieval systems, statistical semantics rel. to potential performance 3−43553
mathematical model and electronic data process realization of the qualification of locking frames *(Hungarian)* 3−25161
MEDLINE, indexing consistency 3−35634
NEPHIS screen editor as an aid in permuted index generation 3−28405
Netherlands yearbook of international law, indexing problems 3−28398
newspaper archive search tree construction *(German)* 3−25179
optimal set of indexes selection 3−24829
philosophy and science, historical works, computer-aided lexicography 3−43937
powder diffr. patterns, indexing, use of extinctions in programs 3−25242
preserved context indexing system for microcomputers: PERMDEX 3−31652
printed and videotex index requirements *(German)* 3−31611
printed versus online indexes 3−28399
relative indexing on the basis of user's profiles 3−31651
semantic factors investigation *(Russian)* 3−31653
sheet music index on a microcomputer 3−31573
similarity measures between index terms 3−35609
STI in construction materials *(Russian)* 3−28380
Swiss PTT documentation system *(German)* 3−31603
syntactic issues in information retrieval systems *(French)* 3−25176
water pollution databases, biomedical questions 3−40017

indicating devices *see indicators*

indicating instruments *see indicators*

indicators
see also alarm systems; maximum-demand indicators; phase sequence indicators; standing wave meters
automobile control development displays *(German)* 3−42056
illuminated pushbutton switches for industrial control, human engineering factors 3−33149
mine loading points working indicator *(Russian)* 3−41645
power boiler drums water level control by direct indicators *(Polish)* 3−41573
reference guide to indicators and displays 3−33146

inductance measurement
No entries

induction heating

No entries

induction machines *see asynchronous machines*

induction motors
see also squirrel cage motors
analysis of field orientation control of current source inverter drive induction motor systems 3−29781
arc-stator asynchronous motor, pulse width control system synthesis using dynamic programming 3−23451
asynchronous electric drives with parametric control, static characteristics calculation *(Russian)* 3−26565
asynchronous motors with preset multiplicity of starting torque, phase winding-active length reln. *(Bulgarian)* 3−37378
cascades, SCR-controlled, modelling for computer simulation 3−25300
chip-based digital motor controllers, energy saving, second generation 3−37463
computer-aided study of a thyristor-controlled AC drive with pulse control of a pumping jack *(Russian)* 3−37479
control by rotor current chopping and stator asymmetry 3−23491
control method and analytic procedure *(Japanese)* 3−26599
control methods for good dynamic performance induction motor drives based on current and voltage as measured quantities 3−37492
convertor-invertor-fed induction motor drive system efficiency optimisation by slip feedback *(Korean)* 3−37462
current source invertor induction motor drive, stabilisation at light loads 3−33285
current source invertor-fed, controlled slip variable flux drive 3−29793
current-source invertor-fed induction motor drives, optimum steady-state operation 3−23490
decentralised control system for power drive unit, description *(German)* 3−23415
digital current control using microcomputer *(Czech)* 3−28561
digital pulsewidth modulator employing advanced modulation techniques, appl. in induction motor drive 3−37493
doubly-fed, speed control *(Polish)* 3−37497
electric drive system, speed control schemes based on field co-ordinates method 3−29794
electric drives, current-source invertor-fed, selected harmonic reduction by EPROM technique 3−37518
Energy Saver cct., HV-1000 from Harris, IC appl. 3−29755
equivalent circuits for using induction motors as AC servomotors, field acceleration control schemes 3−33293
evaluation of phase-commutated converters for slip-power control in induction drives 3−23430
fan control for the glass industry using static induction motor drives 3−23637
gate-turn-off thyristor for asynchronous motor speed control *(German)* 3−41619
H-Bahn vehicles with 3-phase AC linear induction motors and controllers, drive control 3−26740
high performance pulsewidth modulator for an inverter-fed drive system using a microcomputer 3−29785
high performance torque-controlled induction motor drives 3−37491
high-efficiency induction motor design optimisation, open-loop computing procedure 3−25339
hybrid computer simulation of a controlled-current inverter under normal and fault conditions 3−29786
inverter-fed, adaptive nonlinear control system 3−29773
microprocessor-based invertor and induction motor system for traction, harmonic control *(Japanese)* 3−29788
new method to control the two speed induction motor in a self-contained system *(Russian)* 3−23462
nonlinear adaptive control of an inverter-fed induction motor linear load case 3−23429
optimal speed control 3−29817
power supply network asynchronous motor generated wattless power compensation *(German)* 3−29754

induction motors continued

singular perturbations in nonlinear optimal control, introduction 3−41457
singularly perturbed initial value problem *(German)* 3−33777
software package for ODE initial-value problems, ODEPACK 3−25203
stochastic dynamic systems, averaged solution 3−23221

injection lasers *see semiconductor junction lasers*

input-output media (computers) *see computer peripheral equipment*

input-output programs
adapter design level determ. via config. commands 3−31295
AIM 65 microcomputer, multicolumn printing, machine language program 3−40689
AMPERGET, customised input program, machine language, for Apple II 3−40683
APL 68000 local auxiliary processor mechanism 3−35172
APL input output 3−35173
assembly language program for TRS 80-IBM Selectric interface 3−28902
Atari home computer, data input without INPUT statement, BASIC program 3−43969
Basic input with only two keystrokes 3−25707
BASIC program for Alpha Tronic P2 computer *(German)* 3−24781
C language, BDOS and BIOS calling functions, under CP/M 3−35167
Command Retry for controlling two CPU systems that are connected through a channel-to-channel adapter 3−24626
Commodore 64, translation from VIC-20 programs, keyboard reading example 3−43962
disk I/O subsystems, queueing network models 3−24803
domestic cassette rcorder for data storage, assembler code routines *(Russian)* 3−27523
extended swap control for paged data 3−24600
Forth computer, interface ccts. and disc-drive control software 3−35210
function input, during BASIC execution Apple machine code listing 3−40697
general purpose data entry program 3−40076
Graphics Dump, for printing Apple to Okidata Microline 80, assembly language program 3−40686

input-output programs continued
- hexadecimal I/O routines for testing microprocessor-based products 3—28031
- I/O task prediction mechanism 3—24079
- increased swap group size with extended swap 3—24602
- interactive system for input, output, and processing of files *(Russian)* 3—35198
- interrupt for disc controllers 3—24087
- masking, input-output separation, for control 3—35187
- menu driven communication system for communication from display terminal to remote terminal 3—24784
- multiprocessor system, selective processor enablement for I/O interruptions 3—43185
- number formatting routines, BASIC for VIC-20 3—43169
- one-stage swap-out with extended swap 3—24601
- PET micro, macro assembler text editor, modifications for output 3—39389
- printer paging program, assembly language listing for Apple II 3—40687
- real-time support under RT-11 and TSX-plus 3—24807
- routine for Apple II using Pascal *(German)* 3—43168
- shared object protection through the use of ports 3—24808
- single-chip microcomputers, serial I/O software techniques 3—31310
- standard, for handling I/O devices in microprocessor systems *(Polish)* 3—35199
- terminal software for HP 64000 logic development system 3—24738
- terminal software survey 3—28040
- transparent data I/O at K 1520 microcomputer, DMA data transfer *(German)* 3—34590
- V-SCAN, an adaptive disc scheduling algorithm 3—28062
- VDAS access method for random access files *(German)* 3—35204
- Video Genie subroutine for subprogram input, in BASIC *(German)* 3—31248
- workspace interchange on microcomputers 3—35118
- write track and read track compounds for discs 3—28049

input-output routines *see input-output programs*

inspection
- *see also quality control; reliability; testing*
- aircraft components computerised inspection, BA Dynamics' experiences 3—43890
- analog techniques, DP appl. *(German)* 3—25070
- API thread gauges inspection, using computer supported system *(German)* 3—23801
- automated degaussing system for magnets in a copier magnetic brush 3—30062
- automated inspection by image processing sensors, quality control and in-production meas. appl. *(German)* 3—29651
- automated inspection systems, problem definition and benefits 3—33356
- automatic crack detection, vision system appl. 3—41802
- automatic inspection by robot/machine vision system 3—38925
- automatic optical sample inspection for visual and functional inspection *(German)* 3—23749
- automatic visual inspection systems, industrial quality control appl. 3—26808
- Autovision 4 artificial vision system for use in industrial robotics and inspection 3—33367
- avionics, effectiveness of computer aided engineering 3—37602
- car bodies, using semiautomatic meas. devices *(German)* 3—30086
- colour TV receiver PCB automatic inspection computer system *(Bulgarian)* 3—42019
- computer supported planning *(German)* 3—25069
- computer vision appl. 3—33368
- computer-supported inspection techniques, INQUAMESS program package *(German)* 3—28704
- coordinate-measuring machines, appl. to inspection 3—23568
- custom hybrid ICs, automated wire and die bonding 3—26720
- Cwikscan III SEM computerized electron beam VLSI linewidth measurement and inspection instrument 3—26838
- digital PCB, processor controlled inspection and diagnostic system using signature anal. *(Bulgarian)* 3—40396
- factory automation, dynamic aspects of TV based inspection and measurement systems 3—41821
- heat sealed film packages, automatic inspection using laser scanning techniques 3—41651
- hidden information in early visual processing 3—41230
- hot steel inspection, adaptive threshold estimation techniques 3—41800
- images, real-time X-ray and acoustic images, computer evaluation 3—31804
- industrial machine vision, Development System, manufacturing appls. 3—33486
- integrated test network for semiconductor components and circuit boards *(German)* 3—25377
- LSI wafers, defect and measurement evaluation system 3—42046
- machine tool electrical central systems features and characts. *(German)* 3—37608
- machine vision system for keyboard inspection 3—33647
- modular test equipment for the inspection of components in mechanical engineering 3—43885
- omnidirectional optical character reader for conveyor feed and robot handling *(German)* 3—37394
- optimum inspection policy for a one-unit system with preventive maintenance 3—41345
- PCB automatic artwork inspection and repair system 3—28652
- PCB inspection, machine vision systems appl. 3—29932
- Peravision system by PERA for component pick-up and feed *(German)* 3—37411
- PIXIE-1000 grey-level machine vision system, automatic inspection appls. 3—34348
- precision part inspection and automated workpiece handling system 3—41825
- process control, functional unit quality control using programmed logic systems 3—33365
- programming vision and robotics systems with RAIL language 3—31986
- protective device, optimum inspection policy 3—26146
- resistor network production automation 3—36000
- robot inspection tasks, vision processing appl. 3—41824
- robot vision systems, task classification and state of art 3—33355
- robotics and industrial inspection, conf., San Diego, CA, USA (Aug. 1982) 3—41229
- semiconductor wafer inspection automation: current and future needs 3—41891

inspection continued
- sequencing activities subject to errors 3—26294
- single server two unit repairable system, failure and inspection, busy period analysis 3—41135
- single-server n-unit repairable system, cold standbys and inspection, cost-benefit analysis 3—41141
- skip-lot sampling program for very-high quality products 3—41346
- solar panels, electro-optical sensors appl. 3—41822
- three-dimensional shape recognition by moire correlation 3—41231
- TMS9995 16 bit μP VLSI inspection using SEM in voltage contrast mode 3—30294
- two unit cold standby repairable system, failure and random inspection aspects 3—41134
- two unit repairable system with single server, failure and inspection, stochastic behaviour 3—41123
- two-unit warm standby system with inspection time, busy period analysis 3—26157
- video recorder lift, production testing, using multistep meas. devices *(German)* 3—23645
- vision systems with colour anal. appl. 3—41803
- VLSI video linewidth measurement system 3—41890
- X-ray spectrum inspection of metal comp. during melting, automated system 3—37562
- Fe, cast, chilled layer hardness, inspection apparatus using higher harmonics 3—23785
- Fe, cast, suspension arms, on-line X-ray inspection system, servo-electric handling system *(German)* 3—26525

instability *see stability*

installation
- *see also commissioning; computer installation*
- arguments in favour of an EDP system for an electrical installation company *(German)* 3—39897
- computer aids for the control of electrical services in buildings 3—31825
- microprocessor appl. in control and instrum. of existing plant 3—26632
- microprocessor based systems for process control, suppliers viewpoint 3—26634
- NC system selection, evaluation and analysis methods *(German)* 3—23611
- thermal plant electrical equipment, safety, reliability and installation *(Italian)* 3—29743

installation, computer *see computer installation*

installation management (computers) *see e.d.p. management*

instrumentation
- *see also aerospace instrumentation; computerised instrumentation; digital instrumentation; digital readout; display instrumentation; nuclear instrumentation; physical instrumentation control; signal generators; signal sources*
- automatic controls in the 420 kV switching stations of the Austrian grid *(German)* 3—26593
- automation, conf., Moscow, USSR (May/June 1983) *(Russian)* 3—33362
- control instrumentation, reliability goal setting 3—23258
- diversity in measurement *(Japanese)* 3—22900
- fault detection and diagnosis in systems in the presence of uncertainty 3—23008
- IEC interface functions, software realisation 3—30749
- IEEE SOUTHEASTCON, conf., Orlando, FL, USA (April 1983) 3—25779
- microprocessors for control and instrumentation, limitations and progress 3—40511
- MIL-STD-1553 dynamic bus controller/remote terminal set 3—34651
- mining and metallurgy instrumentation, conf., Denver, CO, USA, May 1982 3—41893
- multi-channel instrumentation systems, automated checkout 3—33668
- programmable controllers as the heart of the instrumentation system 3—33177
- rolled steel stock, automatic length meas. for cutting *(Russian)* 3—37563
- rotating machinery, reliability by instrumentation 3—37888
- short-range navigation systems, measuring instruments, optimum integration 3—41013
- technology 1983, devices processes and systems, state of the art review 3—38637
- thermal power plant instrumentation and control in India over last 10 years 3—37471
- Wescon 1980, conf., El Segundo, CA, USA (Sept. 1980) 3—32212

instruments
- *see also individual types of instruments, e.g. astronomical instruments, bridge instruments, optical instruments*
- agricultural measurement and control instruments *(Russian)* 3—33217
- automation, conf., Moscow, USSR (May/June 1983) *(Russian)* 3—33362
- CNC measuring machines, development *(Italian)* 3—37334
- floodlight alignment with computer assistance *(Dutch)* 3—36096
- instrumentation for gas and liquid flow measurement 3—26457

insulated gate field effect transistors
- MOS IC parameter control and computer-aided documentation of parameter values for simulation *(German)* 3—28627
- MOSFET, three-dimensional model 3—25396
- MOSFET 'Charge-sharing': a comparison of numerically determined results with analytical models *(German)* 3—28628
- MOSFET converter-fed position servo system with sliding mode control 3—33201
- MOSFET modelling system using table lookup 3—31855
- MOSFET table lookup models for SPICE2 circuit simulation 3—35914
- MOST model for piecewise-linear cct. simulator 3—40432
- new high-quality PWM AC drive, appls. 3—29782
- power FET controlled dimmer for incandescent lamps 3—37490
- power MOSFET limitations, computation using HP-67 calculator 3—25376
- scaled MOSFET for VLSI switching ccts., electronic props. *(German)* 3—25392
- switch characteristics, limitations and advantages 3—29672

insulated wires
- No entries

insulating materials, acoustic *see noise abatement*

insulation
- *see also cable insulation; electric breakdown; insulators; machine insulation; transformer insulation*
- No entries

insulation co-ordination
- No entries

insulation testing
- accelerated life testing, statistical calc., BASIC program 3—25294
- HV impulse generator control and data anal. by microcomputer 3—28595

insulators
- *i.e. insulating devices. For materials see insulating materials*
- *see also bushings; insulation*
- No entries

insurance
- cash value life insurance, nonhomogeneity of rates of return, implications for the consumer 3—36968
- computer fraud insurance in banks 3—24987
- facsimile transmission in insurance work 3—35416
- microcomputer insurance policies and maintenance contracts 3—27428
- model building appl. 3—32860
- practical Bayesian statistics, conference, Cambridge, England (July 1982) 3—41052
- property and casualty insurance, identification of underwriting cycle, spectral anal. appl. 3—36975
- tax liability for software contract 3—32277
- whole life insurance, determination of marginal rate of return and interest adjusted cost 3—36944

insurance data processing
- agent POS 3—28237
- automated billing system 3—28233
- automobile salvage parts location system, ADP-CES 3—28234
- Citadel Life Assurance's computerisation of administrative tasks 3—28247
- computer-aided underwriting, Bayesian fire and vehicle fleet models 3—43362
- computerisation of insurance using a CADO minicomputer 3—24997
- electronic mail, insurance agencies appl. in US and Canada 3—39696
- independent agencies, computer market growth 3—39708
- information centre, insurance application 3—28235
- IVANS network 3—28230
- life assurance, interbranch computer network 3—35434
- LLIBS computer system for Lloyds insurance brokers 3—28270
- manager's workbench appl. 3—28236
- microcomputer network with video cassette recorders for Winchester backup 3—28232
- online interactive terminals in insurance 3—28231
- pension insurance DP *(German)* 3—39722
- property and casualty insurance, computer selection criteria 3—39695
- property and casualty insurance agencies, IVANS computer network 3—39694
- Siebels, micrographics and automation 3—25005
- word processing at aircraft brokering company 3—31457

integer programming
- accelerated primal-dual cutting plane algorithm for all-integer programming 3—36593
- all-integer linear programming problem, new algorithm 3—36636
- assembly line balancing with processing alternatives 3—41350
- assignment type mixed integer linear programming problem properties 3—36594
- automatic reformulation of mixed and pure integer models to reduce solution time in APEX IV 3—41110
- Benders' method revisited [mixed integer programming] for mixed integer programming 3—36599
- branch and band algorithm to solve quadratic integer programming 3—29166
- capacitated vehicle routing problem, branch and bound algorithm 3—37044
- combinatorial method for integer programming problems with submodular matrices *(Russian)* 3—29172
- corrugator trim problem, 0-1 integer programming algorithm 3—23099
- flexible manufacturing systems, formulation and solution of nonlinear integer production planning problems 3—29459
- fuzzy multicriteria integer programming via fuzzy generalized networks 3—32816
- head-and-shoulder branching 3—41108
- head-and-shoulder-branching in integer programming 3—32529
- heuristics in integer programming 3—41089
- highway maintenance management, resource allocation, analytical decision model 3—26322
- ideal column algorithm for integer programs with special ordered sets of variables 3—26103
- linear and quadratic integer programming problems and direct soln. 3—29176
- logical database schema design 3—39513
- military aircraft expenditure determ., integer goal programming model appl. 3—26289
- Moscow urban area, housing exchange management information system, indivisible resource exchange alternatives determ., computational complexity 3—23145
- multinational company, strategic planning using mixed integer programming *(German)* 3—23067
- multiobjective generalised networks, modelling and anal. 3—23033
- multiobjective integer programming models, goal programming-generalised network approach 3—36890
- multiple objective capital budgeting with future investment opportunities and abandonment options 3—26288
- multiple preventative maintenance activities, optimal scheduling 3—26274
- nonlinear mixed integer problems, global optimisation 3—22897
- obliquely angled branch and bound technique for integer programming 3—36588
- parametric programming problems complexity 3—26086
- quasi-block problems, local solution algorithms *(Russian)* 3—41106
- resource allocation to interrelated risky projects using multiattribute utility function 3—29385
- storage hierarchy design, heuristic-based decision support system 3—40526
- travelling salesman problem and edge exchanges in minimal 1-trees 3—23036
- zero-one multiple objective programs, solution through implicit enumeration 3—23034

integral equations
- *see also integro-differential equations*
- Abel integral equation, optimal algorithm 3—30161
- algebraic pure cubic field, regulator and class number evaluation 3—42186
- boundary element algorithms, vector processing on CDC Cyber 205 *(French, English)* 3—23884
- Cauchy-type singular integral eqns., weighted Galerkin method of numerical soln. 3—42185
- computing the input to a linear model 3—36723
- conformal mapping, numerical integral equation method for interior, exterior, and doubly-connected domains 3—42187
- elliptic variational inequality formulation of Hele-Shaw moving-boundary problem, error estimate for finite-element approx. 3—37922
- end-temperature control in a long rod 3—37210
- finitely repeatable decisions mathematical mapping *(German)* 3—29114
- Fredholm equation, accuracy of algorithm solution using spline based method 3—33781
- Gauss-Kronrod integration rules for Cauchy principal value integrals 3—42184
- Gaussian quadrature and overdetermined systems, singular integral equations 3—37959
- indefinite quadratic cost optimal control for distributed system with unbounded control operator 3—37212
- inertial properties for general areas, computation method 3—37926
- iterative solution of systems originating from integral equations and surface interpolation 3—26911
- Kalandiya's method for the numerical solution of singular integral equations 3—33782
- mobile control systems 3—37315
- monochromatic radiative transfer, generalised exponential integral eqn. and computer algorithm 3—43591
- Monte Carlo method for solving linear equations 3—41004
- multiparameter measurement of non-electrical quantities, computer analysis *(Polish)* 3—37371
- nonlinear, Volterra-like expansions for solns. 3—26928
- nonlinear age-dependent population dynamics, mathematical approach 3—32829
- nonlinear elliptic equations of order 2m and subdifferentials 3—37960
- nonsingular linear system, iterative scheme of unconditional convergence 3—23885
- numerical solution of linear ill-posed problems 3—30141
- optimal control of nonlinear Volterra-Stieltjes integral equations 3—37211
- optimal control problem described by Volterra integral equation, construction of solution 3—37200
- parabolic equation general mixed problem solution using Galerkin method 3—32452
- piecewise continuous collocation for integral equations 3—26944
- polynomials, rational zeros, calc. by p-adic expansion 3—33783
- quadrature formula, optimal class 3—37958
- quadrature formulas for singular integrals, optimisation 3—30162
- random, approx. soln., general methods survey 3—22815
- semilinear distributed systems, maximum principle 3—33078
- shape design sensitivity of a membrane 3—43883
- Theodorsen's integral eqn., numerical expts. on iterative methods 3—26942
- transonic tridimensional potential flow, vectorised finite element method appl. *(French, English)* 3—25214
- Viner-Hopf integral equations, modified soln. algorithm *(Russian)* 3—32447
- Volterra and Abel integral eqns. of 2nd kind, Runge-Kuta theory 3—42179
- weakly singular second-kind Volterra integral eqns. with nonsmooth soln. 3—30160

integral transforms *see transforms*

integrated circuit manufacture
- *Used for commercial manufacture only*
- *see also masks; photolithography*
- CAE workstations, current developments 3—28607
- custom hybrid ICs, automated wire and die bonding 3—26720
- lithography, fast electron beam pattern generator, computer control, software architecture 3—26721
- Marathon modular automated IC test system, using distributed data processing 3—37853
- monolithic filters production automation, using microcomputer system *(German)* 3—41887
- process capacity planning, in multitechnology factory *(German)* 3—32901
- resistor network production automation 3—36000
- semiconductor wafer inspection automation: current and future needs 3—41891
- VLSI circuits, computer aided manufacturing at Hewlett Packard 3—26646
- VLSI production reactive ion etching 3—31969
- wafer processing on IBM manufacturing lines, using spectrophotometer film thickness meas. tool 3—42093

integrated circuit technology
- *See also under specific integrated circuit headings*
- *see also semiconductor technology*
- 1.2K CMOS gate array 3—31891
- 10 ns 8×8 multiplier LSI using super self-aligned process technology 3—30412
- 32-bit special processor architecture, circuit design and technology interdependence 3—42338
- 256-point discrete Fourier transform processor using 2 μm ED-NMOS technology 3—27103
- ACT CAD system, MOS custom/semicustom cell and gate array design appl. 3—42421
- advanced Schottky logic family from TI 3—42273
- automated IC layout, parameterised timing anal. 3—25388
- BIMOS II LSI, new architectures in data convertors 3—30325
- bipolar dynamic RAM cell 3—30570
- bipolar ECL RAM, 4Kb, 4.5 ns 3—27366
- bipolar LSI 5000 gate masterslice with 500 ps loaded gate delay 3—27080
- bipolar PROMs, Intel 3636B and 3632, for high system throughput 3—38557
- bipolar RAM single-transistor cell 3—30571
- bipolar static ECL RAM, 16K, 1 ns, with PNP load cell 3—27364
- bipolar static ECL RAM, 3.5 ns, 4Kb using U-groove isolation IOP-II 3—27367
- bipolar static MTL/I^{2}L RAM, 64K, 25 ns 3—27365
- bipolar static RAM, 16 ns, 16K 3—27363
- bipolar ULA family, R series, technology, CAD and appl. 3—38100
- bipolar VLSI masterslice, 10000 gate, using four levels of metal 3—27081
- CAD, polygon shape creation with prior referenced position 3—43779
- CAD, rectangular shape creation with predefined vertices 3—43778
- CAD, rectangular shape position translation 3—43777

integrated circuit technology continued
CAD/CAM for PC, IC and wiring systems 3−40415
CAE 2000 workstation, IC design system 3−28602
CCD chip design and hybrid focal plane array automatic test system 3−23739
CDI process making for 100000-gate logic arrays 3−38075
CMOS, high speed gate array, CAD, fabrication and performance 3−33937
CMOS 10K gate master slice gate array with gate isolation configuration 3−33963
CMOS 150 ns access time 288K EPROM with redundancy 3−27375
CMOS 16K static RAM using two-level Al-metallisation process *(Japanese)* 3−30581
CMOS 18 V double-level poly technology for nonvolatile memory and linear appls. 3−27360
CMOS 20 ns functional gate array with configurable memory 3−27079
CMOS 20K gate array using three level Al metallisation 3−27083
CMOS 23K gate digital signal processor with 100 ns multiplication 3−27282
CMOS 3-μm test chip, random logic, development and fabrication 3−30268
CMOS and Si-gate technology for semi-custom, ICs by Hughes Microelectronics *(German)* 3−30562
CMOS DRAM, high density, 64K, 70 ns access time 3−27353
CMOS dynamic RAM, 64K, double level Al process technology, battery backup 3−27355
CMOS gate array, 2.4K, dual layer Si-gate process and CAD 3−38094
CMOS gate array, design and custom/vendor interface aspects 3−38285
CMOS gate array, dual layer metal, advanced architecture 3−33969
CMOS gate array family, 3 μm Si-gate isoplanar technology and device design 3−38092
CMOS high-speed Metal Gate CD 4000 family, power dissipation, technology *(Italian)* 3−30253
CMOS logic array, 10000 gate, using 1.2 micron gate n-well process 3−33962
CMOS logic family, technology *(German)* 3−27068
CMOS masterslice logic LSI, design and performance *(Japanese)* 3−23980
CMOS microcomputer LSIs, circuit design methodology 3−27139
CMOS microprocessor, technological aspects 3−38173
CMOS PROM, fusible link, design 3−38556
CMOS static RAM, expandable standard cell designs and modelling 3−34437
CMOS static RAM cell with cross-coupled stacked CMOS inverters 3−42539
CMOS/VLSI microcomputer, custom design using standard cell library and CAD techniques 3−30449
computer-aided anal. and technology of ICs, book 3−35892
contact photolithography, process simulation, interactive program *(Russian)* 3−35891
custom IC design, SL-2000 integrated system 3−34152
custom integrated circuits, current and future trends 3−35930
custom integrated circuits, RCA Italy, gate arrays and LSI equipment *(Italian)* 3−42413
customer design team program for custom IC design *(German)* 3−25378
customisation, IC and chip packaging techniques for high performance mainframe computers 3−30650
DELIGHT.SPICE, optimisation-based CAD system 3−35935
design automation 3−35887
dynamic RAM using advanced NMOS technology 3−27361
E^{2}PROM and EAROM memories developments, using NMOS and FAMOS technologies *(Czech)* 3−34430
EAROM and E^{2}PROM, state of art and future prospects *(French)* 3−24198
EAROM for permanent storage using MNOS technology 3−34446

MERLYN-G gate array layout CAD system 3—42417
microelectronic circuits quality increase through steps on system level *(German)* 3—38519
microprogrammed automata, synthesis using standard PLAs 3—38010
Mikron gate arrays, CAD *(German)* 3—30362
MIMIC logic simulator 3—34164
Mitel MA5000 ISO-CMOS uncommitted logic arrays, development 3—33946
MM74HC CMOS logic elements *(German)* 3—33917
monolithic logic arrays from LSI LOGIC CORP., products, technology, CAD 3—34154
MOS circuits, symbolic logic simulation 3—35913
MOS circuits, test generation using D-algorithm 3—42400
MOS ICs, logic cct. switch-level simulator on microcomputer 3—34163
MOS LSI circuits, multiple media delay simulator 3—42404
MOS LSI design, cell library concept 3—38328
MOS technology for testable design of logic circuits *(Slovenian)* 3—30332
MOS-VSLI integrated circuits, CAD using cellular function module library *(German)* 3—40394
multifunction circuit cell for master slice technology 3—23955
multilevel logic array testing, macro equivalence scheme 3—34114
multiple-valued logic CCD ccts., Monte Carlo tolerance anal. 3—34129
NMOS dense gate matrix VLSI design layout rules 3—31875
NMOS logic implementation, mapping of binary decision diagrams into Si 3—34153
NMOS static array-multipliers, software layout compiler 3—34161
NMOS VLSI custom design, simplification 3—35819
NOR ring oscillator, logic gate characterisation technique 3—34111
NORA, racefree dynamic CMOS technique for pipelined logic structs. 3—38080
PAL, a substitute for TTL *(German)* 3—23959
PAL implementation state machine for MC6818 3—34559
PAL/EEPROM applications in digital design, reliability and power/speed factor improvements 3—30345
PAOLA, a CAD system for topological optimization and automatic mask layout of large PLAS *(French)* 3—31888
parallel random test generation for combinational ccts. 3—42389
PART, integrated system for PLA testing and verification 3—42423
PART, programmable array testing based on partitioning algorithm 3—38310
partial Boolean functions, realisation using PLAs 3—38012
partially good chips, minimal test/sorting using personalisation logic 3—38279
partitioning and repackaging system 3—28643
Path Programmable Logic CAD methodology, appls. 3—30371
peripheral bus driver ccts. based on Schottky TTL technology, East German components survey *(Czech)* 3—30263
PLA, 4ns access time, laser-customised with pre-program test capability 3—27082
PLA, Isologic: a user oriented gate array development approach 3—31890
PLA, PART test system based on partitioning algorithm 3—38289
PLA, self-testing, function independent method 3—34110
PLA, testable struct. and testing strategies 3—38290
PLA, verification tests construction methods using computer 3—42391
PLA design, testable, with low overload and high fault coverage 3—38309
PLA ELSE clause implementation 3—33934
PLA modules for sequential machines *(Spanish)* 3—38073
PLA programming, programmable logic development system 3—42396
PLA testing using multiple parallel signature analysers 3—38308
PLAs, design for testability of undetectable crosspoint faults 3—38276
PLAs, multiple-valued logic implementation 3—34128
programmable array logic, devices, programming and advantages *(German)* 3—27071
programmable array logic components, product design appls. 3—38102
programmable logic, design support facilities 3—38287
programmable logic, introduction 3—38101

integrated logic circuits continued
programmable logic, macros 3—43795
programmable logic array design using LOGE *(German)* 3—30361
programmable logic array implementation of weakly defined Boolean function 3—42249
programmable logic array with threshold logic 3—23976
programmable logic arrays, design and testability *(German)* 3—30333
programmable logic arrays, high performance VLSI, AMD families *(Italian)* 3—33929
programmable logic arrays, substitute for TTL *(German)* 3—27064
programmable logic arrays implementation of Boolean function in interval form 3—42248
programmable logic CAD, universal language 3—43796
programmable logic controllers, comparison with microprocessors for industrial automation *(Spanish)* 3—37355
programmers for PROMs, logic arrays and single chip microcomputers 3—24182
quaternary logic encoder-decoder circuit design using CMOS 3—33953
regular-language recognition using programmable building blocks 3—24048
remote entry custom circuit design with fixed-height standard cells 3—38329
scaled MOSFET for VLSI switching ccts., electronic props. *(German)* 3—25392
scannable array, using level sensitive scan design latches 3—42252
schematic-to-layout compiler, Dumbo program 3—33960
Schottky logic integration, Philips' chip *(Dutch)* 3—33919
SECL inverter/buffer, used for digital functions on analogue chips 3—33930
self-testing binary logic using 2-of-3-valued CMOS ccts. 3—33951
semi-custom logic array technology Fujitsu 3—33958
semi-custom logic design techniques 3—23967
semicustom array design, technology and CAD 3—38322
semicustom gate arrays, design for testability and test systems 3—34120
semicustom gate arrays, symbolic layout technique, CAD appl. 3—38330
semicustom IC design automation, gate-array and standard cell ICs, RCA 3—35940
Signetics Integrated Fuse Logic design philosophy 3—38286
simplification algorithms for logical expressions, PLA minimisation *(Japanese)* 3—24054
STL LSI gate arrays, circuit technology and CAD 3—34167
structured computer aided logic design (SCALD) system for gate arrays *(German)* 3—30360
structured computer aided logic design (SCALD) system for hierarchical design 3—34151
synchronisation signals, using automatic polarity processing 3—30261
ternary logic, CMOS implementation 3—33950
ternary logic, COS/MOS implementation 3—33949
test pattern generation using linear codes 3—38304
testing LSI, vertical partition test patterns 3—24034
Texas Instruments logic arrays, TAT 004 and TAT 008, Low-Power Schottky technology *(Italian)* 3—30252
three-level PLA design using EXANOR 3—23961
Toshiba custom gate arrays, using CMOS LSIs, CAD 3—38317
translinear logic—a new technique in bipolar technology 3—23964
TTL IC failure rate estimates from field data 3—33976
ULA DESIGNER, interactive gate array CAD system for customised design 3—42418
ULA testing at manufacturing and end user stages, low-cost approach 3—27140
uncommitted gate arrays, custom built ICs *(German)* 3—30244
uncommitted logic array design 3—42276
uncommitted logic arrays in semicustomised designs *(German)* 3—27072
very-high-speed fibre-optic data bus, technology and design considerations 3—27623
VLSI architecture, course, Bristol, England (July 1982) 3—42324
VLSI bit level systolic array chips, yield enhancement using fault tolerant techniques 3—34331
VLSI chess legal move generator 3—34196
VLSI confirm design for MOS cells using CAD 3—43786
VLSI current-controlled gate logic circuit, microwatt operation with JFET feedback loop 3—42261
VLSI easily-testable array multipliers 3—38292
VLSI gate array CAD at Fairchild *(Italian)* 3—30363
VLSI gate arrays, CAD system 3—28642
VLSI gate arrays, MASTER2 automatic layout system 3—33964
VLSI hierarchical design system BURLAP 3—42411
VLSI IC product structure alteration for semicustom design *(German)* 3—28623
VLSI logic circuits, cost-effective design system 3—40422
VLSI logic simulation system, structured design verification 3—42429
VLSI logic simulator 3—34144
VLSI PLA, decomposition algorithm for structure minimisation 3—24053
VLSI PLA, minimum cost realisation using transition graph technique 3—24052
VLSI systems, hierarchical path anal. for macro design 3—30259
VLSI/LSI logic gate arrays, technology and CAD, developments 3—33938
ZyMOS ZyP custom VLSI design system for logic 3—38327
ZyP VLSI design system, complexity, prod. vol. 3—30370
GaAs FET enhancement/depletion logic gates, cct. fabrication appls. 3—27077
GaAs high speed DCFL gate array consisting of 500 3-input NOR gates 3—33921
GaAs IC binary frequency divider using source-coupled FET logic, 4 GHz, 25 mW 3—27078
GaAs logic, threshold compensation circuit 3—23971
GaAs MESFET dynamic TT flip-flop, LSI subsystems 3—38081
GaAs Schottky diode FET logic gate array, 432-cell, with on-chip 64-bit RAM 3—33967
gaAs IC frequency dividers, single-clocked flip-flop type, stability aspects *(Japanese)* 3—23979
Si gate CMOS PLA, state of art 3—31893

integrated memory circuits
1Kb static RAM, self-aligned FET technology 3—27352
8K CMOS EEPROM, Hughes HNVM 3008 3—38544
16-bit microprocessor systems, memory performance 3—34057
16K RAMs, defect instances of storage ICs in the free time regime *(German)* 3—27344
36K static RAM word organised for VLSI processors *(German)* 3—27342

integrated memory circuits continued
64K 40 ns junction-shorting PROM 3—27374
64K dynamic RAM technology 3—34432
64K to 16 Mb DRAMs, modelling redundancy 3—27359
64K-bit mask ROM high speed high density, with EPROM read-mode compatibility *(Japanese)* 3—42540
256K dynamic RAM redundancy techniques 3—30556
2816 E^{2}PROM, nonvolatile, HMOS technology, reliability 3—38551
8086 microprcessor, memory performance and interface requirements 3—38546
artillery projectile applications of recoverable digital memory telemeters 3—42549
BBC microcomputer, sideways ROM capacity extension board 3—38533
bipolar EAROM cells, nonvolatile electrically reprogrammable memory types *(French)* 3—30583
bipolar ECL RAM, 4Kb, 4.5 ns 3—27366
bipolar PROMs, Intel 3636B and 3632, for high system throughput 3—38557
bipolar static ECL RAM, 16K, 1 ns, with PNP load cell 3—27364
bipolar static ECL RAM, 3.5 ns, 4Kb using U-groove isolation IOP-II 3—27367
bipolar static MTL/I^{2}L RAM, 64K, 25 ns 3—27365
bipolar static RAM, 16 ns, 16K 3—27363
byte wide concepts for microcomputer designs 3—38562
cache implementation for multiple microprocessors 3—27928
class of SEC-DED-S b ED codes detecting byte-error through b-grouped parity-checking *(Japanese)* 3—38542
CMOS 150 ns access time 288K EPROM with redundancy 3—27375
CMOS 16K static RAM using two-level Al-metallisation process *(Japanese)* 3—30581
CMOS 18 V double-level poly technology for nonvolatile memory and linear appls. 3—27360
CMOS 1Mb PROM with on-chip error-correcting code for yield enhancement 3—27368
CMOS 20 ns functional gate array with configurable memory 3—27079
CMOS 64k bit static RAM from Hitachi 3—24189
CMOS 8-bit microprocessor with I/O interface controller 64-Kbit CMOS mask ROM *(Japanese)* 3—34001
CMOS and Si-gate technology for semi-custom, ICs by Hughes Microelectronics *(German)* 3—30562
CMOS associative memory cell, resistor load type, static characts. *(Japanese)* 3—42543
CMOS DRAM, high density, 64K, 70 ns access time 3—27353
CMOS dynamic RAM, 64K, double level Al process technology, battery backup 3—27355
CMOS EEPROMs, technology and capabilities 3—38554
CMOS EPROM, 64K, static, sub 100 ns access time, on-chip test functions 3—27356
CMOS LSI RAM, on-chip sequential address method using pseudorandom binary sequence generator 3—30559
CMOS memory and microprocessors, Li-I battery back-up appl. 3—38247
CMOS PROM, fusible link, design 3—38556
CMOS RAM, 2k×8 extension module SMM-22 for Sharp PC 1500 pocket computer *(German)* 3—27340
CMOS RAM, 64K, divided word line struct. 3—27354
CMOS sense-restore circuits for one-device FET dynamic RAM 3—24194
CMOS static memories, flip-flop readout amplifiers comparison 3—27350
CMOS static RAM, expandable standard cell designs and modelling 3—34437
CMOS static RAM cell with cross-coupled stacked CMOS inverters 3—42539
CMOS technology and leadless carriers for low power memory systems 3—38565
CMOS VLSI dynamic RAM, submicron memory circuits, design and implementation 3—27381
CMOS/SOS hardened RAMs, design and performance under transient radiation levels 3—30568
dual address 4K CML RAM 3—24204
dynamic gain RAM cell, taper-isolated array arrangement and layout 3—34422
dynamic MOS RAMs *(Dutch)* 3—34412
dynamic RAM, 64K, config., sensing schemes and refresh requirements 3—38548
dynamic RAM, 64K, testing aspects and appl. 3—38550
dynamic RAM, plastic encapsulation, moisture induced failure study, prevention techniques 3—34439
dynamic RAM memory market in 1980's 3—38564
dynamic RAM using advanced NMOS technology 3—27361
E^{2}PROM, 16K self supporting device 3—24206
E^{2}PROM, 5 V-only, fabrication by HMOS-I FLOTOX technology using 1.5 μm lithography 3—27371
E^{2}PROM, system architecture *(German)* 3—27329
E^{2}PROM and EAROM memories developments, using NMOS and FAMOS technologies *(Czech)* 3—34430
EAROM, MOS stacked gate memory cells, device survey and performance aspects *(French)* 3—27348
EAROM, nonvolatile, using MOS technology 3—34447
EAROM and E^{2}PROM, state of art and future prospects *(French)* 3—24198
EAROM for permanent storage using MNOS technology 3—34446
EEPROM, 32K, +5V-only, fabrication using ISO-SNOS process 3—27372
EEPROM, 64k, 5 V, fabrication using double-poly n-channel Si gate Nitrox technology 3—24187
EEPROM, 8k×8, with internal program/erase control, 5V-only operation 3—27370
EEPROM, Intel 2817 3—38523
EEPROM, new tools for added quality and reliability 3—42544
EEPROM, selection for appls., trade-offs 3—27334
EEPROMs, appl. in avionic embedded computers 3—34441
EEPROMs development and appls. 3—27383
EEROM, future directions, features, appls., and technology 3—30587
EPROM, development *(German)* 3—38526
EPROM, EEPROM, SEEPROM, state of the art review *(German)* 3—30552
EPROM, n-MOS wafer device, 128 Kbit, electron beam programming technique 3—30580
EPROM 2732, 32 kbit, qualification *(Italian)* 3—24185
EPROM and E^{2}PROM compatibility in microprocessor-based systems 3—34449

integrated memory circuits continued
  EPROM Intel 256K, manufacturing method and props. *(French)* 3−24191
  EPROM programmer, appl. to Intel SDK-51 3−30565
  erasable nonvolatile semiconductor memories, EEPROMs, NOVRAMs 3−24181
  failure rate monitoring of 256 KB dynamic memories, MH B4116 and K565R U3A *(Czech)* 3−38541
  fault-tolerant memory chip architecture 3−42538
  FIFO buffers, 8X60 controller IC 3−27339
  FIFO memory circuits 3−34410
  Fujitsu MBM27C64, UV-EPROM 3−27333
  hardware logic simulator, block level 3−42427

touch sensitive CRT screen in telescope control system 3−23798
touch sensitive displays for operation and control of computer systems 3−42845
touch sensitive interface for CRT/flat panel display systems, intelligent terminal types 3−30958
touch sensitive screens, options and applications 3−27757
touch-sensitive overlay, unpatterned, for CRT displays 3−24457
touch-sensitive VDU and computer-aided key pad for plant control, comparison 3−38945
transaction telephones 3−39847
UK market trading figures interpretation 3−29010
UK terminal market 3−29006
UMIST Advanced Graphics Unit facilities, CAD appl. 3−22778
Unigraphics CAD system *(German)* 3−40342
user friendliness and ergonomics 3−34810
VDT ergonomics, guidelines versus task aspects 3−28939
VDU, effects on environment and health 3−38947
VDU, touch sensitive, review 3−38965
VDU screen glare and printer noise, rectifying products 3−30960
VDU survey, tabular form 3−30976
VDUs, operator performance improvement using colour 3−38936
video display terminals, comparative review 3−24468
video display terminals, health and safety aspects 3−34807
video display terminals, status report 3−34795
video systems, development 3−38942
video terminal, monolithic, using Am 8052 CRT controller *(German)* 3−42848
video terminal for the MC6800 microprocessor *(Spanish)* 3−38964
videotex terminals and systems 3−35577
visual display unit ergonomics 3−34828
visual display unit survey 3−27769
Visual Technology display terminals 3−34798
voice and video game, speech recognizer appl. 3−32174
voice/touch input for natural-language problem solving 3−30978
Whizzard 7290 graphics terminal from Megatek *(French)* 3−27763
workstation props. and appls., colloquium, London, UK, (Mar. 1983) 3−27772
workstations eval. for computer aided engineering 3−26030
workstations for administrative support staff transform the organization 3−35368
X.25 networks, data terminal equipment design considerations 3−27776
Xerox Star workstation and Ethernet 3−27773

interconnected systems *see large-scale systems*

interfaces, computer *see computer interfaces*

interference
see also interference (signal)
dynamic systems, detection using barycentric coordinates 3−28468

interference (signal)
see also crosstalk; electromagnetic interference; intersymbol interference
active beacon based collision avoidance system, design and test 3−33580
adaptive communication system controllers, analytic design 3−33104
analogue signal processing, low-interference, A/D conversion *(German)* 3−38251
composite signal detect. and reception in presence of noise and spectrally lumped interference 3−32767
doubly spread target, maximization of signal-to-interference ratio, nonlinear programming problems 3−36843
feeder lines of digital systems, interference generation and suppression *(Slovak)* 3−42340
local area radio network, interference considerations 3−30925
multisensor array with spatially correlated noise, optimal delay estimation 3−29347
packet radio networks, two interfering queues 3−29112
radar signal processing 3−27256
real time digital sound generation, noise 3−28832
receiver-amplifier systems, program for analyzing nonlinear distortions 3−40483
white Gaussian noise and arbitrary interference optimum processing of arbitrary signals 3−26242

interference spectrometers
programmable etalon spectrometer, PRESTO, for airglow intensity meas. in twilight 3−43695

interference spectroscopy
see also Fourier transform spectroscopy
No entries

interference suppression
see also echo suppression
adaptive interference suppression using SAW programmable transversal filters 3−30443
feeder lines of digital systems *(Slovak)* 3−42340
invertor and induction motor system for traction, using microprocessor, harmonic control *(Japanese)* 3−29788
magnetic recording read-back signal improvement by cosine equalisation *(Japanese)* 3−34381
raster-scanned CRT displays interference suppression, for TV and computer VDUs 3−24490
signal switch with differential inputs 3−42694
underwater vehicle sonar interference reduction by adaptive signal processing 3−31937

interferometers
see also electromagnetic wave interferometers; interferometry
No entries

interferometry

internal combustion engines
adaptable dynamometer with automatic load control for testing small engines with standard or alternative fuels 3—23804
automobile, microcomputer engine control system, closed loop carburettor control and electronic ignition 3—41681
automobile electronic engine control unit development, microcomputer-based system 3—29710
automobile electronic engine control using microprocessors, emission control 3—29709
automobile engine valve timing, microprocessor-based controller 3—29712
automobile microprocessor-based systems, engine control and interface circuits 3—41680
automobile reciprocating combustion engine deficiency anal., real-time microprocessor-based system 3—30041
automotive appl. of microprocessors conf. Dearborn, MI, USA (Oct. 1982) 3—26541
automotive diesel pump controller, microprocessor based 3—26544
automotive real-time engine simulator using multiple microcomputers 3—31997
camshaft manufacture, control of peen-straightening using PC 3—29870
control system for internal combustion engine driven heat pump *(French)* 3—41694
control using custom microcomputer *(German)* 3—30282
cruise control system, microprocessor based 3—26545
deficiency anal. using real time computer based system 3—26842
development of a high-speed and small DI diesel engine 3—37426
diesel engine injection pumps electronic controller construction and operating principle *(German)* 3—37427
diesel engine test beds, static adaptive algorithms for computer control 3—37860
diesel rotary distributor pump controller for multicylinder engines, microprocessor appl. 3—29711
Dignition, microprocessor controlled ignition for IC engines *(German)* 3—33245
electronic control, microprocessor appl. 3—26542
electronic control unit, microprocessor based 3—26543
electronically controlled fuel injection system. microprocessor based, for car engines 3—41679
engine control optimisation, computer-aided procedures 3—37425
fuel meas. system, microprocessor based 3—26844
hybrid passenger vehicle, microcomputer controlled power train 3—26547
induction hardening system, productivity enhancement by programmable control *(German)* 3—23551
microprocessor-controlled fuel injection system 3—33242
microwave signal analysis for engine diagnostics 3—36036
motor test cell, off-line identification and control of nonlinear behaviour of torque and manifold pressure 3—41685
natural gas piston engine power measurement, Totem in steady-state operation *(Dutch)* 3—33243
nonlinear bondgraph simulation using THTSIM 3—31962
optimisation of internal combustion engine driven heat pump 20 kW heating power *(German)* 3—41693
piston-type, ways of improving operating economy 3—41905
real-time simulation using multiple microcomputers 3—28744
simulation using multiple microcomputer system 3—28768
spark ignited engines, parameters estimation 3—41687
spark ignition, engine valve timing controller, microprocessor based 3—26546
startup and control, pneumatic equipment *(French)* 3—29717
turbocharged-engine monitoring using HP 3421A control and data acquisition unit *(Spanish)* 3—26461
Wankel rotary engine, simulation using ZX81 3—31998
interpolation
see also function approximation
analog signal processing with the switched-capacitors network under the microprocessor control *(German)* 3—29323
approximate rational arithmetic and rational interpolation, unified view 3—37935
Banach spaces and interpolation projections 3—41067
C^1 rational interpolation over an arbitrary triangle 3—23838
calibration by least squares polynomials on the Atari, BASIC program 3—35657
cubic spline interpolants, undulation removal *(Japanese)* 3—33752
curvilinear grid, solution of hyperbolic PDES 3—30152
direct FFT scheme for interpolation, decimation, amplitude modulation and single side band modulation 3—32794
enriched subspaces method for selfadjoint singular perturbation problem 3—23847
finite element interpolation polynomials, general determination method 3—33745
FIR filters, two-dimensional FIR design 3—38413
function approximation, SPION program for EMG-666 desk computer *(German)* 3—23839
geometric transformations, parallel implementation 3—27258
graphics generation/update with splines on screen at high speeds 3—35017
hardware function generation using table lookup in ROM 3—23840
heart, improved image reconstruction from small numbers of projections 3—40240
high-speed computerised tomography image reconstruction using direct two-dimens. Fourier transform method *(Japanese)* 3—40171
iterative solution of systems originating from integral equations and surface interpolation 3—26911
Katelnikov high-speed interpolation algorithm *(Russian)* 3—30133
knot placement for piecewise polynomial approximation of curves 3—42144
log-logarithmic worst-case range queries are possible in space $\Theta(N)$ 3—43011
modified parametric Lagrangian interpolation for CAD 3—25286
interpolation continued
MOSFET modelling system using table lookup and interpolation 3—31855
multidimensional time series, interpolation algorithm 3—32763
multiple interpolation for functions analytic in half-plane *(Russian)* 3—30131
multipoint discrete models of continuous processes of optimal complexity, synthesis 3—22938
ordinary differential eqns. with right hand side functions containing discontinuities, numerical method 3—23873
program using Lagrange techniques used in pharmacokinetic analysis 3—43646
proportionality integration method for linear interpolation of multiple axes system *(Chinese)* 3—30124
quansiinterpolant splines on the unit circle 3—42149
quintic natural spline interpolation algorithm 3—33747
real time digital sound generation, noise 3—28832
Remez type algorithm for spline functions 3—26890
Rodin, computer painting package 3—28844
rotationally symmetric operators for surface interpolation 3—32690
shape preserving planar interpolation, algorithm 3—30120
singular integrals eqns., Kalandiya's method for numerical soln. 3—33782
smooth multivariate spline functions 3—42153
surface representation from irregularly distributed data points, interpolation technique 3—30129
visual surface interpolation, computational theory 3—32689
Volterra kernel functions, direct estimation using multifrequency test signals 3—41127
waveform sampling and reconstruction, error mechanisms 3—23004
weighted-average samples interpolation using cubic B-spline functions, image processing appl. 3—29283
Wigner distrib. aliasing reduction using implicit spline interpolation 3—26249
XY interpolation algorithms numerical control programs 3—29844
interpreters (program) *see program interpreters*
interpretive programs *see program interpreters*
intersymbol interference
QAM data modems, computing loss of margin to noise 3—40497
invariance
algebraic characterizations of almost invariance 3—37117
distributed systems, program difference control 3—23231
dynamic control systems, appl. of factorisation and decomposition methods *(Russian)* 3—29511
NT-33 aircraft pilot model, pilot induced oscillations anal. method 3—33531
inventory control *see stock control*
inverse Nyquist diagrams *see Nyquist diagrams*
invertors
address receiver circuit for TTL decoders 3—42254
analysis of field orientation control of current source inverter drive induction motor systems 3—29781
application of AC inverter drives to textile fans 3—29924
compensated network invertors, microprocessor-based control *(German)* 3—23411
computer power supplies, using static invertors 3—38231
configuration of microprocessor systems for the control of inverters *(Russian)* 3—37477
control methods for good dynamic performance induction motor drives based on current and voltage as measured quantities 3—37492
convertor-invertor-fed induction motor drive system efficiency optimisation by slip feedback *(Korean)* 3—37462
current source invertor, hybrid computer simulation 3—24298
current source invertor induction motor drive, stabilisation at light loads 3—33285
current-source inverter with interphase commutation feeding asynchronous machine, digital simulation 3—35809
DC, with independently regulated outputs and combined commutation, power relationships *(Russian)* 3—29759
DC/AC unit, microcomputer-controlled, technical features *(Swedish)* 3—37351
decentralised control system for power drive unit, description *(German)* 3—23415
design of an inverter control system *(Russian)* 3—41738
digital computer simulation of variable-speed PWM inverter-machine drives 3—28576
digital design techniques *(Spanish)* 3—24050
digital pulsewidth modulator employing advanced modulation techniques, appl. in induction motor drive 3—37493
HF, improved control *(Hungarian)* 3—41725
high performance pulsewidth modulator for an inverter-fed drive system using a microcomputer 3—29785
hybrid computer simulation of a controlled-current inverter under normal and fault conditions 3—29786
induction motor controlled slip variable flux drive, current source invertor-fed 3—29793
induction motor drive system, speed control schemes based on field coordinates method 3—29794
induction motor drives, current-source invertor-fed, selected harmonic reduction by EPROM technique 3—37518
load independent AC/DC power supply for higher frequencies with sine-wave output 3—29783
logical functions, inversion complexity *(Japanese)* 3—42392
microcomputer-based control signal generator for a three-phase switching power inverter 3—29784
microprocessor-based invertor and induction motor system for traction, harmonic control *(Japanese)* 3—29788
modulation of the chopping frequency in DC choppers and PWM inverters having current-hysteresis controllers 3—37532
MOS inverter simulation 3—35860
new high-quality PWM AC drive, appls. 3—29782
NMOS single-chip three-phase power inverter controller 3—33119
nonlinear adaptive control of an inverter-fed induction motor linear load case 3—23429
optimal control of commutation pulses 3—23432
parallel invertor transition *(Bulgarian)* 3—33203
separate speed control of induction motors by a cyclo-inverter unit 3—33288
solar cell array link to 50 Hz line, chopper invertor control aspects 3—23501
solar photovoltaic generation system in home, harmonic distortion and reactive power, computer simulation 3—25358

invertors continued
steady-state analysis of a permanent magnetic synchronous motor drive with current source inverter 3—29780
steady-state performance of PWM inverter drives 3—33312
three-phase bridge invertors, PWM waveform derivation from FET and microprocessor 3—23500
three-phase induction motor speed control, PWM waveform generation software 3—23502

NMOS custom ICs, automated performance optimisation 3−35903
NMOS dense gate matrix VLSI design layout rules 3−31875
NMOS DRAM, static column, 64K, 35 ns access time, multiplexed address inputs 3−27357
NMOS Ethernet data link controller chip, CAD 3−24383
NMOS logic implementation, mapping of binary decision diagrams into Si 3−34153
NMOS LSI, 1K associative memory 3−30553
NMOS LSI 16×16 parallel digital multiplier, pipelined architecture 3−30313
NMOS LSI modulo multiplier, design and implementation, data encryption system appl. 3−34239
NMOS RAM, static, 64K, cross-coupled flip-flop cells, 40 ns access time 3−27358
NMOS single-chip self-contained speech recognizer 3−39038
nMOS VLSI, Crystal timing analyser program 3−34155
NMOS VLSI 16-bit microprogrammable microprocessor chip, 55K transistors 3−27108
NMOS VLSI custom design, simplification 3−35819
nMOS VLSI timing analyser program TV 3−34156
NSC800 8-bit P^{2}CMOS CPU chip, low power appls. 3−42298
Oki high-performance gate a CMOS, TTL, ECL, using CAD 3−38089
parallel global router *(Japanese)* 3−34121
parallel multiplier, VLSI design and performance 3−38113
parallel processing, light pipe implementation of banyan networks 3−24272
parallel processing, VLSI networks based on orthogonal trees 3−38339
PART, integrated system for PLA testing and verification 3−42423
partitioning algorithm for set of points on digitised plane *(Japanese)* 3−28637
pass transistor cct. simulation using logic simulation machines 3−43813
peripheral board controller device for subscriber line boards in digital exchange systems 3−28674
peripheral circuits for microprocessors 3−38068
PIPE: A high performance VLSI architecture 3−27199
pitch extraction by tapped-delay-line adaptive digital filter 3−38490
PLA ELSE clause implementation 3−33934
PLAs, multiple-valued logic implementation 3−34128
pre-programmed LSI data communication devices for X.25 and signalling system #7 3−42710
process simulation in the VLSI techniques *(German)* 3−28630
processor oriented VLSI memories, structural and logical realisation 3−42541
programmable arrays, sequential cct. construction 3−42264
programmable logic arrays, high performance VLSI, AMD families *(Italian)* 3−33929
programmable logic arrays implementation of Boolean function in interval form 3−42248
programmable LSI digital filter, architecture and instruction set 3−27273
programmable systolic chip, design 3−34048

large scale integration continued
programmable voice digitiser, TI TMS-320 microcomputer appl. 3−30476
PROM, Harris Semiconductor, bipolar and CMOS processes, state-of-the-art and future 3−27382
pseudostatic RAM characterisation and testing 3−38543
RAM, 8k chip with integral refresh and control 3−24176
RAMs, VLSI, testability and reliability *(German)* 3−27343
random pattern testability [logic testing] 3−38293
RCA CDP1804 and CDP1805 processors improve system performance and lower chip count 3−42297
reactive ion etching of VLSI wafers in production environment 3−31969
Reed-Solomon encoder using Berlekamp's bit-serial multiplier algorithm 3−34049
regular set recognition methods for VLSI *(Japanese)* 3−38280
RELAX: a new circuit simulator for large scale MOS integrated circuits 3−43763
residue number system arithmetic modules, VLSI implementation 3−38118
restoring logic circuitry design 3−42277
Restricted Instruction Set Computer I design and implementation 3−42485
scaled MOSFET for VLSI switching ccts., electronic props. *(German)* 3−25392
scannable array, using level sensitive scan design latches 3−42252
schematic-to-layout compiler, Dumbo program 3−33960
SCN68562 MOS VLSI high performance multi-protocol controller for advanced data communications applications 3−30760
semicustom microcomputer design and manufacture 3−38199
semicustom VLSI chip design automation system, Caddas 3−40391
semicustom VLSI design, structured approach 3−31894
Signetic SCN68562 MOS-LSI data communications controllers, architecture 3−38800
single chip VLSI systolic arrays, input/output structures comparison 3−34080
software engineering and VLSI engineering, interchange of ideas 3−27852
software intensive LSI/VLSI data communications controllers 3−42714
Southern '83, conference, Atlanta, GA, USA (Jan. 1983) 3−28918
special-purpose device integration into VLSI system 3−42336
SPECS, symbolic parasitic extractor for circuit simulation, VLSI design 3−43827
speech recognition, Intel VLSI chips, architecture and appl. 3−31036
speech recognition unit with single chip LSI MN1263, using Walsh-Hadamard transform. *(Japanese)* 3−34872
speed enhancement using packaging 3−24007
stable minimum distortion tones with low cost integrated circuits 3−37793
standard cell and gate array design techniques, comparison 3−30239
static RAM and microcomputer packing density doubling using production-oriented technology *(German)* 3−27346
STL LSI gate arrays, circuit technology and CAD 3−34167
Storage Module Device disc drives, LSI cotrollers 3−30549
strapdown, VLSI appl. 3−33552
stuck faults, distinguishing between two 3−24035
symbolic layout with mixed constraints, compaction algorithm 3−31852
systolic array element algorithm specification 3−42337
systolic processor arrays, interstitial fault tolerance 3−38362
TDC1023J digital correlators bring DSP techniques to new areas 3−32728
test pattern generation, vector alternative graph model 3−38711
test subroutines development, guidelines 3−31872
test system for VLSI, Tektronix S-3295 3−33651
text coprocessor chip, Intel 82730 3−27093
three-dimensional cellular interconnection arrays, self-routing and set-up algorithms 3−34186
TMS320 family, single chip microcomputers for digital signal processing appls. 3−34051
TMS9914 NMOS chip for interface between IEEE-488 bus and microprocessor 3−34652
TMS9995 16 bit μP VLSI inspection using SEM in voltage contrast mode 3−30294
token access controller, LSI implementation for local area network appl. 3−42790
token protocol, efficient, LSI implemented 3−30893
Toshiba custom gate arrays, using CMOS LSIs, CAD 3−38317
TTL-compatible macrocell array 3−25409
uncommitted logic array design 3−42276
uncommitted logic arrays in semicustomised designs *(German)* 3−27072

LIDAR *see optical radar*
Lie groups
Cartan classes, weight multiplicity, irreducible representation, computer program 3—28445
uniformly finite generation of SO(N, R) 3—26032
life testing
2-parameter Weibull distribution with progressively censored samples, estimators 3—32593
accelerated life testing, optimum simple step-stress plans 3—32587
censored sample estimations, correspondence of types I and II 3—32594
constant failure rates comparison, sequential method 3—32591
electrical insulation, accelerated life testing, statistical calc., BASIC program 3—25294
EPROM 2732, 32 kbit, qualification *(Italian)* 3—24185
Intel Magnetics 7110 one-megabit bubble memory, reliability and environmental capabilities 3—34404
microelectronics testing, acceleration factors, appl. and use 3—28635
percentile residual life function, properties tests 3—36691
plastic encapsulated PROMs, nichrome corrosion, model for failure mechanisms 3—34438
residual life function, properties tests 3—36692
secondary cells life testing, continuous cycle, using computer-controlled multiple channel system 3—37851
standby redundant system, Bayesian reliability assessment study *(Japanese)* 3—41145
survivor function of mixture 3—32584
telecommunication networks, software quality impact on performance *(Italian)* 3—35976
lifting machinery *see hoists*
lifts
see also cableway systems
command 6000 DC operated gearless elevator control system, thyristor appls., microcomputer implementation 3—29957
disabled persons, lifting platform, hydraulic control system *(Italian)* 3—29955
elevator-monitoring system for the Shinjuku NS Building *(Japanese)* 3—29956
Mitsubishi made-to-order passenger lifts 3—23669
speech synthesis application, industrial applications of speech technology 3—34877
ligand field theory *see bonds (chemical)*
light amplifiers *see image intensifiers*
light communication *see optical communication*
light emitting devices
see also light emitting diodes; light sources; luminescent devices
No entries
light emitting diodes

automobile control development displays *(German)* 3—42056
display panel, message scrolling, design and development 3—27760
logic array processor using shadowgrams 3—30235
luminance control, improved circuit 3—42120
passive fibre-optic star bus for local area networks: system design and performance 3—34712
TTL logic tester, op-amp circuit with LED indicators, circuit design 3—27130
light filters *see optical filters*
light intensifiers *see image intensifiers*
light interferometers
see also light interferometry
heterodyne 64-channel interferometer for laser flow field meas. appls. 3—37897
real-time active vibration controller for Michelson interferometer 3—42094
rotation, sensitive meas., fibre-optic gyro appl. 3—23307
light interferometry
see also holographic interferometry; Moire fringes
fringe analysis, automatic, with computer image-processing system 3—40099
fringe position measurement using TV based system 3—42106
laser speckle metrology, automated data reduction 3—40110
robots, position control, laser interferometry appl. 3—41819
light meters *see photometers*
light microscopes *see optical microscopes*
light microscopy *see optical microscopy*
light modulation *see optical modulation*
light pens
Apple II light pen 3—30947
CAI appls. hardware specifications for interactive learning 3—25627
continuous updating of angle/distance travelled, using display processor 3—42850
Gibson LPS II light new system, for Apple II 3—29065
human factors in light pen usage, appl. to young children 3—24441
input output facilities for microcomputer users 3—42865
light pen for the Apple II, construction *(French)* 3—30946
microelectronic control *(German)* 3—24465
pattern dragging 3—34822
VIC-20 light pen, do-it-yourself instructions 3—34771
video-desk system, operation facility for Austrian Federal Railways *(German)* 3—33517
light sensitive materials *see photographic material sensitivity*
light sources
see also infrared sources; light emitting devices; photometric light sources; spectroscopic light sources
CAD appl., development trends *(Japanese)* 3—28789
illuminators efficiency and partial luminous flux distribution computerised calc. *(Hungarian)* 3—31818
photon correlator, microprocessor-based, low-cost 3—25239
lighting
see also floodlighting; street lighting
aircraft lighting schemes simulation, microcomputer-based 3D graphics package evaluation 3—36078
building services energy management by infra-red remote control systems 3—41756
CCTV surveillance/assessment function enhancement at controlled access site perimeters 3—37834
computer aided design of lighting installations *(Finnish)* 3—35787
computer appls. to lighting design, calculation and costing 3—25295
computer control of theatre lighting 3—29747
computer controlled building services 3—23358
computer-aided planning and design system *(Japanese)* 3—28793
control systems, market potential survey 3—32855
control systems for electric lighting *(Russian)* 3—33323
control systems to reduce energy costs 3—26562
electronic office, architectural aspects 3—25921
equivalent sphere illumination calc., computer program *(Japanese)* 3—28792
illumination performance, CAD procedures *(Japanese)* 3—28794
industrial installations automatic lighting control costs, contributing factors *(Russian)* 3—29800
interior artificial lighting CAD 3—25592
light distribution, computer-aided prediction for lighting fixture *(Japanese)* 3—28790
lighting and control systems at Manchester Airport, UK 3—23434
luminous intensity distribution photometer with multiphotoreceptors and microcomputers *(Japanese)* 3—28791
measurement of light distrib., computer-controlled robot system *(German)* 3—42110
multifunction home control system 3—23356
photovoltaic/thermal solar energy system design and construction for residential commercial building 3—28803
renovation of lighting and power installations *(Dutch)* 3—33271
switching systems for energy savings 3—23413
lightning
pulse voltages rise time computation by digital computer *(German)* 3—28566
lightning conductors *see lightning protection*
lightning protection
see also surge protection
grounding and lighting protection for computers 3—40945
lightning rods *see lightning protection*
limit cycles
autonomous systems, stability of limit cycles associated with a symmetric bifurcation phenomenon 3—37177
digital filters, recursive, constant-input limit cycles elimination using generalised minimum norm 3—30432
distributed parameter heat exchangers controlled by manipulation of flow rate, limit cycle stability 3—33249
feedback systems, prediction of limit cycle existence using Walsh functions 3—41413
Space Shuttle Orbiter with flexible payload, dynamics control 3—37774
limiters
see also microwave limiters
No entries

limiting circuits *see limiters*
line concentrators
- EF-1 order/supervisory unit for submarine-line repeater telephone concentrator *(Japanese)* 3—28671

linear accelerators
- *see also electrostatic accelerators*
- computer-automated Linac diagnostics and data acquisition 3—37870
- conference, particle accelerators, Sante Fe, New Mexico, USA (Aug. 1983) 3—40115
- induction electron accelerators, particle simulations of collective effects 3—40120
- LAMPF control system, data acquisition software 3—37878
- LAMPF control system, database management system 3—37876
- LBL SuperHILAC third injector transport line automatic tuning 3—37880
- RF linac, SUPERFISH cavity code, additions and improvements 3—40125
- SLAC SNOOP Diagnostic Module for FASTBUS 3—37869
- Stanford Linear Accelerator, control systems, local area networks appl. 3—37881
- Stanford Linear Accelerator, phase and amplitude detection system 3—37867
- Stanford Linear Collider, klystron control system 3—37883
- Stanford Linear Collider, on-line control models 3—37882
- TBCI and URMEL computer codes for wake field and cavity mode calcs. 3—40122

linear algebra
- *see also determinants; eigenvalues and eigenfunctions; matrix algebra; tensors; vectors*
- algebraic Riccati equation, solution set, geometric properties 3—29097
- algebraic Riccati equations, principal methods for classifying set of real symmetric solutions 3—29096
- AOR method, convergence *(Chinese)* 3—26901
- asynchronous computational processes for soln. of linear algebraic eqns. systems *(Russian)* 3—41464
- computerised tomography on logarithmic polar grid 3—43653
- computing with linear equations and matrices 3—42166
- conjugate gradient soln. method, error bounds improvement 3—26910
- differential/algebraic systems, software to solve, DASSL code 3—25204
- economic systems, minimax planning problems with monotone functions on polyhedral sets 3—32842
- equation plotting use in teaching 3—25889
- equations solution, cellular arrays appl. 3—34377
- Gaussian elimination, a posteriori error bounds 3—30113
- iterative methods, analysis 3—33760
- iterative solution of systems originating from integral equations and surface interpolation 3—26911
- multivariable linear systems, algorithm for obtaining Jordan canonical form of a matrix 3—41427
- nonsymmetric systems of linear eqns., variational iterative methods 3—26909
- numerical solution of linear ill-posed problems 3—30141
- optimum linear filter eqns. with near-Toeplitz or near-Hankel parameters 3—29354
- optimum second order stationary extrapolated iterative schemes 3—33759
- ordered sets, setup minimisation, linear algebraic approach 3—23028
- parallel computation of linear simultaneous equations 3—23859
- second-order linear two-point boundary-value problems, computational study of finite element methods 3—31720
- simultaneous equation solution *(Japanese)* 3—33762
- space matrix solving machine, $(SM)^2$ 3—38682
- triangular systems of eqns., parallel soln. 3—23855
- unity feedback systems, design method for achieving arbitrary denominator matrix 3—29499

linear-beam tubes *see microwave tubes*
linear differential equations
- alternating-direction incomplete factorizations, error anal. 3—26880
- Chebyshev approx., CHPACK package for manipulation 3—35667
- classical solution, singularity functions as inputs 3—26041
- FFT for numerical solutions of systems of linear equations *(Russian)* 3—33786
- function space controllability of linear neutral systems 3—26353
- Hilbert spaces, least-squares solutions of multi-valued linear operator equations 3—41069
- integro-differential equations, iterative soln. methods, using ATsVS-21 hybrid system, FORTRAN program *(Russian)* 3—26943
- measures induced by Ito and white noise linear eqns., relationships 3—22816
- motions of a partial differential equation 3—29100
- multigrid methods for variation problems, V-cycle 3—26941
- non-Gaussian Markov system, anal. 3—37143
- Nth order linear ordinary differential eqn., APL and numerical soln. 3—40075
- pulse-duration transducers, control signal discrete averaging, dynamic props. *(Russian)* 3—26489
- reducibility of a linear differential system 3—26931
- Runge-Kutta formulae, comparison of local error estimators 3—23868
- stiff linear differential large scale systems, real-time solution using computational architecture 3—36687
- variable-mode linear dynamic device under random white-noise stimuli, output coordinates 3—36645
- Welsh transformation, appl. to linear differential eqns. with variable coeffs. *(Russian)* 3—23866

linear integrated circuits
- bipolar, ALAS programming system for topological layout tests *(German)* 3—28632
- bipolar integrated transistor structures, frequency characteristics calculation taking topology into account 3—35875
- CMOS analogue ccts., CAD building blocks aid LSI 3—31895
- custom IC CAD, ALICE system 3—35939
- Electro '80, conf., Boston, MA, USA (May 1980) 3—32211
- feedback controller design using SG1731 2-quadrant PWM IC 3—33299
- negative output voltage from IC, switching controller *(German)* 3—23284
- operational amplifiers, testing device, impulsive input type *(Russian)* 3—26836
- P20A, P40A, semicustom function arrays for power appls. 3—33168
- UC1524A PWM power control cct. 3—23243

linear motors
- digital position control system for printing head driving equip. *(Japanese)* 3—23245

linear motors continued
- H-Bahn vehicles with 3-phase AC linear induction motors and controllers, drive control 3—26740
- homopolar linear synchronous motor studies using finite element interactive computer system 3—25332
- industrial appls. in X-Y tables, plotters and robots *(Japanese)* 3—23319
- robot, Model-A, linear motor position control, flexible manufacturing system appl. 3—26683

linear network analysis
- amplitude-frequency and phase-frequency characteristics, calc. from transfer characteristics, computer appl. *(Russian)* 3—31878
- analogue Automatic Test Program Generator, implementation 3—40438
- causality in linear system and network synthesis problems, algebraic characterization 3—37141
- generalised number coding, method when using decomposition method of expanding a determinant 3—35883
- Gysel power divider-combiner, eight-way network, L-band optimisation, computer aided analysis 3—35849
- LINSIM, a linear electrical network simulation and optimisation program 3—28617
- nonlinear dynamic circuit element model with nonlinear resistors and linear network 3—40450
- passive ladder networks analysis, using TI-58 calculator *(Czech)* 3—31883
- symbolic analysis, using small computer *(Slovak)* 3—31863
- symbolic analysis giving sorted network functions with respect to some kinds of identical symbolic elements *(Japanese)* 3—40412
- TJD program for linear circuits anal. *(Chinese)* 3—31850
- transfer functions, poles and zeros determ. of function described through polar curve *(German)* 3—32958

linear network synthesis
- active filter with adjustable props., using analogue computer *(Czech)* 3—28636
- distributed four-port networks, computer-oriented synthesis and sensitivity 3—40425
- FIR digital filters, recursive finite field, synthesis algorithm 3—38406
- radio-electronic circuits, linear, partial structural synthesis 3—35873
- RC active network inductance simulators, computer-aided performance evaluation 3—28651
- RC-active filter design sensitivity minimisation by constrained nonlinear optimisation 3—40442

linear programming
- adaptive differential-correction algorithm 3—23842
- all-integer linear programming problem, new algorithm 3—36636
- analogue solns. game theory 3—36598
- assignment type mixed integer linear programming problem properties 3—36594
- automative repair, automated planning of processes *(Russian)* 3—37007
- bicriterion resource allocation problem, appl. of modified Khachiyan algorithm 3—36874
- block upper-triangularity of undiscounted multi-chain Markov decision problems 3—41086
- bounding data in the X, Y plane 3—36623
- capacitated transhipment networks, parametric network feasibility problem 3—29430
- capital budgeting, basic uncertainty appl. 3—36977
- chance-constrained programming 3—26098
- chromosome classification, transportation algorithm appl. 3—37076
- combinatory optimisation *(Italian)* 3—22895
- commercial greenhouse modelling, scheduling of planting 3—36962
- computer program for linear programming of business problems 3—22878
- connectedness in multiple linear fractional programming 3—22887
- constrained discrete linear l_∞ data fitting, exact penalty method 3—26883
- constrained economical dispatch using exponential cost functions 3—23473
- cycling in the network simplex method 3—29181
- discrete Chebyshev curve fitting, LP algorithm 3—37927
- dual degenerate problems, ranging cost coefficients 3—41087
- ellipsoid algorithm robustness and sphere method 3—26107
- ellipsoid method and implications 3—22889
- energy optimization, managing resources in large industrial powerhouse 3—33479
- energy-economic interaction modelling, energy planning for developing countries 3—29405
- fast algorithms *(Japanese)* 3—36603
- Fenchel-duality and separably-infinite programs 3—26110
- flows on nets with linear capacity constraints *(Bulgarian)* 3—32810
- general knapsack problem algorithm 3—26269
- goal level setting 3—36638
- highway maintenance management, resource allocation, analytical decision model 3—26322
- infinite horizon dynamic programming problems, complementary slackness theorem appl. 3—26275
- integer programming problems and direct soln. 3—29176
- interactive computer programs for fuzzy linear programming with multiple objectives 3—36600
- interactive multiple objective programming method for class of underlying nonlinear utility functions 3—36893
- irrigation surface optimal levelling, linear programming model 3—36925
- iterative methods, software validity 3—22896
- job-shop, product-mix models, simulation study of simplification strategies 3—23093
- large-scale linear dynamic programming using temporal decomposition algorithms 3—22890
- large-scale linear programming: geometry, working bases and factorizations 3—26100
- learning and LP integration 3—32881
- lexicographic goal programming 3—26099
- linear systems, optimal control, pole allocation *(Japanese)* 3—37238
- logical database schema design 3—39513
- market value maximisation, Markov dynamic programming appl. 3—36943
- Markov processes for decision making with linear capacity constraints and flow function *(Bulgarian)* 3—41029
- master production scheduling, multiple objective linear programming approach 3—29454
- matrix storage schemes 3—41109
- method of ellipsoids, generalisations and appl. 3—41082
- microcomputer architecture optimisation 3—27159
- microcomputer implementation 3—25198
- minicomputer appl., virtual memory handicaps 3—40085
- mixed disc packing problem, density bounds 3—26270

linear programming continued
- model design based on the systems approach 3—36659
- modeling languages versus matrix generators for linear programming 3—32530

load dispatching continued
- power systems, short term load forecasting at dispatching *(Slovenian)* 3−29746
- real/reactive power optimal dispatching algorithm *(Korean)* 3−41718

load distribution
- 2-way automatic communication system for load distribution management and automatic meter reading 3−29821
- automatic stand-by starter for a complex load *(Russian)* 3−41723
- communications options for distribution automation and control 3−29820
- computer-aided, short-term operation planning of power supply systems 3−35785
- generation unit commitment program used for analysis of load management 3−29822
- interactive application software for electrical distributors, microcomputer appl. 3−25360
- interconnected power systems, load forecasting, microprocessor based parameter and state estimator appl. 3−41770
- new developments in power frequency communication 3−26613
- operational load distribution between turbo-sets of heat and power stations *(Russian)* 3−43747

load flow
- AC system reinforcement generator and phase-shift transformer location algorithm 3−25350
- Baltimore Gas and Electric Company Energy Control System *(Korean)* 3−33316
- constrained economical dispatch using exponential cost functions 3−23473
- electrical power system, load flow equations, mathematical formulation *(Russian)* 3−25313
- energy control centre functions for power systems 3−41708
- evaluation of load characteristics using HP41C programmable calculator *(German)* 3−25304
- interactive APL power flow demonstrator for power system engineering education 3−28571
- interactive application software for electrical distributors, microcomputer appl. 3−25360
- intermittent resistive loads integral cycle controlled on the improvement of AC characteristics 3−41726
- large power systems load flow solution using piecewise fast decoupled algorithm 3−31837
- multigenerator power system transient and dynamic behaviour anal. 3−40380
- network decomposition and aggregation for the dynamic reallocation of power flows 3−40382
- optimal load flow program extension to tap-changing and reactive power limitation 3−23476
- optimisation using random search *(German)* 3−23398
- optimisation using random search *(German)* 3−25298
- power loss, conjugate gradient *(Russian)* 3−40366
- power system control, state estimation 3−41761
- power system security, identification and ranking of critical contingencies in dependent variable space 3−22926
- power system state estimation, weighted least squares methods 3−41762
- protective devices coordinating for transient faulted conditions, computerised method 3−40384
- pseudo-second-order load flow formulation improvement 3−23475
- state estimation based external network solution for on-line security analysis 3−36717

load regulation
- 60 MW steam extraction turbine, load control according to structural temp. stresses 3−23452
- 380/220 kV, control of an isolated network *(German)* 3−23422
- Aladdin, distribution automation demonstration by utilities in USA 3−29810
- automatic load control for consumers at end of long overhead lines 3−33336
- commercial and industrial load control, mains signalling methods compared 3−23472
- computerised power system, reevaluation of normal operating state control using system theory, tracking dispatch targets with unit control 3−33307
- controlling the electrical loads of the units in a steam power station, taking operational limitations into account *(Russian)* 3−41740
- digital controller, fault surveillance and back-up policy 3−37525
- electrical power system, load flow equations, mathematical formulation *(Russian)* 3−25313
- electricity supply, direct load control, management programme implementation issues 3−33342
- electricity supply industry 3−26561
- heat pump impact on load shape and load control 3−29724
- homeostatic control: the utility/customer marketplace for electric power 3−29819
- household load management system, bidirectional communication using spread spectrum signalling 3−30026
- hydraulic load-sensing circuits *(Italian)* 3−29653
- interconnected power systems, detuned min. variance regulator 3−37529
- intermittent resistive loads integral cycle controlled on the improvement of AC characteristics 3−41726
- load/frequency controllers for gas turbines 3−37451
- local heat and power generation, conf. Milton Keynes, England (April 1981) 3−29818
- multiarea power system load-freq. control, modelling and simulation 3−26609
- new developments in power frequency communication 3−26613
- Northern Finland electricity production considerations *(Finnish)* 3−37459
- oil fired boiler/turbine unit, multivariable control appl. 3−23365
- optimal penetration of direct load control switches 3−37521
- photovoltaic concentrator array power systems, microprocessor-based sun-tracker and load controller 3−26612
- photovoltaic system simulator for solar cells performance characterisation and evaluation 3−26610
- Polish electrical power capacity compensation by load control measures *(Danish)* 3−29737
- positive load management, integrated data acquisition and control system, cost benefit analysis 3−41759
- positive load management, residential load control program, costs and benefits 3−41760
- power load management, RF remote and computer control, design trends 3−41758
- power system failures prevention and limitation by intelligent automated systems 3−37453
- power system load frequency control, decentralised 3−33296

load regulation continued
power systems, load frequency sampled-data control with unknown deterministic power demand 3−26594
power systems, short term load forecasting at dispatching *(Slovenian)* 3−29746
power systems decentralized load frequency control under generation rate constraints 3−33294
renovation of lighting and power installations *(Dutch)* 3−33271
SECAT integrated telecontrol system for load management 3−29742
time-of-day system energy costs with pumped storage load management, digital simulation 3−31841
utilization of thermal power stations for the systematic regulation of load curves *(German)* 3−26570
load shedding
380/220 kV, control of an isolated network *(German)* 3−23422
automatic load shedding reacting to voltage oscillations *(French)* 3−23401
Baltimore Gas and Electric Company Energy Control System *(Korean)* 3−33316
bulk power system reliability evaluation via contingency simulation 3−31847
coordination, methodology and computer program 3−29807
emergency control of power systems, energy function analysis 3−37473
homeostatic control: the utility/customer marketplace for electric power 3−29819
industrial power system load shedding and phased reacceleration scheme design and analysis 3−25346
large hydrothermal power system optimal generation scheduling 3−23469
local heat and power generation, conf. Milton Keynes, England (April 1981) 3−29818
power system frequency-controlled load shedding to ensure stability, reliability improvement 3−37516
rejection transient overvoltage and generator overspeed evaluation, Z-transform method 3−23499
lobes (distribution) *see antenna radiation patterns*
local area networks *see communication networks; computer networks*
local networks *see communication networks; computer networks*

logic CAD
16-bit microprocessor chip design microprogram and logic simulation 3−42330
ACT CAD system, MOS custom/semicustom cell and gate array design appl. 3−42421
ALU, automatically generated area, power and delay optimised 3−27153
analogue and significant event digital simulator 3−34142
Aquarius, interactive hierarchical logic simulator for engineering workstation 3−42425
automatic logic design/synthesis workshop 3−42402
automatic placement algorithms for high packing density VLSI 3−43816
BASIC sumulation program 3−27149
BIMOS, MOS oriented multilevel logic simulator 3−42426
bipolar ULA family, R series, technology, CAD and appl. 3−38100
Cadtec series 8000 logic design/project management system 3−31862
carry-save adder network CAD, Foster-Stockton and tree structs. 3−34162
CMOS, high speed gate array, CAD, fabrication and performance 3−33937
CMOS cell arrays, design 3−33970
CMOS gate array, 2.4K, dual layer Si-gate process and CAD 3−38094
CMOS logic gate array design using a VAX 11/780 *(German)* 3−30355
CMOS routable masterslice gate arrays, layout and design criteria 3−33974
combinatorial networks design using automated theorem proving system 3−34149
computer design using bit-slice microprocessors *(German)* 3−28720
computer-assisted engineering design of logic circuits and devices *(Italian)* 3−38314
concurrent logic control systems 3−43861
custom IC design, SL-2000 integrated system 3−34152
custom integrated circuits, RCA Italy, gate arrays and LSI equipment *(Italian)* 3−42413
custom microcomputer design using ZyMOS ZyCOMP-4 standard cell 3−38200
data acquisition problems in logic analysis 3−24059
data qualification in Dolch LAM 4850A logic analyser *(German)* 3−30357
data reduction and selection in logic analysers, Gould K 101-D *(German)* 3−30358
design and verification subsystem using logic transformation subsystem 3−42430
design automation, Conf., Miami Beach, FL, USA (June 1983) 3−43800
design automation system for gate arrays, programming languages for hardware description 3−43100
design verification for VLSI NMOS 3−34158
development system for logic arrays, LDS I 3−34148
differential pairs modelling method 3−34143
digital counters, computer-aided matrix analysis 3−42410
digital systems, formal design verification 3−42639
ECL, LSI, CAD using NECL Macrocell Array standard logic elements 3−34165
ECL gate array family, GE1000 series, performance, packaging and CAD 3−38095
engineering workstation, design requirements 3−43794
engineering workstation development integration into product development process 3−30373
engineering workstations for VLSI design Daisy Logician engineering workstation 3−28646
functional blocks, processing and estimation *(Japanese)* 3−40525
gate array, subnanosecond 2000-gate, with ECL 100K compatibility 3−33965
gate array based semiconductor LSI chips, using CAD 3−38316
logic CAD continued
gate array CAD, engineering workstation environment, optimisation 3−30372
gate array CAD systems, interactive design methodology 3−42419
gate array design, systems approach and CAD 3−38326
gate array design procedures at VALVO *(German)* 3−30368
gate array minimisation, logic partitioning procedure 3−30351
gate array minimisation 3−24063
gate arrays, automatic layout using X2 CAD system 3−38331
gate arrays, IC design 3−34147
gate arrays, MOS and bipolar devices, CAD and characts. 3−38093
hardware logic simulator, block level 3−42427
HIGHLAND, gate array CAD 3−24064
HILO 2 logic simulation software 3−28608
Hitachi gate arrays, TTL, CMOS, packaging 3−38319
HP1630 logic analyser *(Spanish)* 3−34139
IBM's design and verification system, logic design front-end 3−42428
ILS, interactive logic simulator for design verification and testing 3−34160
IMAT/IMAS logic analyser printout facilities *(German)* 3−27150
implementating of CAD, one company's approach 3−43793
integrated engineering offices 3−43792
integrated multi-station CAE system for electronic equipment test and design *(German)* 3−43767
interconnection verification program for VLSI design 3−30348
Karnaugh plan structs., minimising program based on Gray code *(German)* 3−34146
LDS 1 logic array development system, interactive CAD and hardware implementation 3−42420
LOGE, programmable logic design system *(German)* 3−30354
logic analyser selection guidelines 3−34140
logic analysers, master-slave operation *(German)* 3−27147
logic simulation machine 3−28722
logic simulation machine 3−30349
logic simulator program in BASIC 3−25366
LOGIX system for interactive electronics CAD/CAM 3−40418
LOGOS remote LSI gate array CAD, using telephone data link 3−38318
LSI and VLSI cards performance testing, real-time logic simulation development *(French)* 3−27152
measurement station for digital systems anal. *(German)* 3−30359
memoryless logic network synthesis algorithms 3−35915
Mentor Idea 1000 computer-aided engineering workstation for logic CAD 3−38320
MERLYN-G gate array layout CAD system 3−42417
microprocessors, prototype testing, using signature analysis *(French)* 3−27151
Mikron gate arrays, CAD *(German)* 3−30362
MIMIC logic simulator 3−34164
module placement, parallel processing approach 3−27146
monolithic logic arrays from LSI LOGIC CORP., products, technology, CAD 3−34154
MOS LSI design, cell library concept 3−38328
MOS-VSLI integrated circuits, CAD using cellular function module library *(German)* 3−40394
MSM—a modular mciroprocessor system *(Polish)* 3−40405
NMOS logic implementation, mapping of binary decision diagrams into Si 3−34153
NMOS static array-multipliers 3−34161
nMOS VLSI, Crystal timing analyser program 3−34155
nMOS VLSI timing analyser program TV 3−34156
PAOLA, a CAD system for topological optimization and automatic mask layout of large PLAS *(French)* 3−31888
parallel adapter for a logic simulation machine 3−34141
PARSIM, interactive simulation facility for evaluation of shared-resource architectures 3−42424
PART, integrated system for PLA testing and verification 3−42423
pass transistor cct. simulation using logic simulation machines 3−43813
path programmable logic, self-timed IC design 3−33959
Path Programmable Logic CAD methodology, appls. 3−30371
placement and routing for logic schematics 3−30352
programmable logic, macros 3−43795
programmable logic array design using LOGE *(German)* 3−30361
programmable logic CAD, universal language 3−43796
remote entry custom circuit design with fixed-height standard cells 3−38329
SCALD system *(German)* 3−31867
semi-custom logic array technology Fujitsu 3−33958
semicustom array design, technology and CAD 3−38322
semicustom gate arrays, symbolic layout technique, CAD appl. 3−38330
semicustom IC design automation, gate-array and standard cell ICs, RCA 3−35940
sequential logic circuits standard design using microprocessors *(Korean)* 3−42412
simplification, dynamic partitioning for automation 3−30366
simulators for logic design 3−25375
software simulation engine 3−30353
software-performance anal. for microprocessor-based designs 3−27877
STL LSI gate arrays, circuit technology and CAD 3−34167
structured computer aided logic design (SCALD) system for gate arrays *(German)* 3−30360
structured computer aided logic design (SCALD) system for hierarchical design 3−34151
structured computer-aided logic design, used for hardware, firmware simulation 3−24060
systolic array element algorithm specification 3−42337
technology-relative logic synthesis and module selection, automation 3−30350
Tektronix 1240 logic analyser, ergonomic design 3−34145
Tektronix 1240 logic analyser *(German)* 3−30356
telecommunication systems, *(Japanese)* 3−34588
Toshiba custom gate arrays, using CMOS LSIs, CAD 3−38317
tree universal logic module networks, for multi-valued logic systems, synthesis algorithm 3−34150
ULA DESIGNER, interactive gate array CAD system for customised design 3−42418
universal emulator and a memory emulator giving the designers a free choice *(French)* 3−24061
VLSI design, ZyP automation system based on standard cells 3−42422
VLSI design approach and core tools 3−42327
VLSI design strategy involving floor plan and topological evaluator 3−42332

logic CAD continued

PLA programming, programmable logic development system 3−42396
PLA-based discrete units, synthesis and anal. *(Russian)* 3−33851
PLAs, multiple-valued logic implementation 3−34128

logic design continued
pneumatic MPL circuits, combinatorial network design 3—29639
programmable drop option for mask programmable complex logical functions 3—42259
programmable logic, design support facilities 3—38287
programmable logic arrays, design and testability *(German)* 3—30333
Radomacher-Walsh transforms, Maitra cascade synthesis 3—38015
random-pattern coverage enhancement and diagnosis for LSSD logic self-test 3—34113
reduced dependence in multivalued sequential machines 3—33883
register-transfer level logic, formal specification, anal. and design 3—27132
regular set recognition methods for VLSI *(Japanese)* 3—38280
regular-language recognition using programmable building blocks 3—24048
reliability design of discrete devices 3—38020
residue arithmetic ccts. using multiple-valued CCDs 3—33952
restoring logic circuitry design 3—42277
safety monitoring systems, optimisation of probabilistic logic structure *(Japanese)* 3—37837
SAM automatic programming method *(Czech)* 3—31085
scan design circuits with tri-state modules and bidirectional terminals, test generation 3—42401
semi-custom logic IC design techniques 3—23967
semicustom gate arrays, design for testability and test systems 3—34120
sequential approximation register design, verification in 16-channel multiplex A/D unit *(Czech)* 3—24022
shift register latch arrangement for minimization in level sensitive scan design 3—42387
Signetics Integrated Fuse Logic design philosophy 3—38286
simplification algorithms for logical expressions, PLA minimisation *(Japanese)* 3—24054
software implementation of combinational logic 3—25373
synchroniser circuit with square-wave output, high-speed, low-noise 3—34108
system design, bus board considerations 3—34112
ternary clause selection, preprocessing procedure 3—33872
ternary logic functions, synthesis based on NAND-type polypheck 3—34131
ternary majority functions of four or less variables, generation 3—34126
totally self-checking checkers for in-out-of-n codes, 3-level realisation 3—38302
totally self-checking comparators with arbitrary number of inputs 3—38301
uncommitted logic array design 3—42276
uncommitted logic arrays in semicustomised designs *(German)* 3—27072
very-high-speed fibre-optic data bus, technology and design considerations 3—27623
VLSI, 3-D, case study 3—38281
VLSI, trace theory and the definition of hierarchical components 3—34134
VLSI design and testing, coming generation tools 3—34136
VLSI logic networks, algorithms for partitioning 3—30341
VLSI systems, hierarchical path anal. for macro design 3—30259
Z80 microprocessor emulator, development 3—42278

logic devices
see also fluidic logic; logic gates; threshold elements
asymmetric Josephson interferometer, with well-defined low critical points 3—23957
computer architecture, fully digit on-line networks 3—30378
design, logic and algebraic appl. 3—24095
high-tolerance current-injection logic Josephson device 3—38072
MLOG logic system, irrigation plants, appl. *(Czech)* 3—37385
multifunction circuit cell for master slice technology 3—23955
three-state device and circuit testing 3—34116
wire mill automation with programmable logic controller *(Croatian)* 3—26641

logic gates
custom integrated circuits, RCA Italy, gate arrays and LSI equipment *(Italian)* 3—42413
EX-OR, digital design techniques *(Spanish)* 3—24050
inversion complexity of a set of logical functions *(Japanese)* 3—42392
inverted transistor logic gate with FET load, Si bipolar VLSI appls. 3—23954
Josephson adder, wide margin, using high gain direct coupled logic gates, simple config. 3—33922
Josephson four-junction logic gates, sub-10 ps logic operations 3—33918
Josephson high gain direct coupled sub-10 ps logic gates 3—23956
MM74HC CMOS logic elements *(German)* 3—33917
MOS-VSLI integrated circuits, CAD using cellular function module library *(German)* 3—40394
multiple interrupt registration, used to avoid request loss 3—42253
optical logic array processor, logic gate implementation in parallel 3—30515
optical logic array processor using shadowgrams 3—30235
optical sequential logic processor architectures, computer generated holograms for gate interconnection 3—30513
OR-ing device inputs, statistically dependent inputs 3—38482
PAL implementation state machine for MC6818 3—34559
pneumatic NOR logic elements *(Croatian)* 3—27063
SHIELD logic simulator for bidirectional transmission gates 3—35949
ternary EX-OR for ternary TTL chain code generator 3—30176
two-input multivalued gates and switches *(Russian)* 3—27065
VMOS transistors in logic circuits *(German)* 3—30242
GaAs FET enhancement/depletion logic gates, cct. fabrication appls. 3—27077

logic testing
addressing errors detection within memory system 3—42388
Amdahl 580, design for testability 3—27189
analogue/digital circuits, simulation and testing 3—35853
analyser, Fluke 9010 A, processor system error search *(German)* 3—38273
analyser, techniques for 68000 image processor debug 3—38666
analyser, using internal/external clock, construction 3—38321
analysers, HP 1630A, 1630D, operation and facilities *(German)* 3—27148
analysers, operation and features, software debugging and appl. 3—38324
analysers, operational practices and design productivity considerations 3—38323
analysers in software control *(French)* 3—26840
analysis tool for logic cards with integrated module 3—24047
AND-EOR combinatorial logic circuits, testability *(Japanese)* 3—23981

logic testing continued
automatic test generating *(Russian)* 3—30343
BELLMAC-32 microprocessor testing 3—24008
bit patterns, exhaustive generation with appls. to VLSI self-testing 3—23968
Boolean difference along the path and its application *(Chinese)* 3—23893
built-in testability, in logic design 3—34138
built-in testing by output data modification 3—38305
CMOS 6K gate array, built-in test/maintenance system, design and performance 3—23960
CMOS combinational networks, fault detection 3—42399
CMOS LSI/VLSI combinational ccts., stuck-open faults testing 3—38306
combinational circuits, fault influence function for identification of multiple faults 3—38296
combinational circuits, test generation and fault diagnosis for multiple faults 3—38297
combinational digital devices, classes of diagnostic tests 3—42408
combinatorial ccts., random test procedure for single intermittent faults 3—38277
combinatorial circuits, bridging fault detection *(Chinese)* 3—24025
combinatorial circuits, test algorithms and testability *(Slovenian)* 3—30241
compact analysers for troubleshooting data communication networks 3—42379
computer-aided VLSI test data generation system 3—28622
control automata testing, diagnostic method 3—34106
critical path tracing 3—42403
critical-trace algorithm for functions and computer hardware description language constructs 3—38294
custom ICs, conf., Rochester, NY, USA (May 1983) 3—33961
data acquisition problems in logic analysis 3—24059
data qualification in Dolch LAM 4850A logic analyser *(German)* 3—30357
data reduction and selection in logic analysers, Gould K 101-D *(German)* 3—30358
deterministic test pattern generation for internal self-test of ICs *(German)* 3—27137
DI 7035 logic analyser *(German)* 3—24049
diagnostic emulator, interactive servicing of microprocessor-based designs 3—42481
differential pairs modelling method 3—34143
digital devices, cyclic diagnosis 3—27016
digital PCB, processor controlled inspection and diagnostic system using signature anal. *(Bulgarian)* 3—40396
Diogenes, methodology for designing fault-tolerant VLSI processor arrays 3—38701
direct simulator attachment for logic processors 3—34115
dual timebase analyser, for asynchronous clocked systems 3—27135
electronic workbench, appl. in research, development, production engineering and field service 3—34034
ETI Dicrobe dual purpose logic tester, using CMOS ICs, LEDs 3—30338
FANout-oriented test generation algorithm, acceleration 3—38295
fault dictionary, method of construction *(Chinese)* 3—38313
fault models for LSI/VLSI devices 3—27131
fault-tolerant computing, conf., Milan, Italy (June 1983) 3—38698
fault-tolerant serial-shift arrangement 3—24038
'G-F' two-valued algorithm for functional-block-level test generation *(Chinese)* 3—38270
gate array designs, automatic test program generator 3—27157
gate arrays logjam test engineering, problems and solns. 3—34166
Gould 105-D-LA logic analyser *(German)* 3—38315
Gould K105-D logic analyser 3—24056
Gould K105-D logic analyser *(German)* 3—42380
hardware logic simulator, block level 3—42427
HASHTEST Universal Monitor Package architecture, VLSI testing 3—42414
HILO-2 high speed universal logic design simulator 3—42383
hooking up computers and peripherals for testing 3—24245
HP1630 logic analyser *(Spanish)* 3—34139
HP1630 logic analyser for hardware/software anal. *(German)* 3—27129
HP 1630/D multi-function logic analyser 3—30326
HP 1630A logic analyser with wide range functions *(German)* 3—30334
HP 64000 Logic Development System, implementation, emulation and debugging features 3—34314
HP 64000 logic development system, integrated workstation for microprocessor design 3—38325
HP 64600S logic timing analyser 3—24032
ILS, interactive logic simulator for design verification and testing 3—34160
IMAT/IMAS logic analyser printout facilities *(German)* 3—27150
initializing sequential circuits 3—24030
interacting synchronized control automata, testing using structure analytic method 3—33863
interconnection verification program for VLSI design 3—30348
internally unate combinational networks, syndrome testability for single stuck-at faults 3—38021
large system fault tolerant memory techniques 3—38561
level sensitive scan design scan path truncation for testing 3—34117
level-sensitive scan design, problems and latch implementations 3—27141
linear codes for logic test pattern generation 3—38304
logic analyser, appl. for computer testing and program development *(German)* 3—38274
logic analyser, data acquisition with dual timebase for simpler system integration *(French)* 3—24031
logic analyser, HP1630 A/D, for processor performance evaluation *(French)* 3—38275
logic analyser add-in for Apple II, μAnalyst 2000 ISA 3—24058
logic analyser selection guidelines 3—34140
logic analysers, master-slave operation *(German)* 3—27147
logic analysers for software and hardware debugging 3—30331
logic analyzer, third generation Hewlett-Packard HP1630 A/D, architecture and capabilities *(Italian)* 3—30364
logic analyzers, portable, debugging and diagnostics appls. 3—38271
logic fault verification of LSI: how it benefits the user 3—34137
logic programming module with functional testing capabilities 3—38105
logic state analyzer, personal computer-circuit and combination *(French)* 3—30057
logic test computation, double congruence method *(Russian)* 3—33906
logic verification for programmable devices 3—38288
LORMATIC logic control system, for technological links control in agriculture *(Czech)* 3—33215
LSI, vertical partition test patterns 3—24034

logic testing continued
LSI and VLSI cards performance testing, real-time logic simulation development *(French)* 3—27152
LSI features expandability, distributed ATE 3—24051
LSI logic modules, in-system in-isolation module testing design [LSI logic] 3—24045
LSSD testable ring oscillator 3—24036
m-out-of-n TSC checkers, design method 3—27136
many-valued LSI/VLSI, structured design with built-in testing 3—34123
measurement station for digital systems anal. *(German)* 3—30359
microcomputer based logic analyser, comparison with special-purpose equipment *(Slovak)* 3—30347
microcomputer development systems instrums., logic analyser addition 3—30453
micromapper for testing microprocessor-based system 3—24137
microprocessor based logic testing system *(German)* 3—24057
microprocessor circuits troubleshooting, logic state analyzer IMAS and special probes appl. 3—33677
microprocessor development using logic analysis systems 3—34133
microprocessor self-test on basis of code situation *(German)* 3—27104
microprocessor-based circuits introduction into high safety installations 3—38282
microprocessors, concurrent test technique for standard devices 3—27111
microprocessors, hard- and software development aided by logic analysers 3—30330
microprocessors, prototype testing, using signature analysis *(French)* 3—27151
MOS circuits, test generation using D-algorithm 3—42400
MOS technology for testable design of logic circuits *(Slovenian)* 3—30332
MSM—a modular mciroprocessor system *(Polish)* 3—40405
multilevel logic array testing, macro equivalence scheme 3—34114
multiple-valued deductive simulation of digital devices 3—38312
multitester, logic probe, clock pulse detector and voltage level detector with acoustic indication 3—27134
NOR ring oscillator, logic gate characterisation technique 3—34111
on-chip circuitry, serial-scan diagnostic method 3—24028
parallel random test generation for combinational ccts. 3—42389
parallel signature analysers, detection capability and extensions 3—27142
parity checking of logic 3—30342
PART, integrated system for PLA testing and verification 3—42423
PART, programmable array testing based on partitioning algorithm 3—38310
partially good chips, minimal test/sorting using personalisation logic 3—38279
Petri net based search directing heuristics for test generation 3—42409
pI-testable iterative arrays, built-in-testing 3—38291
PLA, PART test system based on partitioning algorithm 3—38289
PLA, self-testing, function independent method 3—34110
PLA, testable struct. and testing strategies 3—38290
PLA, verification tests construction methods using computer 3—42391
PLA design, testable, with low overload and high fault coverage 3—38309
PLA programming, programmable logic development system 3—42396
PLA testing using multiple parallel signature analysers 3—38308
PLAs, check test construction 3—27128
PLAs, design for testability of undetectable crosspoint faults 3—38276
portable test and measurement instrumentation for microprocessor based systems, product survey 3—42049
Prism 2000 logic state analyser/Apple II personal computer combination, design and operation 3—30046
product self-test signature testing 3—34118
programmable logic arrays, design and testability *(German)* 3—30333
programmable logic devices, programming, testing 3—42382
programming language for in-circuit testing, developed by Zehntel *(French)* 3—31880
random access sequential networks, coherence faults 3—38119
random number generators, signature analysis, used for self testing 3—42386
random pattern testability [logic testing] 3—38293
random-pattern coverage enhancement and diagnosis for LSSD logic self-test 3—34113
rapid software fault diagnosis by logic analyser *(German)* 3—34109
Rohde and Schwarz logic analyser, IMAS, microprocessor testing *(German)* 3—34107
roving emulation as a fault detection mechanism 3—38303
scan design circuits with tri-state modules and bidirectional terminals, test generation 3—42401
self-testing binary logic using 2-of-3-valued CMOS ccts. 3—33951
self-testing embedded code checkers 3—27143
self-testing group-parity prediction checker and its use for built-in testing 3—38298
self-testing scheme using shift register latches 3—24044
semicustom gate arrays, design for testability and test systems 3—34120
serial data driver for generator IGA 3—34589
signature anal., basics and meas. practice *(German)* 3—42377
signature analyser, principles and operation *(German)* 3—42378
signature analysis, formal description language for binary vectors 3—26957
signature analysis, instruments for microprocessor-based product troubleshooting in field service 3—42416
signature analysis, test point reduction using personality card 3—24041
signature analysis apparatus, logic gate delay reduction technique for high speed operation 3—42415
signature analysis based automatic tester 3—24062
signature analysis for disc controller testing 3—24039
signature analysis testing of microprocessor based products 3—24040
signature analysis testing on-card ROM 3—24042
signature verification techniques in digital systems 3—30346
single output built-in self checking circuits for equilibrium codes, design methods 3—24023
SLF 1 tester for TTL ICs, based on SPU 800 *(Slovak)* 3—30367
software-performance anal. for microprocessor-based designs 3—27877
stuck faults, distinguishing between two 3—24035
stuck-at fault test set generation methods 3—30327
subscripted D-algorithm, measured performance of programmed implementation 3—42407
Tektronix 1240 logic analyser, dual-time working aids fault finding *(German)* 3—24055
Tektronix 1240 logic analyser, ergonomic design 3—34145
Tektronix 1240 logic analyser *(German)* 3—30336
Tektronix 1240 logic analyser *(German)* 3—30356
Tektronix 1240 logic analyzer 3—27133

logic testing continued
test instruments and analysers, product review 3—30337
test-point sampling method 3—24037
three-state device and circuit testing 3—34116
three-state logic driver testing using single-pass 3—38278
timing sampling for determination of logic delay 3—24043
totally self checking checkers for m-out-of-n codes, modular design 3—38299
totally self-checking checkers for in-out-of-n codes, 3-level realisation 3—38302
totally self-checking checkers for m-out-of-n codes, design methods 3—38300
totally self-checking comparators with arbitrary number of inputs 3—38301
tri-state bus failure location, time-triggered current probe and signature analysis technique 3—42393
TTL logic tester, op-amp circuit with LED indicators, circuit design 3—27130
ULA testing at manufacturing and end user stages, low-cost approach 3—27140
VLSI and logic circuits testing, algorithm for design for test rules checking 3—42406
VLSI bipolar MTL memory array, inverter chain test structure for yield improvement and projection 3—27138
VLSI design and testing, coming generation tools 3—34136
VLSI designs, table generator test generation algorithm for logic structs. 3—30365
VLSI dynamic RAMs, electron beam testing 3—24202
VLSI easily-testable array multipliers 3—38292
VLSI logic simulator 3—34144
Walsh coefficients, verification in high logic testing 3—24033
Z80, bus data analysers, single step operation *(German)* 3—30278

logistics data processing
see also computerised materials handling
handling and storage technology, hierarchical classification of organisational logistics *(German)* 3—37400
Medical Readiness Assemblage Materiel System (MEDRAMS) 3—39791

long tailed pair *see differential amplifiers*

loop antennas
No entries

loss measurement
No entries

losses
see also eddy current losses; heat losses; magnetic leakage
750-330 kV transmission networks, quadrature voltage regulation, obs. 3—26576
control means for minimisation of losses in AC and DC motor drives 3—41744
determination of optimal electric network regimes 3—41715
hydraulic generator in multigenerator power system, protection and loss-of-field behaviour anal. *(Chinese)* 3—38721
new technique for optimal reactive-power allocation for loss minimisation in power systems 3—35806
optimal voltage profiles in transmission networks taking into account the phenomenon of corona 3—26580
power selection for controlled static compensators in 1000 V industrial mains *(Russian)* 3—23440
power system network, power loss, conjugate gradient *(Russian)* 3—40366

Blissymbolics and synthetic speech 3—42942
blood glucose concentration regulation, adaptive control system *(Japanese)* 3—37079
blood P_{50}, computer algorithm to calc. from single sample 3—28487
blood pressure, ambulatory long-term recordings, anal. 3—40292
brachytherapy planning, fundamental approach to dose-rate calc. program design 3—31752
Braille transcription modelling and computer appls. 3—36237
Braille word processing using Apple and VersaBraille terminal 3—40188
broadband coaxial cable image viewing and processing for radiology 3—43693
C2: a data base management system developed for the coronary artery surgery study (CASS) and other clinical studies 3—43675
calculator program to determine heparin requirements during hemodialysis in FORTRAN 3—43650
calculator programs to deal with non-steady state, multiple dosage regimen clincial pharmacokinetics 3—40154
cancer cell search by computer *(Swedish)* 3—31768
cancer registry, use of computer 3—43394
cardiac arrhythmias, complex, microcomputer-based multichannel data acquisition system for study 3—40235
cardiac arrhythmias identification, digital analysis of RR intervals 3—28490
cardiac catheterisation, DAMARS database management and reporting system use 3—43677

medical computing continued
cardiac data and images, simple inexpensive microprocessor based video digitisation 3—40294
cardiac electrophysiology, computerised anal. system 3—40252
cardiac electrophysiology studies, computer anal. using digitiser and interactive VDU 3—43652
cardiac functions, nuclear imaging system, real-time study 3—40266
cardiac images, noninvasive, inherent and contingent information content 3—40239
cardiac surgical intensive care unit, bedside activity sampling study, computer technology appl. 3—40276
cardiac time-dependent changes monitoring using sequential CT, computer technique 3—31751
cardiac transmembrane action potentials anal. with parallel microprocessors 3—40258
cardiac US Doppler spectral data, real-time acquisition and offline quantitative anal. 3—40299
cardio-respiratory rhythms monitoring system, CARRES, sudden infant death syndrome study appl. *(French)* 3—40164
cardiology, cell automation algorithm for region consolidation and edge detection on sector scans 3—40288
cardiology, compound sector scan echocardiography using a sub-probe of same frequency 3—40272
cardiology, left ventricular 2-D echocardiograms, automated computer enhancement and anal. 3—40287
cardiology, stress/redistribution Tl-201 scintigrams, improved quantitation and evaluation of normal limits 3—40269
cardiology, wall motion anal. algorithms, end-systole data smoothing and determ. 3—40290
cardiology appls., conf., Seattle, WA, USA (Oct. '82) 3—40214
cardiovascular analog data, data management system for collection and anal. 3—39807
cardiovascular data, tools and techniques for 4-D processing 3—40260
cardiovascular fluoroscopy, digital, low cost system for CAA techniques development 3—40306
cat, mathematical approach for functional electrical stimulation 3—32941
catheter laboratory system, microcomputer based, for human coronary blood flow anal. 3—35735
cervical cell classification, colour images in biomedical image processing 3—40166
chest radiographs, automatic rib detection 3—43658
Chinese Information on Medicinal Materials Computerisation Project 3—43676
chronic diseases monitoring system, involved parameters determ. 3—43667
clinical electrophysiology studies, HIS-bundle electrogram interpretation system appl. 3—40309
clinical laboratory hazards for computer-based instruments 3—40174
clinical laboratory system 3—39798
clinical research, data sets network structuring for patient data anal. from multiple sources. 3—39808
clinical simulations, computerised, in health science teaching 3—31773
clinical trial management system for support of cardiovascular research 3—40244
cognitive disability, graphic communication environment for retraining 3—28508
compression of dynamic studies, computer program 3—31762
computer systems creating 3-D models for medical research 3—43657
computer-aided measurement of transverse axon sections for morphology studies 3—35721
computerised tomography-aided neurosurgery, using graphics and interactive stereotactic system 3—43627
conditional rule structure usage to automate clinical decision support 3—43638
coronary angiographic reporting, computerised system 3—43635
coronary arteries, models, evaluation from angiograms, qualitative and quantitative experimental studies 3—40247
coronary artery bypass graft surgery patients, effect of early patency on long term morbidity 3—40300
coronary artery risk evaluation 3—40179
coronary artery surgery DBMS, C2 3—43674
coronary care, interactive system for on-line planning and anti-arrhythmic therapy delivery 3—40277
coronary stenosis, quantitative computer-based videodensitometry and physiological significance 3—40249
coronary stenosis determ. by video densitometry, influence of point spread functions 3—40251
cross-products factor analysis using P-stat, BMDP, and SPSS 3—43647
CT image archival, data compression techniques 3—43689
CT image processing system 3—25263
data-fitting to pharmacokinetic functions, computer program 3—28488
decision-making, consistency vs. completeness in surgery, computerised logic anal. 3—35737
defective patient care system potential liability 3—40144
deformed radiographic images, computerised system for elastic matching to idealised atlas images 3—40141
diagnosis teaching, confidence testing, scoring algorithm 3—32095
diagnostic cardiology, computer assisted pattern recognition 3—40284
diagnostic technology, future for digital devices 3—31771
diagnostic/patient management system for isolated environments 3—43392
differential diagnosis, computer-aided, design and testing of new approach 3—43668
digigal nuclear medicine department, data retrieval from mag. disc based archive store 3—40209
digital cardiac angiography, image acquisition and storage capabilities eval. 3—43694
digital nuclear medicine system development 3—40210
digital picture analysis as an integral part of the information system for experimental oncopathology of the German Cancer Research Center 3—31777
disabled driver training simulator, based on Apple II 3—40790
disabled person's communication aids, using personal computers 3—40202
disabled person's man-machine interface, MOD keyboard emulator 3—40200
disabled person's nonvocal communication aid, proportionaly controlled 3—40197
disabled persons, computerised message system for rehabilitation 3—40500
disabled persons, vocational rehabilitation, special man-machine interfaces 3—40199
display and image manipulation node, implementation 3—43691
doctors database network 3—25256

medical computing continued
  dog, context-sensitive approach to long-term ECG arrhythmia analysis 3−40308
  dosimetric irradiation planning, input of graphic and alphanumeric data into a computer *(Russian)* 3−31750
  Drexon optical storage for digital picture archiving applications 3−38571
  drug induced disability, computer aided measurement 3−35740
  drug interaction checking system, evaluation 3−40155
  drug therapy response simulation for pharmacy students 3−28511
  dysphonic quadriplegics, microcomputer-based communication system 3−40203
  dysrhythmia findings reproducibility by centralised laboratory within major multicentre trial 3−40221
  ECG, automatic trace anal., computer system *(Italian)* 3−31783
  ECG, fast Walsh transform data-compression algorithm 3−31782
  ECG, Holter tape anal., multiprocessor system use 3−40280
  ECG, QRST and P waves, comparative study of meas. precision 3−40261
  ECG, quantitative, common standards, CSE project phase one 3−40223
  ECG anal. program, 2-lead, development and evaluation 3−40219
  ECG classification by means of the Cardiac Infarction Injury Score 3−40264
  ECG detection and processing for noisy data 3−28472
  ECG meas. of P-wave, manual vs. computerised, left atrial enlargement diagnosis 3−40265
  ECG recordings, 24 hour, prescanning for normal sinus rhythm selection using Markov chains 3−40220
  ECG recordings, long-term, QT interval meas., automatic Holter anal. system appl. 3−40303
  ECG services evaluation, automated services 3−40225
  ECG waveform processing, expanded frequency-domain, integration into new versions of Argus/2H program 3−40246
  ECGs, accelerated playback, preprocessor for on-line data reduction 3−25261
  echo database use for teaching, research and laboratory management 3−39809
  echocardiograms, 2-D, anal. using time-varying image approach 3−40285
  echocardiograms, 2-D, automated endocardial definition, edge detectors and thresholding techniques comparison 3−40286
  echocardiograms, 2-D, mitral valve tracking of directly digitised echocardiograms 3−40273
  echocardiographic images, real time acquisition, processing and display system 3−40296
  EEGs, abnormal, automated anal., review 3−31769
  electronic document storage and retrieval program prototype for medical literature 3−39991
  environmental health data plotting program 3−28489
  enzyme kinetic data, statistical analysis, using MIR program 3−43644
  epicardial maps, method for computerised display 3−31781
  epidemiological study, BONNER-IBM and MARQUETTE programs performance 3−40222
  epidemiology, case-control studies, stratified data anal., FORTRAN program description 3−28475
  error prevention in computerised statistical analysis 3−31779
  exercise ECG, real-time signal processing 3−40502
  expert systems in medicine 3−28509
  fibre optic picture archival and communication system, development and experience 3−40212
  fibrillation recognition using autocorrelation analysis 3−40302
  fluorography, digital, image degradations and restoration 3−40238
  foetuses, electronic monitoring by microcomputer 3−31774
  foot pressure, dynamic studies, microprocessor-based image processing system 3−40162
  gamma-beam therapy, computer-assisted complex, software and hardware *(Russian)* 3−35715
  gamma-camera distortion corrector using programmable on-line microcomputer 3−37862
  gamma-ray therapy, dosimetric parameters calc. using an EC 1010 computer *(Russian)* 3−31749
  graphical displays in the clinical laboratory 3−28474
  handicapped persons, computer-based aids, conf., Charlottesville, VA, USA (Nov. 1982) 3−40185
  handicapped persons' aid, anticipatory text generation and device control system 3−40187
  handicapped persons' communication aid 3−40189
  handicapped users, human interfaces, study of head stick motion 3−40204
  handicapped users, man-machine interfacing strategies 3−40196
  health care, user defined computing 3−43403
  health computing around the world 3−28291

  microelectronics and teleinformatics in medicine *(Italian)* 3−28301
  MODUS data management subsystem and use in image database management subsystem 3−43686
  morphometric sampling, nested analysis of variance, program 3−43641
  motion, human, algorithms for anal. using 2-camera video 3−40146
  multi-dimensional treatment planning: beam's eye-view, back projection and projection through CT sections 3−35732
  multimicroprocessor system, 16 channel rapid data collection in medical environment *(Danish)* 3−28483
  multiple precordial ECG leads in high risk patients with coronary artery disease, on-line monitoring 3−40278
  myocardial infarction, 3-D graphic display of cardiac motion abnormalities 3−40291
  myocardial infarctions increase of coronary patients enrolled in physical training program, computer detection and community surveillance 3−40067
  myocardial perfusion, regional, gated digital radiographic technique for visualisation and quantitation 3−40241
  myocardial scintigraph, Tl-201, interpretation, computerised quantitative methods 3−35730
  neuromuscular jitter, analysis, using software specifically designed to measure single fibre EMG 3−43643
  neuromuscular junction, real time data acquisition and analysis, computer system, COMBO 3−43642
  NL-FIT, microcomputer program for nonlinear fitting in biomedicine 3−31757
  noninvasive blood flow anal., distributed processor appl. 3−43679
  nursing education, computer-aided learning assessment 3−32096
  occupational health monitoring at US Naval Weapons Centre 3−40180
  on-line analysis of neuromuscular bioelectric potentials 3−31753
  ORS morphology classification: quantitative evaluation of different strategies 3−40218
  oscilloscope screen pictures, improved evaluation *(German)* 3−43633
  PACBERG, blood sugar controlling by computer program 3−31754
  paediatric ECG, diagnostic criteria anal. on Japanese children 3−40263
  panorex radiographs, computer analysis 3−31764
  patient data preprocessing unit, Motorola 6800 based 3−40177
  pattern recognition, metaphase finding, in chromosone preparations 3−43645
  pharmacokinetics, program using Lagrange techniques used in pharmacokinetic analysis 3−43646
  pharmacology, computer-aided instruction, student performance effects 3−40644
  phasic blood flow in coronary arteries meas. digital X-ray image processing system 3−40250
  picture archiving and communication system, distrib. architecture for image acquisition analysis and archiving 3−43685
  picture archiving and communication system, image compression 3−43688
  picture archiving and communication systems, digital lightbox component 3−40207
  picture archiving and communication systems, introductory systems analysis considerations 3−43683
  picture archiving and communication systems for medical appls., conf., Kansas City, USA (May '83) 3−40206

medical computing continued
picture archiving and communications system prototype 3−40211
plasma clearance estimation following loading dose and intravenous infusion, calculator program 3−31755
precordial electrocardiographic map using the IBM-Bonner program 3−31763
prediction of multiple-dose blood level curves of drugs 3−40153
programming discipline for laboratory computing, review 3−31770
protein mapping, analysis and cataloguing by computer 3−43649
proton therapy of the eye, planning 3−31780
psychological impact of computer technology on hospital personnel 3−22718
PUFF, expert system for pulmonary function data interpretation 3−35716
pulmonary function analyser for hospital admissions, microprocessor-based 3−43411
QRS detection algorithm for arrhythmia monitoring 3−35720
radiation therapy dose planning systems, CT based, user requirements 3−43640
radioimmunoassay data anal. pack, in TRS-80 BASIC 3−28476
radioimmunoassay data analysis and appl., simple calculator programs 3−40159
radionuclide ventriculography accuracy, left ventricular ejection fraction analysis 3−35718
Rapimax urine teststrip analyser for Rapignost teststrip *(Japanese)* 3−43631
rationuclide ventriculography, regional function anal., physiological signal, scintillation noise and regional size 3−40270
record linkage, operational approach 3−31778
regional left ventricular wall motion, change anal. in serial studies, centreline method appl. 3−40228
rehabilitative biomechanics, computer uses 3−35741
renal function estimation using radioisotope renogram 3−35717
rest/exercise left ventricular function, comprehensive anal. from radionuclide ventriculograms 3−40231
revising ranked probabilities of disease, Bayesian approach 3−41363
robotic aid, microcomputer controlled manipulator for severely disabled person, development and operation 3−37906
scintigrams, computer processing to reveal foci of abnormal accumulation of radiopharmaceuticals *(Russian)* 3−25255
SEEK pattern recognition language, medical signal processing applications 3−41226
SER-I: the semantic EEG evaluation regimen 3−28486
sockets for artificial legs for amputees, computer-aided design 3−40145
SPBS programs for nonparametric tests in biological science 3−31758
speech handicaps, Apple microcomputer as communication aid 3−40191
speech handicaps, virtual Bliss symbolic display for communications aid 3−40195
speech-handicapped persons' communication aids, drawbacks 3−40192
speech-impaired persons' programmable communicator 3−40190
stability prediction using the Arrhenius model 3−31760
stationary card optical digital storage system 3−38572
stepwise-control concept for the ray therapy of tumors 3−37904
system sciences, conf., Honolulu, HI, USA (1982) 3−39067
systems sciences, conf., Hawaii, USA (Jan. 1983) 3−39074
talking terminal for blind, using rule-based speech synthesis 3−39056
text reading computers for translation and uses for blind people *(German)* 3−42834
three-dimensional data processing and display, conf., San Diego, CA, USA (Aug. 1982) 3−34318
three-dimensional image data, display and analysis requirements, review 3−43690
three-dimensional space-filling image processing 3−35007
TIBIAS, computer-aided analysis system for isoelectric focusing and electrophoretic patterns 3−40156
tomographic data processing, digital perspective correction for cylindrical holographic stereograms 3−34319
tomographic images, digital holographic display 3−35725
tomography, cone beam convolution formula 3−28477
torso model, three-dimensional modifiable computer body model and its applications in cardiology 3−40232
tracheal breath sounds anal., automated apnoea detect. 3−40163
TRIMIS computer support for clinical and ancillary support areas 3−39794
tumour growth and treatment, three dimensional simulation 3−31784
US echo signals processing in medical diagnostics and biological research, review *(Italian)* 3−31767
US Navy Trauma Score assessment testing 3−39813
vectorcardiographic anal., automated, inexpensive microprocessor appl. 3−40293
ventricular arrhythmias following myocardial invasive determ. of severity and mechanism 3−40236
ventricular arrhythmias in patients, ongoing database development 3−40066
ventricular contraction during induced rapid tachycardias, 2-D echocardiography, computer-assisted pattern evaluation 3−40274
ventricular fibrillation, apparent repetition frequency 3−40256
ventricular fibrillation recognition, other rhythms and noise in patients developing sudden cardiac death syndrome 3−40255
ventricular function, regional, quantification with vector Fourier anal. of gated images 3−40268
ventricular imaging, 3-D, computer generated from 2-D ultrasonic scans 3−40216
ventricular model, inverse problem for locating small-sized infarct area by rotational placing of set of limited numbered dipoles 3−40234
ventricular wall motion, temporal evaluation from digitised contrast ventriculography 3−40289
visual handicaps, large print reading/writing system 3−40194
water pollution databases, biomedical questions 3−40017
wheelchair controller, programmable digital device 3−37767
XECG, beat-to-beat anal. of waveshape and rhythm using inner vector product hardware 3−40279

medical diagnosis *see patient diagnosis*

medical diagnostic computing

time varying continuous processes, control possibilities *(German)* 3—26626
time-optimal control system with d.c. motor and with disturbance being a time harmonic function *(Polish)* 3—26381
time-optimal system for controlling high-order systems with bounded phase coordinates, synthesis 3—23173
tobacco curing system, modelling and fuel optimisation 3—29935
traffic signals, network capacity maximization *(Japanese)* 3—23649
tunnel kilns for porcelain baking, optimal feedforward control *(German)* 3—37732
Turnpike properties of optimal trajectories in the stationary problem of continuous optimization *(Russian)* 3—41448
two arm manipulator, time optimal hierarchical control system with adaptive on-off control 3—33458
two layer control systems, implementation of repetitive dynamic optimisation 3—29538
two-channel control system for asynchronous drives of hoisting/transport installations in mines *(Russian)* 3—23338
two-level optimal stabilization in multi-machine power systems 3—26579
two-link manipulator, optimal rectilinear moving of load 3—23815
two-step, of partially observed stochastic process *(Russian)* 3—29537
unconstrained continuous problems, procedure for obtaining quasiNewton method from conjugate directions method 3—37215
unstable distributed parameter systems, singular perturbation result *(French)* 3—37294
unstable distributed parameter systems appl. 3—33071
utilizing local functionals to optimize power system control 3—41714
valves for pumped systems 3—37381
vampires, optimal blood consumption, convex-concave utility function 3—23046
variance constrained self-tuning control 3—37266
vector-valued measure, optimal control of linear systems 3—37207
voltage-driven stepping motor, optimal control 3—33004
water distribution network self-tuning control 3—23333
water pumping plants optimal control 3—29741
water quality control problem, hierarchical approach 3—41641
water reservoir cascade, stochastic optimal control 3—23330
water supply, hierarchical control, discrete regulator appl. *(German)* 3—29684
water supply system, optimisation, and identification of weighting factors *(Japanese)* 3—41640
weakest conditions for existence of Lipschitz continuous Krotov functions in optimal control theory 3—26378
well-posedness and bang-bang principle 3—37312

optimal systems
automatic voltage regulators, first order lag-type, optimum gain 3—33284
linear systems with lag, synthesis method 3—33001
linear-quadratic-Gaussian systems, optimal adaptive control 3—26377
load flow program extension to tap-changing and reactive power limitation 3—23476
microinstruction characterisation as destructible flow in controlled graphs 3—27037
time-optimal system for controlling high-order systems with bounded phase coordinates, synthesis 3—23173

optimisation
see also mathematical programming; minimax techniques; minimisation
Φ conjugation and nonconvex optimisation 3—26115
acyclic multiperiod production systems, optimal lot sizing 3—26297
adaptive filters, optimality in the choice of the convergence factor for adaptive algorithms 3—38431
aircraft, adaptive flutter suppression as complement to LQG based control 3—41947

optimisation continued

ARMA parameters, optimum estimation method *(Japanese)* 3—22942
assignment problem, implementation and testing of primal-dual algorithm 3—36900
ATE support optimisation, for REMUS German military project *(French)* 3—25048
automatic optimization of oscillations in a vibratory system 3—29595
bang-bang principles, characterisation 3—29592
basis of equivalence classes of paths in optimization problems 3—29167
best choice problem when number of observations is random 3—29381
bi-weighted binary trees, optimum ordered 3—41061
binocular vision, global optimisation 3—41241
block decomposition algorithm for time-invariant systems using the generalized matrix sign function 3—41467
calculator programming, optimisation of algorithms 3—27046
capacity expansion decision problem 3—23065
central principle of science: optimization 3—22876
chance constrained scheduling, appl. of Balut's algorithm and NP completeness 3—29460
chemical plant, integrated system optimisation and parameter estimation 3—23631
circuit design and optimisation, SPROS set of computer programs 3—35879
circuits analysis and optimisation program, LCP-2 3—40437
closed loop adaptive system, locally optimal control 3—33043
closed queueing networks, optimal routing 3—30832
cluster anal., splitting algorithm appl. *(Chinese)* 3—22967
combinatorial optimization with rational objective functions: a communication 3—36617
combined replacement models 3—32599
communication networks, optimal cost/reliability allocation 3—38883
communication satellite transponders optimisation by digital simulation *(German)* 3—35960
competitive oligopoly, stochastic cost-volume-profit anal. 3—32853
complementary defectives, optimal detection 3—23027
computer network structure optimisation 3—38816
computer networks, path assignment for virtual circuit routing 3—30831
computer solution time improvements 3—32528
computer systems, optimal task handling 3—38065
computer-aided, hyperdominance mapping, resistance spread minimization 3—36634
computer-aided layout planning 3—25053
computerised pattern recognition 3—36774
conjugate gradient method, trust regions in large scale optimisation 3—32542
constrained optimisation algorithms extension from differentiable to nondifferentiable problems 3—26118
control system simplification, time-domain optimisation technique use 3—32987
control systems, interactive multicriteria optimal design 3—41425
conveyor-paced assembly line system, mathematical model 3—37002
cost of funds model for analysing corporate financial decisions 3—36976
criteria coordination problem in multi-stage optimisation, game theory approach 3—26063
customer allocation to alternative servers, individual versus social optimisation 3—41024
DACON computer-based design consultation system for assembly 3—37536
DC drives dimensioning and optimisation, using digital simulation *(German)* 3—35797
decentralized stochastic adaptive Nash games 3—29566
deisel-electric stations for combined heat/power generation, economic anal. and load capacity planning computer program *(German)* 3—40362
DELIGHT.SPICE, optimisation-based CAD system, IC design appl. 3—35935
design principles of controlled direct-search methods 3—32543
determination of optimal electric network regimes 3—41715
dialogue system for optimization, DISO 3—41441
digital filters CAD and telecommunications appl. *(Czech)* 3—31933
digital signal processing, algorithms and architectures 3—38475
direct method of variational calculus 3—32454
discrete and nondiscrete quasiconvexlike functions and single peakedness 3—36619
discrete multi-input multi-output linear dynamical systems, maximum likelihood estimation method *(Polish)* 3—23192
discrete resource allocation with nondecreasing return and cost functions 3—32807
distributed databases, optimisation of information allocation and user assignment 3—39464
distributed parameter systems, conf. Toulouse, France (June 1982) 3—33070
distributed parameter systems, optimisation of sensor and actuator locations 3—33066
distributed parameter systems, parameter identification approx., reduction of smoothness requirements 3—33080
domestic refrigeration units computer optimisation *(German)* 3—36031
dominance optimisation, methods and concepts 3—22881
doubly spread target, maximization of signal-to-interference ratio, nonlinear programming problems 3—36843
dual Pythagorean theorem, min. variance estimation interpretation, bad data detection appl. 3—29189
duopolists in growing industry, marketing and investment policies 3—41309
dynamic advertising model, deterministic and stochastic optimisation 3—29420
dynamic controlled object with multiparametric state constraints, optimal and quasioptimal algorithms 3—29528
economic lot sizing, learning effects 3—23101
economic model optimisation packages in USSR 3—41311
effect of the selection of input voltage and maximum operating flux density of different core material on the optimum design of switching power converter 3—31835
eigenvalue sensitivity method for optimal stabilisation of linear systems, comment and reply 3—23196
electrochemical treatment, cyclic process, automatic optimisation *(Russian)* 3—29866
electrochemical treatment, cyclic process, optimisation *(Russian)* 3—29865
electronic circuits parametric optimisation, effective algorithm for single-criterion problems solving 3—35874
empirical models, statistical analysis 3—22919

optimisation continued
enclosure, acoustic absorpt., computer-aided optimisation 3—36022
existence of a stochastic function consistent with the conditional likelihood relation 3—29168

extrapolation of first order iterative scheme, optimal solution 3—23841
fair division problems, guarantee structure 3—41395
finite Markov chain optimisation 3—41093
finite state partially observable Markov chain, optimal stopping problem 3—32488
flexible spacecraft, robust control 3—26756
floated gyroscope, float surface temperature identification 3—33709
FORTRAN subroutine for constrained optimisation, VMCWD 3—41107
freeway traffic, hierarchical control system 3—33514
fuel-limited vehicle routing, polynomially soluble and NP-complete problems 3—32904
fuzzy confidence intervals 3—32541
game trees, optimal search 3—36572
generalised multi-term lot size scheduling 3—41339
generalised Reed-Muller canonical form of p-valued logic functions, optimisation 3—33844
generalized convex functions 3—26111
global extremum of multi-variable function, calc. 3—22899
global optimization by controlled random search 3—36605
goal achievement, planning horizon investment model 3—36972
gradient projection algorithm for relaxation methods 3—29177
gripper, kinematic scheme for optimisation of force-geometric parameters *(Bulgarian)* 3—42122
heat conduction process, self tuning control 3—33257
hereditary differential systems, linear quadratic optimal control, infinite dimensional Riccati equations and numerical approx. 3—23234
hierarchical robot control system synthesis *(Bulgarian)* 3—26870
high-efficiency induction motor design optimisation, open-loop computing procedure 3—25339
IC engine drive heat pump, up to 20 kW power range *(German)* 3—41693
IIR digital filters with finite wordlength coeffs., design optimisation *(Japanese)* 3—24116
in-plant handling, economic pallet size determ. 3—23089
incentive problems, Stackelberg solutions 3—36505
indirect adaptive regulator, computational algorithms and simulation results 3—41503
industrial simulation model, optimisation by means of quasi-parallel handling 3—40580
information theory approach to identification of static and dynamic systems 3—41180
inspection activities subject to errors, sequencing method 3—26294
interactive decision model for the optimal control of a system with multiple object functions *(German)* 3—22829
interconnection of local computer networks: modeling and optimization problems 3—38856
internal combustion engines 3—41905
intuitive checkpointing policies, optimality 3—41343
irrigation surface optimal levelling, linear programming model 3—36925
Ito's equation, deterministic optimal control, existence criterion *(Russian)* 3—23187
job shop dispatching, deterministic versus stochastic assumptions 3—41342
kinematically redundant manipulators, pseudoinverse control 3—23817
Kramer methodology in multi-criterial optimisation, Pareto optimal set identification 3—36587
L B L R(k) optimization and its algorithm *(Chinese)* 3—37968
large hydrothermal power system optimal generation scheduling 3—23469
large scale systems with dynamic interconnected subsystems, decentralised control 3—29545
large scale time delay systems, hierarchical control 3—37298
large systems, multilevel control, bounds on suboptimality 3—33021
large-scale dynamic systems optimising algorithms and programs *(Korean)* 3—41466
learning algorithms, optimality 3—30193
learning systems, discretization of variables *(Polish)* 3—29257
left ventricle, 3-D reconstruction from single plane silhouette, optimised cross-section 3—40242
linear, discrete time system, singular state estimation 3—37262
linear complementarity problem solution for tridiagonal Minkowski matrices 3—32531
linear dynamic objects identification, optimal testing signals determ. 3—23175
linear fractional vector maximisation problem, existence and duality 3—29370
linear interconnected infinite dimensional systems with discontinuous connections, optimisation 3—33026
linear multivariable identification using optimal instrumental variable method 3—37218
linear quadratic optimal control problem, solution by extended invariant imbedding 3—29533
linear quadratic robust control problems, dual optimisation procedure 3—32998
linear resources allocation to concave activities, finite algorithm with polynomial time bound 3—29371
linear systems, direct search optimisation for model reduction 3—37187
linear systems, extremal properties of ellipsoids and approximating attainability sets 3—26351
linear systems, operations that preserve total dual integrality 3—32498
linear systems with compensated computational delay, microprocessor control 3—33364
linear systems with impulsive action, periodic motion optimal control 3—26344
linear systems with integral control for time weighted quadratic performance index, optimisation 3—29501
linearly constrained optimisation, pseudo-Newton method 3—36625
LINSIM, a linear electrical network simulation and optimisation program 3—28617
load flow optimisation using random search *(German)* 3—23398
load flow optimisation using random search *(German)* 3—25298
loan-deposit relationship and optimal bank portfolio allocation 3—36967
local neighbourhood search method for combinatorial optimisation problems 3—36908
location on networks, exploiting tree network structure 3—29388
location problems, theoretical and practical approaches 3—23088
M/G/1 queue optimal entering rules for customer with wait option 3—22820
machine setup and tooling optimisation 3—29432

optimisation continued

array processors for scientific simulation including solution of PDEs 3—24101
best approximation of solutions to a class of elliptic partial differential equations 3—26927
bilinear distributed systems, positive and negative results on controllability 3—33108
boll weevil/cotton crop model, partial differential equation formulation 3—32832
C^1 rational interpolation over an arbitrary triangle 3—23838

partial differential equations continued
compressible flow, one-dimensional, flux splitting method for numerical simulation 3—43611
convex optimal control problem involving a class of linear hyperbolic systems 3—23176
correct derivation of acceleration parameter for hopscotch and checkerboard (P, Q)-cyclic relaxation schemes 3—33774
Crank-Gupta equation, Fourier-series solution 3—37949
curvilinear grid, solution of hyperbolic PDES 3—30152
density dependent cellular growth in an age structured colony 3—32923
distributed parameter systems, stabilisation by vibrational control 3—33085
distributed parameter systems described by elliptic equation, model error estimation 3—26134
distributed systems of parabolic type, identifiability of spatially varying and constant parameters 3—29583
drying process diffusion coefficient identification 3—41886
elliptic eqns., mixed numerical scheme 3—23877
EM waves, propagation in nonlinear medium, partial difference algorithms 3—35680
error estimate for the modified Newton method with applications to the solution of nonlinear, two-point boundary-value problems 3—23869
finite difference solutions of dispersive partial differential equations 3—33775
finite element methods, error anal. using mesh-dependent norms *(Chinese)* 3—26923
first biharmonic Dirichlet problem on rectangles 3—26933
first-order strong variation algorithm for optimal control problems involving hyperbolic systems 3—23177
fourth-order hyperbolic, boundary conditions 3—42175
GEM 2—a program package for elliptic partial differential equations 3—40092
group explicit methods for parabolic equations 3—42172
heat transfer analysis and design by computer 3—41670
Helmholtz equation, possible extensions of implicit capacitance matrix method software 3—25210
HYDRA, numerical anal. code 3—40326
hyperbolic eqns., error anal. for Laplace transform-finite element soln. 3—26929
hyperbolic problems with different time scales, difference approxs., reduced problem 3—26932
hyperbolic systems, first order, appl. of orthogonal collocation to simulation and control 3—41418
ICCG2, subprogram for linear asymmetric matrix solns. 3—42161
ICCG3, subprogram for linear asymmetric matrix solns. 3—42163
ILUCG2, subprogram for linear asymmetric matrix solns. 3—42160
ILUCG3, subprogram for linear asymmetric matrix solns. 3—42162
infinite dimensional systems coupled through boundaries, decentralised filtering 3—33027
instantaneous flow rate meas. through velocity profile estimation, discrete Kalman filter problem 3—23779
iterated defect correction, appl. to variational methods for elliptic boundary-value problems 3—26924
large-scale dynamic systems optimising algorithms and programs *(Korean)* 3—41466
linear dynamical systems in Hilbert spaces, identifiability 3—36664
linear interconnected infinite dimensional systems with discontinuous connections, optimisation 3—33026
McKendrick eqns., bifurcation of time-periodic solns. with appls. to population dynamics 3—32834
method-of-lines, disadvantages for computer soln. of initial-value problems 3—25205
MIMD multiprocessor system, private memories, parallel assembly and factorisation for finite element problems *(French, English)* 3—23864
motions of a partial differential equation 3—29100
moving finite elements in 2-D 3—23879
multi-valued combinational switching circuits, fault detection, partial derivative appl. 3—38023
multiparameter measurement of non-electrical quantities, computer analysis *(Polish)* 3—37371
multiprocessor algorithms development, parallel algorithms in numerical linear algebra 3—23853
nonlinear age-dependent population dynamics, mathematical approach 3—32829
nonlinear age-dependent population growth under harvesting 3—32827
nonlinear parabolic equations, stabilisation via feedback control 3—33083
numerical integration of partial differential equations using cubic splines 3—33771
one- and two-step time integration methods for nonlinear partial differential equations 3—23863
optimal control process described by elliptic eqn., difference approx. and regulation *(Russian)* 3—29527
parabolic equation general mixed problem solution using Galerkin method 3—32452
parabolic equations, finite element method, error estimation and adaptive approach 3—23872
parabolic equations, finite element method of lines, error determ. 3—23871
parabolic equations, hybrid solution 3—37952
parabolic equations, solution on networks of microprocessors *(Russian)* 3—33768
parabolic equations in one space variable, maximum-norm stability and error estimates in Galerkin methods 3—42180
parallel computation, problem decomposition 3—23882
parasite population dynamics, nonlinear hyperbolic partial differential eqns. 3—32924
potential-type equations, numerical treatment 3—26934
QUIET: a reduced noise finite element model for tidal circulation 3—35745
regularity of local mesh refinement 3—23880
rotary kiln unit dynamical properties, simplified mathematical model 3—37733
satellite quasi-inertial attitude control 3—26749
semilinear parabolic differential equations, weakly coupled systems, positivity and asymptotic behaviour of weakly coupled systems 3—22911
software for elliptic boundary-value problems, survey 3—25209
software performance, effect of machines and compilers 3—25208
solar pond wind-mixed layer model for predicting transient salinity and temperature profiles 3—40584
solution on parallel MIMD computer 3—24102
some nonlinear differential equations in the hyperbolic plane 3—29101

  speech and music generation using popular microcomputers 3—32107
  speech synthesis, Alphasynthe program, in 6502 assembly language *(French)* 3—32116
  speech synthesis chip, English accent for BBC microcomputer 3—34869
  speech synthesis on micrompuţers, book 3—34874
  speech synthesis software, software comparison 3—31023
  speech synthesis/recognition, using microcomputer signal processing 3—27822
  speed-up program, for ZX-81 BASIC, Slow mode 3—40770
  spelling checker, BASIC program for Micromation computer 3—36200
  spelling game program, Mystery Spell, in BASIC 3—43977
  SpellStar bug fixing 3—25700

personal computing continued
spirographic designs, BASIC program, listing for VIC-20 3−32147
spreadsheet program, Formcalc appl. to time series anal. 3−39738
spreadsheet program, TK!Solver, user test 3−40777
spreadsheet programs, evaluation and comparison 3−28241
spreadsheet software, ECalc, for Epson HX-20 portable micro 3−39737
sprite editor, BASIC listing for Commodore 64 3−36203
sprite editor, BASIC program for Commodore 64, listing 3−36227
sprite editor for TI in BASIC 3−43993
Star Trek, BASIC adventure game, BBC micro, listing 3−40761
Star Wars game program, ZX Spectrum BASIC 3−40764
structured BASIC listing, for TI 99/4A 3−32142
Super-80, circuit modification for inverse video characters and graphics 3−24131
Supermon, machine language monitor for CBM, user queries 3−31285
T/Maker II, CP/M table-setter 3−43281
Tandy Model 100, review 3−40700
Tank Commander, BASIC arcade-type game for Heath H89 micro 3−36205
TCON: the Apple Writer processes programs 3−28883
technology student usage of personal computers in USA 3−36224
telecomputing appls. to games 3−40705
television artifacting from Atari micros, BASIC routines 3−40745
Texas Instruments CC-40 portable notebook computer 3−36442
Texnet, information service for TI 99/4 users 3−28367
text processor for the Commodore 64 in BASIC 3−43282
textual games programming techniques 3−43999
The Works, CP/M conversion kit for TRS-80 3−35195
Thomas Brandt TO7 have computer with light pen *(German)* 3−38612
three dice game, 421, BASIC program *(French)* 3−32121
three short utilities for the Osborne 1 3−25712
TI99/4a games review 3−25764
TI 99/4A, programming, DATA, READ and RESTORE 3−43958
TI 99/4A home computer, adding a printer 3−32129
TI 99/4A home computer, user review 3−26015
TI BASIC, subscripted variables 3−43986
TI BASIC one-liners 3−28888
TI Cadette: computer aided design in BASIC 3−43989
TI CC40 pocket computer *(German)* 3−38610
TI compact computer type 40, battery driven, characts. *(German)* 3−42600
TI-99/2 home computer, peripheral equipment, architecture *(German)* 3−30665
Time Trial Run, racing car game in Atari BASIC 3−36218
Timex/Sinclair: Making Change in BASIC 3−43991
Timex/Sinclair ZX-81 Wobble problem solution 3−43947
timing programs, Atari BASIC, using internal counters 3−32148
Torch, small business microcomputer, first impressions 3−22806
touch typing, instructional computer programs review 3−25696
translating programs into TI BASIC 3−32139
troubleshooting programs 3−43957
TRS-80, cassette-to-disk software conversion, assembly language routine 3−35142
TRS-80 Color Computer, interfacing to Atari-type joystick 3−40691
TRS-80 Color Computer, printer connection 3−32130
TRS-80 colour computer interfaces 3−27519
TRS-80 micro, theft prevention, BASIC program and peripherals 3−28863
TS 1000 screen display improvement 3−25704
Turtle Graphics II, language for Commodore 64 3−31186
turtle graphics routines in FORTH and BBC BASIC 3−44009
TV graphics character generator program, TRS-80 BASIC listing 3−36188
TV modification circuit for home computer use, direct video input 3−44012
TV sound modulator, FM circuit technique for computer, audio signal transfer 3−27761
typing teacher program 3−25715
typing tutor programs 3−40704
UCSD Pascal directory, for Apple diskettes 3−36185
ULTRASORT for Commodore in BASIC 3−43981
UNNEW, utility program for VIC and Commodore 64, listings 3−32144
user friendly Basic commands for the VIC-20 3−24660
user-accessible data communications 3−40781
USR function, in Commodore BASIC 3−40746
utility machine code program, VIC-20 and Commodore 64, for screen POKES and PEEKS 3−40731
utility routine, for uncompacting PET BASIC, program listing 3−40737
utility software, for Apple VisiCalc with joystick, user review 3−39715
variable sorting in BASIC and machine code 3−32167
VECTREX video game system 3−40703
VIC, expanded, utility programs for running unexpanded programs, BASIC listings 3−31112
VIC 20, programmable characters 3−24550
VIC 20 arcade games survey 3−28854
Vic 20 peripheral interfacing, serial user port considerations 3−27517
VIC 20 Snake program in BASIC 3−25741
Vic 20 sound program in BASIC 3−32163
VIC 20 variables 3−25750
VIC File Case 3−28879
VIC Kaleidoscope in BASIC 3−25736
VIC PILOT language program 3−43980
VIC Player, simulated organ for VIC-20, BASIC listing 3−36187
VIC variable time data acquisition 3−28886
VIC-20, high-resolution screen control 3−43970
VIC-20 cassette interface, using comparator and invertor ICs 3−38745
VIC-20 graphics resolution improvement programs in BASIC and machine code *(German)* 3−24616
VIC-20 home computer, disassembler, BASIC listing 3−36210
VIC-20 home computer, games software, survey 3−36206
VIC-20 interfacing to MX-80 printer 3−25687
VIC-20 video, small character set uses 3−32149
VICSTATION: a paperless office in BASIC 3−28876
VICword, typing time-saver utility 3−25722
video disc and personal computer interfacing 3−38766
video display processor IC for personal computers, low-cost colour terminals 3−34073
Video Technology VZ 200 personal computer, user review 3−26014
Video Technology VZ-100 personal computer *(German)* 3−24238
videotex and personal computers 3−40699
viewdata service, Micronet 800, derivation and growth 3−39941

personal computing continued
Wang 16-bit personal computer 3−30676
Wang-PC personal computer *(German)* 3−42573
war game, Pursuit of the Graf Spee, software evaluation, for Apple II 3−40712
waveform generator/display, Atari BASIC program 3−32124
weather forecasting program, BASIC listing for Spectrum, Microsoft, CBM, Apple, Tandy 3−43950
wideband coaxial cable interactive personal computing services 3−40782
Winchester disc, Gallium 10 selection 6809 driver for OS9 3−27805
Winchester disk for all personal computers *(German)* 3−42519
wolf, goat and cabbage problem, BASIC program for ZX81 *(French)* 3−32119
word handling game, Word Detective, BASIC listing 3−40694
word processing, low cost possibilities using TRS-80 3−28180
word processing, Magic Window data disk initialization routines, Apple BASIC 3−36199
word processing, software survey, for home computers 3−32168
word processing on the Spectrum, software packages review 3−28203
word processing packages for IBM PC, software review 3−39606
word processing program, Dragon 32 BASIC listing 3−36219
word processing programs for school and home 3−32136
word processors and microcomputers, convergent evolution 3−34507
WordStar customising on Osborne 3−39654
WordStar modification for Epson printer 3−24915
Z-Term The Professional, communications software for Apple II, user review 3−27531
ZX80/81 memory expansion, using 2114 memory chips 3−38746

PERT
see also project engineering
BASIC program for micro 3−31546

PERT continued
- colour graphics for military appl., planning using PERT and transportation models 3—43421
- concentration of function appl. 3—36899
- DP project evaluation 3—36248
- project planning, use of PERT techniques 3—22720
- stochastic networks simulation, efficiency of antithetic variate method 3—29383

perturbation techniques
- *see also control system analysis; control system synthesis*
- composite feedback control of nonlinear singularly perturbed systems 3—41460
- decentralised nonlinear adaptive feedback stabilisation of large-scale interconnected systems 3—23200
- definite matrix-pair, perturbation bounds for eigenspaces 3—42165
- discrete systems, singularly perturbed, initial value problems via time scale decomposition 3—26407
- distributed parameter heat exchangers controlled by manipulation of flow rate, limit cycle stability 3—33249
- dynamical system longterm evolution by stroboscopic method, fast computation 3—26764
- filtered synchronous control systems and nonlinear renewal processes, algorithm for approx. solns. 3—41407
- Hamiltonian systems, quadratic analytical soln. algorithm, computer implementation 3—25201
- high gain feedback control synthesis, theory of almost invariant subspaces 3—41428
- Hopf bifurcation points, small amplitude oscill., branches of periodic soln. analysis *(Japanese)* 3—22814
- impulse fixed cost in stochastic optimal control, hydropower system management appl. 3—23467
- interconnected distributed parameter systems, ϵ-coupling and singular perturbation approaches 3—33025
- large scale system control law design using aggregation and perturbation methods 3—26394
- linear dynamical systems, first-order perturbations, Lyapunov eqn. error bound 3—37175
- linear quadratic Gaussian estimation and control of singularly perturbed systems 3—41462
- linear systems, singular perturbation in Mayer's problem 3—37132
- linear systems with multiple time scales, multiparameter singular perturbations 3—37277
- model simplification using singular perturbation technique *(Korean)* 3—32959
- multivariable invertible systems, singular perturbation canonical form 3—33014
- nonlinear interconnected systems, weak connections, time scales, aggregation 3—37310
- nonlinear optimal control problems, singular perturbations approach 3—41458
- nonlinear optimal processes, relaxation and well-posedness 3—41546
- optimal control of perturbed Markov chains, multitime scale case 3—41463
- queueing network optimisation, perturbation analysis 3—41021
- queueing networks, infinitesimal and finite perturbation anal. 3—36642
- receding horizon controller, singular perturbation anal. 3—32954
- regular perturbations in optimal control 3—41461
- remote sensing, geometric correction of LANDSAT-type imagery using perturbation techniques 3—28525
- sampled system, transfer-function models, analysis using Pade approximants 3—23204
- self-adjusting optimum control system, performance 3—23184
- singular perturbation modelling of continuous and discrete physical systems 3—29546
- singular perturbations in nonlinear optimal control, introduction 3—41457
- singular perturbations in nonlinear systems and optimal control 3—41459
- singular perturbations in stable feedback control of distributed parameter systems 3—41543
- singular perturbations in systems and control, conf., Udine, Italy, 1982 3—41456
- singularly perturbed nonlinear eigenvalue problems, transition layers, angular limiting solns. and internal layers 3—41554
- singularly perturbed systems of diffusion type and feedback control 3—41544
- slow/fast decoupling, analytical and numerical aspects 3—42183
- team-optimal closed-loop Stackelberg strategies for systems with slow and fast modes 3—32969
- time invariant regulator, partial cheap control 3—29500
- trajectory control, state feedback gain design 3—41931
- unstable distributed parameter systems, singular perturbation result *(French)* 3—37294
- vector optimisation, duality in nonconvex problems 3—36631

petrol engines *see internal combustion engines*

petroleum industry

  lattice gauge theories, SU(N) and U(N), Monte Carlo simulation program 3—25219

physics computing continued
  lattice gauge theory, $SU(6)/Z_6$, computer program, Monte Carlo methods 3—28441
  Laue patterns, interpretation and simulation using interactive program 3—25230
  line spectra, computer program for decomp. 3—28443
  linear induction electron accelerators, particle simulations of collective effects 3—40120
  magnetic system simulation and digital dynamics 3—43614
  magnetostatic linear two-dimens. problem calc. using accurate scalar pot. finite element method 3—28454
  Malkus transitions in free convection detection by optical correl. computer 3—40138
  mapping, contour plotting, algorithm of directional derivatives 3—28424
  MARYLIE, Maryland Lie algebraic transport and tracking code 3—40121
  mass spectroscopy, isotope distrib. calcs. 3—40127
  materials, fracture criteria determ., automation 3—23802
  metal corrosion, computer analysis of electrochemical impedance data 3—43604
  metals, point defects, boundary conditions in computer simulations 3—31731
  microcomputer quantum mechanics, book 3—31746
  microtrons, three-dimensional field program 3—40124
  Mie scattering subroutines DBMIE and MIEV0, computational time comparison 3—40100
  model approximations in radiative heat-exchange calculations 3—40112
  molecular assoc., stable conformation 3—35686
  molecular dynamics simulation on parallel computer 3—40113
  molecular mechanics with an array processor 3—43610
  molecular orbitals, overlap integral calc., FORTRAN program 3—25218
  molecular vibration-rotation spectra, computer simulation *(Spanish)* 3—35707
  Mossbauer spectra, computer fit 3—28440
  multichannel analyser link system, data storage and communication system 3—37889
  multichannel analyser to micro-computer software interface for on-line data analysis 3—30081
  National Synchrotron Light Source, microprocessor techniques and construction 3—40116
  nuclear, standard interfaces for program-modular multiprocessor systems 3—24359
  nuclear reactions, DWBA calcs. of continuum spectra 3—35688
  nuclear structure calcs., NUCADA, FORTRAN program 3—25217
  nucleon-nucleon partial-wave anal. on interactive computer system 3—35708
  NUDENS, Nilsson-Bardeen-Cooper-Schrieffer code at finite nucl. temp. 3—35687
  optical surface computer-controlled polishing process modelling 3—40101
  optical system CAD *(Russian)* 3—25229
  optical system design, desktop computer use 3—35697
  optical system reference designs, computer archive compilation, general principles 3—25243
  oxides, gaseous, thermodynamic data, computer assessment 3—40114
  particle decomposition on collectors, stochastic modelling 3—25252
  phase diagrams and thermodynamics, computer coupling 3—28436
  photon correlator, microprocessor-based, low-cost 3—25239
  plasmas, spectrum line emission, calcs. using Fortran programs 3—43620
  polymer solutions, structure, scaling and modelling by computer simulation 3—43613
  powder diffr. patterns, indexing, use of extinctions in programs 3—25242
  programmable digital microcircuits—a survey with examples of use 3—42339
  radioactive atoms, production, probability rate determination, Monte Carlo methods 3—28442
  reduced Coulomb Green's functions and their partial waves, PASCAL program for calc. 3—35685
  room acoustical planning, computerised ray tracing 3—31988
  SCHAR space charge computer program for LAMPF H^+ beam line transport 3—40123
  sedimentation phenomenon in Brownian motion, digital simulation 3—28452
  SEURAT, algorithm for calculating neutral gas transport in toroidal plasmas 3—35681
  shell triangular element, doubly curved, inextensional bending calc. using FORTRAN computer program 3—28453
  single cryst. orientation, Laue patterns, computer plot programmes 3—35711
  solids, computer modelling, examples 3—25223
  special-purpose processor for Monte Carlo simulation of Ising spin systems 3—42608
  STELLA interlaboratory data communication system for high-energy physics 3—42812
  storage rings, computer simulation of single beam stability 3—40119
  strength testing, software for automatic loading controls 3—43618
  stress/strain diagram plotting by recalc. of computer diagram 3—43617
  Summer Computer Simulation Conference, Denver, CO, USA (July 1982) 3—24865
  SUPERFISH, RF cavity code for linear accelerators 3—40125
  TBCI and URMEL computer codes for wake field and cavity mode calcs. 3—40122
  teaching lab., data acquisition using microcomputers 3—36164
  telescope CAD, computing time reduction *(German)* 3—35700
  temperature distrib. in irregular 2D shapes, hybrid computer algorithm 3—25249
  thermophysical experiment automation, operating systems and interface control software *(Russian)* 3—40134
  thin lenses in geometrical optics: an interactive graphics program 3—43925
  three dimensional compressible flow, Navier-Stokes solution on CYBER-203 using pseudospectral technique 3—25248
  three-dimensional density distribs., stereographic representation 3—43619
  time resolved optical intensity profile meas. system, computer controlled 3—30093
  transonic gas flow in wind tunnels, multiprocessor modelling 3—25213
  transonic tridimensional potential flow, vectorised finite element method appl. *(French, English)* 3—25214
  transverse wakefield calcs. using computer program DBCI 3—40108
  turbulence, numerical simulation on mini-systems connected to processors *(French)* 3—43616

physics computing continued
  turbulence, numerical simulation on multiprocessor system *(French, English)* 3—25215
  two-component solns., dil., diffusion coeffs., TI-59 calculator program listing 3—25532
  two-electron repulsion integrals, computer program solution 3—35682
  voltage-current characts., demonstration with BBC microcomputer 3—32088
  wave propagation graphic display 3—35674
  X-ray analysis, post-correction method for automatic ZAF results improvement 3—35710
  $e^+e^- \rightarrow \mu^+\mu^-(\bar{q}q)$, radiative correction in Z_0 region 3—28444
  Ge detector, response study to electrons and positrons, computer simulation 3—40105
  $^2H(^3He,\alpha)H$, computer program for reaction anal. 3—31725
  He liquefaction process, simulation on pocket computer 3—35712
  NaCl-type lattices, vacancy pair diffusion, correl. factors, computer simulation using Monte Carlo methods 3—31739

physiological models
  see also brain models; neurophysiology; physiology
  27 MHz hyperthermal treatment radiator, computer model 3—43665
  adaptive control loop model, human motion system *(German)* 3—29486
  arterial system, human, comparison of computer models for clinical data assessment 3—28496
  cardiac arrhythmias, mathematical model of conduction system to study mechanisms 3—37089
  cardiovascular system model validation, reduction and development 3—37081
  cardiovascular system modelling, methodology and model description 3—37080
  cell proliferation kinetics, adaptive identification of multicompartmental model 3—41379
  chromatic induction rel. to responses of neurophysiological double opponent units 3—26329
  cybernetic aspects of anthropophysics 3—26333
  encodrine-metabolic systems, complex, validation of math. models, glucose regulation appl. 3—29485
  erythroid disorders, study by meas. of ion-metabolism 3—41373
  feature extraction mechanism, neural network model, self-organizing network *(Japanese)* 3—41369
  glucose/insulin interactions, simple vs. comprehensive models 3—41382
  heart attack severity, identification of processes with uncertain meas. times *(German)* 3—23126
  heart-thorax acoustic system, computer model for study of left ventricular wall contributions 3—40297
  hormones related to basal metabolism in man, computer simulation for time course *(Japanese)* 3—40170
  human body models, biostereometric data processing in ERGODATA 3—43656
  kinetic theory of neural systems, two dimensional model, activity anal. 3—26327
  left ventricular dysfunction, relation between myocardial and haemodynamic power 3—37088
  luminosity channel of vertebrate cone retina, analogue simulation, freq. anal. 3—37069
  lung parameters, online estimation using multiple gas method 3—41388
  metabolic and endocrine systems, model formulation, identification, and validation 3—41380
  muscle innervation during development, selective stabilisation, mathematical models 3—37062
  myocardial infarct, creatine phosphokinase kinetics, math. model 3—41362
  network thermodynamic simulation of biological systems, overview 3—23138
  neuromuscular system ARMA models development 3—41384
  Parkinson patients, undamped natural freq. estimation of tremor and reflex response 3—41385
  renal countercurrent system model for duct convergence and pelvic urea recycling 3—32933
  renal dialysis, clinical model, relationship between system identification and model validation 3—41372
  respiratory mechanics and gas exchange, nonparametric modelling 3—41378
  respiratory system, human, mathematical and physical modelling, numerical approx. identification and space time model aggregation 3—32940
  spatial frequency sensitivity of bipolar cells 3—37073
  thyroid disease, mathematical model for interpretation of clinical measures 3—41381
  thyroid hormones dynamics of distribution and metabolism in blood and tissue pools 3—41383
  ventricular model, inverse problem for locating small-sized infarct area by rotational placing of set of limited numbered dipoles 3—40234
  vertebrate cone retina model, physiological correlates 3—37070
  vestibule-ocular reflex, mathematical model 3—41374

physiological optics *see vision*

physiology

computer usage in professional groups 3—22643
database administration 3—22737
DP as a career *(German)* 3—32321
DP labour market trends *(French)* 3—40875
dress management: applied nonverbal communication for career development 3—22746
ethical considerations and professional responsibility in the computer profession 3—28961
ethical dilemmas for computer professionals, privacy, power and property 3—36304
information careers in the office of the future 3—32283
information resource manager's role 3—36359
information science: the future of the profession in Africa *(French)* 3—31582
local government dependence on information technology 3—39754
New Zealand Computer Society, structure and professionalism 3—32191
open plan office implementation 3—40895
personal professional computing system selection 3—29074
prime ingredient: analysis 3—24565
selling information systems 3—25815
semiconductor industry career prospects for women engineers 3—36260
social and professional aspects of computing in a degree 3—32223
software engineering 3—40901

professional aspects continued
- TIS intelligent gateway computer, an alternative to the 'Doomsday scenario' 3—40000
- user relationships to DP specialists 3—36358

program and system documentation
- ASEA development and design programs and systems 3—40356
- ATE software development improvement 3—24744
- automated documentation for real-time software 3—27917
- automation software documentation *(German)* 3—42976
- avionics Computer-Aided Software Definition system *(French)* 3—32398
- AXES, system-definition language for computer document software 3—43069
- Commodore VIC machine language programming utility 3—42958
- composite anal. tree for documentation of program structure 3—39145
- COMPOSITOR, text-editing program for FORTRAN 66 OLYMPUS programs 3—24613
- computer aided software engineering, software documents 3—34966
- computer architecture documentation 3—34178
- computer documentation checklist 3—36396
- computer manuals, guidelines for browsing and skimming 3—34914
- database models, data diagram core identification *(Czech)* 3—31343
- DBMS for TRS-80, user's manual, user-oriented documentation 3—31063
- design languages vs. flowcharts 3—39092
- development documentation for software support 3—34973
- embedded software maintenance, military standards usability 3—32039
- evaluation by psychological techniques 3—39069
- FAD, (Feature Analysis Description), requirements analysis and documentation methodology 3—27904
- FORTH source screen documentation tool 3—24540
- FORTRAN application software, documenting and restructuring programs 3—24543
- function call hierarchy charting system 3—39146
- GENSIS, documentation and COMMON block generator, for OLYMPUS FORTRAN 66 3—24545
- high-level documentation packages 3—43070
- Intel Series IV microprocessor development system with program storage and documentation *(German)* 3—42476
- IRS design documentation, dialogue system for generation *(Russian)* 3—35626
- ITT project library computer assisted documentation 3—39102
- library reference guide design for software libraries 3—27871
- microcomputers, software classification *(German)* 3—31074
- military trainers, total system documentation using interactive graphics 3—35498
- MIS development in agricultural enterprise, with vertical integration of documentation and analysis *(Slovak)* 3—31553
- numerical control system, testing, IEEE standards appl. 3—35156
- OLYMPUS, FORTRAN 66 programs, notation/layout conventions 3—24544
- Petri networks theory appl. *(Czech)* 3—27894
- process control system software documentation 3—34935
- rapid prototyping 3—42981
- software development standards, appl. to software maintenance 3—32404
- software development standards, using progressive documentation 3—32402
- software manual writing techniques 3—27855
- software schematics, program concept documentation 3—27879
- specification methodology for digital switching system 3—24577
- standards and guidelines, for improved Federal software management 3—34898
- statistical analysis SPSS Batch System users' guide book 3—43596
- step-wise transforms., appl. to program documentation 3—43002
- structured techniques 3—39091
- student projects, software documentation 3—34979
- telemetry system design and development by structured programming 3—42033
- Wichita State University standard 3—25867
- writer's reflections on product design 3—40336

program assemblers
- Apple II assemblers 3—44008
- BASIC subroutine, appl. *(German)* 3—39345
- BBC micro's 6502 assembler 3—43107
- CM600 microprocessor, program system cross-assembler, general-purpose microcomputer appl. *(Bulgarian)* 3—24714
- compiler-descriptor language, appl. to real-time microcomputer programming *(Hungarian)* 3—28008
- construction, 'tool-kit' software, MACS 3—31239
- cross-system for microprogrammable microprocessor devices design based on MIC-68 modules *(Bulgarian)* 3—27240
- crossassembler for Mera 300 microcomputer using 8080 or 8085 microcomputer symbolic language *(Polish)* 3—35128
- Epson HX-20, assembler and disassembler in BASIC *(German)* 3—31229
- FORTH, high level strucure 3—39334
- generalised assembler architecture from Motorola Microsystems 3—24725
- HX-20, disassembler program in BASIC *(German)* 3—31222
- listing for CBM 8032, incl. disassembler, in BASIC/assembly language *(German)* 3—31227
- macroassembler for 6502, written in FORTH 3—39349
- macroassembler for 8080 microprocessors *(Polish)* 3—35129
- mathematical aspects *(Japanese)* 3—35124
- meta-assemblers 3—24707
- microcomputer code generation type SAB 8051 microprocessor assembler system *(German)* 3—35117
- microprocessor development systems, software and hardware *(German)* 3—30460
- microprocessor software debugging cross, system *(Russian)* 3—28027
- microprocessors, high-level languages, program assembler, interpreters and compilers, tutorial series *(Spanish)* 3—39352
- microprogramming of bit-slice processors, use of meta-assembler *(German)* 3—42433
- modular disassembler for the Z80, in BASIC *(French)* 3—31221
- MRE 80 system for the K1520 *(German)* 3—28009
- PET micro, macro assembler text editor, modifications for output 3—39389
- SM 600 microprocessor, cross assembler system using Linker and Simulator programs *(Bulgarian)* 3—35121
- SMAL, assembly language as object code 3—43054
- software development tools for 16-bit microcomputer systems *(Japanese)* 3—24720
- VIC-20 home computer, disassembler, BASIC listing 3—36210

program assemblers continued
- XASM cross assembler listing in FORTRAN 3—24711
- Z80 interpeter, debugger and disassembler 3—24719

program compilers
- Ada, mapping onto simple virtual machine, compiler interfaces for Z8000 3—28017
- Ada compiler, optimizing table driven code generator 3—28018
- Ada compiler preview, DOD Mil-Spec 1815/ANSI 1982 standard 3—24713
- Ada compilers, current developments 3—28006
- Ada software projects, case studies 3—28003
- advanced debugging 3—43146
- ALGOL 68 small computer implementation 3—39286
- alignment networks control, compiler with network control 3—27207
- APL compiler for the UNIX timesharing system 3—35119
- ATE compiler, loopable code enhancement 3—35122
- Augusta, Ada subset for micros, compiler, listing pt.IV 3—39340
- Augusta, Ada subset language, recursive descent compiler, listing 3—31225
- benchmark evaluation guidelines 3—32407
- bypassed LR(k) parsers, design and construction 3—35127
- C language, compilers CP/M-80, intercomparison 3—39336
- C language, compilers for CP/M-86, intercomparison 3—39335
- C language, compilers for IBM Personal Computer 3—39337
- C language, CP/M compilers rel. to Unix version 7 3—39338
- C-BASIC interpreter, learning tool for compiler construction 3—35134
- code generation language within code generator generator *(Chinese)* 3—24708
- code optimisation 3—43115
- compiler-descriptor language, appl. to real-time microcomputer programming *(Hungarian)* 3—28008
- computation model based on attribute grammar *(Japanese)* 3—30207
- computation reflections in common sub-expression elimination 3—31231
- context-free grammars, hierarchical parsing scheme 3—23918
- didactic languages, interpreter and translator design *(Spanish)* 3—39353
- DYMOS: a dynamic modification system 3—43155
- dynamic system simulation using Early Desire 3—27979
- error messages: the neglected area of the man/machine interface? 3—31226
- extended attributed grammars 3—30166
- fine-tuning a microcomputer for increased performance 3—44002
- flight control system, microprocessor-based, recent digital technology advancements and their impact 3—33567
- FORTH compiler, PolyForth, for IBM Personal Computer, review 3—39428
- FORTH discompiler 3—39350
- FORTH recursive decompiler 3—24712
- functional languages for Von Neumann machines 3—39356
- fundamental mistake in compiler design 3—24710
- generic operators, dynamic selection 3—24717
- global data flow analysis in ALDES 3—28012
- hardware assisted high level debugging 3—43147
- high level debugging, conf., Pacific Grove, CA, USA (March 1983) 3—43130
- high level language compilers for HP 64000 development system 3—24716
- high level language debugging with a compiler 3—43145
- high-level debugging assistance via optimizing compiler technology 3—43150
- high-level language oriented stack machine, realisation and evaluation of PASCAL machine *(Japanese)* 3—35130
- high-speed vector-processing, using MELCOM-COSMO 900II compiler *(Japanese)* 3—42611
- higher-order language simplification for high-integrity systems 3—32027
- input-output tools: a language facility for interactive and real-time systems 3—31233
- instruction set for 8086 chip 3—39332
- intermediate language X-code for language portability *(Chinese)* 3—35110
- layout compiler for NMOS static array-multipliers 3—34161
- LH 001, for A100 computer *(Slovak)* 3—43112
- LL(1) analysers for flexible dialogue systems, generation 3—42208
- local area network, compiler server node 3—38877
- macroassembler for 8080 microprocessors *(Polish)* 3—35129
- magic numbers, compiler code generation 3—31223
- MC68000 address modes and instruction set for high-level language, implementation 3—38148
- microcode, automatic generation 3—39106
- microcomputer selection, importance of software *(German)* 3—29068
- microinstructions as image architecture, impact on software metrics 3—28015
- microprocessor development systems, software and hardware *(German)* 3—30460
- microprocessor software debugging cross, system *(Russian)* 3—28027
- microprocessors, high-level languages, program assembler, interpreters and compilers, tutorial series *(Spanish)* 3—39352
- NEPTUNIX, simulation package *(French)* 3—34957
- nonprocedural specifications compilation into programs 3—31234
- OPTIMA—a portable PCODE optimizer 3—28011
- optimising FORTRAN 77 compiler 3—39359
- optimization techniques of FORTRAN compilers *(Japanese)* 3—39348
- partial computation of programs *(Japanese)* 3—33899
- partial-differential-equation software performance, effect of machines and compilers 3—25208
- PASCAL, microcomputer implementation 3—27987
- PASCAL, small 3—24718
- performance comparison between an APL interpreter and compiler 3—35120
- Petal precompiler for the Commodore computer *(German)* 3—31228
- Petri net models for the evaluation of applicative programs based on λ-expressions 3—39346
- pipelined architectures, code optimisation techniques 3—28016
- postpass code optimization of pipeline constraints 3—39183
- program structuring preprocessor for macro assembly language 3—31240
- programmable logic 3—43795
- programming language issues in software systems conf. San Francisco, CA, USA (June 1983) 3—39290
- R-COBOL compiler for TESLA computers *(Czech)* 3—31235
- real-time compiler system 3—39341
- REDUCE 2 for CP/M 3—28052
- retention in coroutine environment 3—39386
- selection criteria 3—28007

program compilers continued
separate compilation and the development of large programs in CHILL 3−31214
Sinclair ZX-81, BASIC compiler 3−39342
Small-C compiler version 2.0, listing continuation 3−39339
software development, high level languages use for simplification 3−27875
software development and debugging processes automation using a programmable interface 8560 *(Italian)* 3−28032
static error checking with pointer variables *(Japanese)* 3−28014
straight line programs, code optimisation, algorithm, complexity for multi-register machines *(Japanese)* 3−27924
system compiler for hardware/software system design 3−39358
TeleSoft, Ada implementation 3−27984
throw away compiling, evaluation 3−24722
tools for maintaining consistency in large programs compiled in parts 3−31243
top-down parsing in compiler design, method to handle left-recursions 3−24723
translator writing tool packages, selection 3−24724
UCSD PASCAL, data abstractions and monitors 3−31200
vacancies in associative binary trees, semantic and syntactic manipulation 3−33894
Vaxima and Reduce facotirsation packages 3−28013
vector hardware, development, theory, application 3−42431
very long instruction word architectures, ELI-512 3−38677
VLSI signal processing using Si Compiler chip 3−30483
Si compiler for VLSI circuits specified by algorithms 3−42334

program correctness proving *see programming theory*

program debugging
see also program testing
3B20 field utilities for DMERT OS 3−24726
16-bit emulation, software debugging 3−35148
Ada programs, run-time debugging system 3−31265
APL functions, error trapping 3−31259
ATE programs transportability 3−25408
automated error search, feasibility *(Russian)* 3−27858
BDOS, Tracing through call 3−35144
Blit debugger 3−43154
chip committed software, on-chip ROM/off-chip RAM code systems, implementation and debugging 3−24072
Commodore VIC machine language programming utility 3−42958
concurrent language debugger 3−43141
concurrent programs, interactive debugging 3−43143
database model of debugging 3−43138
DELTA−the universal debugger for CP-6 3−43156
distributed DBMSs, test bed for logic subnetworks 3−39380
distributed system debugging, Event Definition Language 3−39384
distributed systems, debugging tool 3−28035
DYMOS: a dynamic modification system 3−43155
dynamic program modification 3−39103
Em-Pac, CP/M software for emulation and debugging 3−35158
error sensitive test strategies 3−43135
graphic support for software development, program visualisation 3−43159
hardware assisted high level debugging 3−43147
hardware support for program debuggers in a paged virtual memory 3−39366
high level debugger for control flow programs 3−43152
high level debugging, conf., Pacific Grove, CA, USA (March 1983) 3−43130
high level debugging of distributed systems 3−43142
high level language debugging with a compiler 3−43145
high-level debugger, general purpose 3−35154
high-level debugging assistance via optimizing compiler technology 3−43150
HITS: a symbolic testing and debugging system for multilingual microcomputer software 3−43157
home computer programs, troubleshooting 3−43957
HP 64000 Logic Development System, implementation, emulation and debugging features 3−34314
incremental compilation 3−43146
integrated LISP programming environment 3−43116
Intel SDK-85 microcomputers, single-step and breakpoint, software 3−24759
interactive debug requirements 3−43132
interactive program execution in Lispedit 3−43139
knowledge-based fault localization in debugging 3−43133
level, stepwise debugging 3−43131
limited environment, experimental debugger 3−43137
logic analysers, operation and features, software debugging and appl. 3−38324
logic analysers for software and hardware debugging 3−30331
logic analyzers, portable, debugging and diagnostics appls. 3−38271
MC68000 address modes and instruction set for high-level language, implementation 3−38148
memory monitoring program, SPY, for VIC-20 programs 3−40723
microcomputer development system, program checking/debugging *(Russian)* 3−27252
microcomputer user program debugging trace firmware 3−38452
microprocessor programming in Pascal/64000 3−35085
microprocessor software debugging cross, system *(Russian)* 3−28027
Microtutor, using TANBUG monitor 3−30455
Monte Carlo debugging: a brief tutorial 3−24743
multilingual debugging with the SWAT high-level debugger 3−43153
NS16082 memory management unit, virtual memory and debugging features 3−38242
Pascal LANDS, microcomputer software design support 3−34967
path expressions, high level mechanism 3−43134
prevention and removal of programming defects 3−39368
quality assurance procedure during program development 3−39369
real-time debugging monitor for the Bell System 1A processor 3−43838
real-time microprocessor debugging technique 3−43148
remote, using telex network and teleprinters *(Slovak)* 3−31264
SIMOB−a portable toolbox for observation of SIMULA executions 3−43144
software development and debugging processes automation using a programmable interface 8560 *(Italian)* 3−28032
software development tools for 16-bit microcomputer systems *(Japanese)* 3−24720
software engineering environments 3−43140
software failure description model, Bayesian analysis 3−43129

program debugging continued
source level symbolic debugger 3−43149
specification testing 3−43136
static analysis of programs as an aid to debugging 3−43151
structured program design, style and debugging, book 3−39122
symbolic debugging at the source level 3−35153
symbolic debugging for programmer productivity improvement 3−39372
trace functions speed software tracking in microsystems 3−30339
Trace program for BASIC variables, listing 3−35146
validation, revalidation and debugging system 3−24761
virtual memory management chip with program debugging support 3−30312
weapon fire control, TRIDENT environment, program debugging and testing 3−36106
Z80 interpeter, debugger and disassembler 3−24719

program diagnostics
see also program testing
analyser and detector for varifying correct program execution 3−24750
checkpointing, effects on execution time 3−35150
complexity of analyzing the synchronization structure of concurrent programs 3−28026
current program analysis 3−35145
dynamic trace mechanism for intelligent terminals 3−24748
hardware diagnostic programs, for personal computers, review 3−39367
logic analyzers, portable, debugging and diagnostics appls. 3−38271
maintenance and service facility instructions 3−43126
profiler, for execution time improvement 3−39365
PROM packages, Monolithic Memories Inc. family, diagnostics and cascadability *(French)* 3−30566
quality assurance procedure during program development 3−39369
self-implicating structures for diagnosable systems 3−39456
very high-level interactive graphical trace for the Pascal heap 3−24755

program interpreters
Ada translation into PL-1 *(Russian)* 3−43120
adaptive interpretation as a means of exploiting complex instruction sets 3−39243
ALGOL 68 transformation to FORTRAN 77 3−39360
APL2 syntax scanning 3−35056
array theory incorporating abstract data types 3−35066
ARSIS system, SDL, Soil Data Language for information retrieval, interpreter design and coding considerations 3−40058
ATE programs transportability 3−25408
Augusta p code 3−24709
BASIC interpreter for K1520 microprocessor *(German)* 3−24721
C-BASIC interpreter, learning tool for compiler construction 3−35134
CDP1804 FORTH based controller 3−42313
didactic languages, interpreter and translator design *(Spanish)* 3−39353
directly executed language for FORTRAN-II, DELtran 3−24650
dynamic system simulation using Early Desire 3−27979
high-level language oriented stack machine, realisation and evaluation of PASCAL machine *(Japanese)* 3−35130
IBM PC BASIC interfacing with machine code 3−39333
IC simulation languages, realisation *(Russian)* 3−24677
IC tester programming, measurement-oriented language MELAN *(Polish)* 3−35086
Information Management System data base, generation/transmission of extracts, programs 3−31328
INS8073 NSC Tiny BASIC microinterpreter chip 3−38237
INS8073 Tiny BASIC interpreter speeds system development 3−42346
Intel 8080, interactive BASIC interpreter *(German)* 3−31237
LL(1) analysers for flexible dialogue systems, generation 3−42208
microprocessors, high-level languages, program assembler, interpreters and compilers, tutorial series *(Spanish)* 3−39352
Microsoft BASIC version 5.0, WHILE-WEND loop appl. *(German)* 3−39344
military maintenance trainers with 3-D simulation implementation, distributed microprocessor system architecture use 3−35492
parallel execution model of logic programs 3−39448
Pascal interpreter in on-chip ROM 3−43108
performance comparison between an APL interpreter and compiler 3−35120
Precision BASIC, interpreter with infinite precision, CP/M program 3−35126
processing of non ASCII symbols *(French)* 3−39351
PSI, interpreted language for statistical anal. 3−35083
PSYCHLAB, programming system for expt. control programs 3−25609
REDUCE 2 for CP/M 3−28052
reducibility of decomposition translations 3−39343
SDL into CHILL skeleton translation system 3−31242
syntax directed translation schemes 3−31236
Tiny Interpreter, simultaneous program development 3−24715
translator from structured FORTRAN to JOVIAL/J73 3−35133
translator writing tool packages, selection 3−24724
TRS-80 8080 to Z80 translator 3−31224
Vaxima and Reduce facotirsation packages 3−28013
VIC PILOT 3−43980
workspace interchange on microcomputers 3−35118
Z80 interpeter, debugger and disassembler 3−24719

program processors
see also program assemblers; program compilers; program interpreters
4X: a system for scientific calculation *(French)* 3−35672
APL editor 3−35006
ARIANE: a system to help scientific programming *(French)* 3−35132
automatic mesh generation processor for 3-D parabolic boundary discretization 3−33766
automatic test pattern generation, FORTRAN preprocessor 3−31255
Codewriter, program generator 3−43121
COLAN, system for the correction of simulation models and methods *(German)* 3−24706
compatibility software tool for use with separately compiled languages 3−43117
CPS, programming system for computer software, CHILL language 3−40493
CRTP system for generation and processing of dialogue programs *(Slovak)* 3−43111
database support for programming environments 3−35131
dataflow systems, error detection and correction techniques 3−39378
decision tables, reappraisal, for structured programming, COBOL preprocessor 3−31092

Series IV software development system review 3—34931
signal processing software development system, ACOS, A Common Operational Software approach 3—30486
single chip microcomputers, selection criteria, programming and software considerations 3—42310
single-chip microcomputer family, programming, costs and reliability, M6805 series 3—38188
single-chip microcomputer programming, user's view 3—34021
single-chip microcomputers, high-level language programming 3—35096
single-chip microcomputers, programming aspects 3—38168
single-chip microcomputers, programming trade-offs, code density versus speed 3—39124
single-chip microcomputers, selection criteria for real-time programming 3—42309
single-chip microcontrollers, programming techniques 3—34950
single-chip microcontrollers, software design practices 3—39125
skills, attitudes and credentials and business data processing 3—32224
Software Base-Output-SEC System, experience in use of application program package *(Russian)* 3—42972
software configuration management at work 3—29059
software design, book 3—42983
software development, high level languages use for simplification 3—27875
software development environment of 3B20D processor 3—24535
software ergonomics *(German)* 3—34926
software maintenance, human investment techniques 3—40966
software maintenance attitudes improvement 3—42998
Southern '83, conference, Atlanta, GA, USA (Jan. 1983) 3—28918
statement labels 3—27994
structured software maintenance 3—43001
students' attitudes survey 3—32248
system programming under CP/M-80 3—39430
task-oriented architectures, Harpy connected speech recognition system 3—39041

programming continued
  teaching children to program computers, problems and difficulties 3—22674
  teaching human-computer interaction in introductory courses 3—25853
  teaching programming using Modula-2, relationship with Pascal 3—28956
  teaching programming using Pascal 3—25840
  textual games programming techniques 3—43999
  TI BASIC, subscripted variables 3—43986
  TI BASIC one-liners 3—28888
  TMS 7000 8-bit single-chip microcomputers and instruction set 3—34031
  tools for software development, survey results 3—27850
  Traffic Service Position System No.1B, software development system 3—28658
  transparent software and hardware changes in a telecommunication system 3—34952
  typographical errors in numerical programs, detection 3—40094
  user languages in software development 3—39325
  user programmability for word processors 3—34934
  VAX 11 assembly language programming, book 3—43055
  verification of programs, simplification techniques *(Chinese)* 3—34918
  VIC 20, programmable characters 3—24550
  VIC 20 variables 3—25750
  video capabilities of Commodore 64, sprite programming 3—24549
  vision and robotic system programming with RAIL language 3—31986
  Zeaker microrobot, programming and construction 3—30106
  ZX Spectrum User's Handbook 3—34518
programming, automatic *see automatic programming*
programming, geometric *see geometric programming*
programming, interactive *see interactive programming*
programming, mathematical *see mathematical programming*
programming, structured *see structured programming*
programming languages
  see also machine oriented languages; report generators
  business information systems programming language course 3—25879
  chemical process industry, effects of microelectronics *(Dutch)* 3—41873
  classification scheme for programming languages 3—27970
  computerised control, selection of operating systems and languages 3—43052
  DATED for description of plans and strategies in automatic deduction systems 3—41217
  educational software languages, capabilities and limitations 3—35042
  inference machine, fifth generation computer system using logic programming language 3—38358
  intermediate language X-code for language portability *(Chinese)* 3—35110
  P+, high-level languages, for large process control system at CERN 3—43098
  parallel languages, denotational semantics 3—39238
  programmable controller selection criteria 3—33167
  PROTO-E system, development 3—43074
  pyramid machines, programming and primitive operations 3—43005
  robot programming, specialized languages *(Spanish)* 3—39239
  robots, motion description in programming languages *(Japanese)* 3—23819
  selection criteria rel. to technical efficiency and managerial efficacy 3—35043
  software development and maintenance subsystem, design language system development 3—27885
  systems programming languages, pattern directed invocation 3—31219
programming theory
  see also computer metatheory
  algorithm construction *(Russian)* 3—27857
  algorithmic questions on program synthesis based on a rigid structure *(Russian)* 3—33887
  arithmetic expressions evaluation, instruction sets 3—38049
  assertional correctness proof of a distributed algorithm 3—38035
  attribute operator series line, conversion to parallel by indexing *(Russian)* 3—33885
  automatic theorem proving *(Japanese)* 3—38047
  calculator programming, optimisation of algorithms 3—27046
  checking variable types by proving properties of programs 3—30209
  communication protocols, modular verification 3—24412
  completeness results in theorem proving with equality 3—23941
  computation model based on attribute grammar *(Japanese)* 3—30207
  computation models for functional applicative programming *(Japanese)* 3—30204
  computation models for logic programming languages *(Japanese)* 3—30205
  computational complexity, time-space trade-offs for some algebraic problems 3—38053
  computational metaphor and quantum physics 3—23934
  concurrency, bibliography on formal models 3—33890
  concurrency control algorithms analysis 3—31332
  conference on computers and communications, Phoenix, Arizona USA, March 14-16 1983 3—27483
  continuous semantics for unbounded nondeterminism 3—23945
  control algorithms, description and execution *(Russian)* 3—32955
  control power of integer division 3—33901
  correctness proofs for formal implementations 3—23936
  correctness proofs of CSP programs 3—33903
  correctness properties of parallel systems, simulation, reduction and presentation 3—38042
  counter-piling game, termination proving, algorithmic aspects 3—33888
  counter-piling game, termination proving, complexity and connection with chess 3—33889
  database access concurrency control theory 3—28103
  dataflow anal., interprocedural systems 3—27038
  deadlocks in condition-action systems 3—33891
  direct processing of programming languages having homogeneous structure *(Russian)* 3—33886
  distributed programs decomposition into communication-closed layers 3—38034
  distributive sorting, anal. of N-trees 3—27029
  flowchart schemata, nomenclature problem 3—39088
  formal proofs 3—38056
  formal semantics, program analysis system 3—27024
  fundamental algorithms for DP using U880D circuit, discussion *(German)* 3—42236
  fusion of information in distributed systems 3—38060
  hierarchical file system, functional specification for program correctness proving 3—39181
  Hoare logics, effective axiomatisations 3—37982
programming theory continued
  hypothetical database updating 3—27030
  inconsistencies of pure LISP 3—28001
  indenting program, correctness proof 3—24643
  infix arithmetic expression, parallel generation of postfix and tree forms 3—38029
  k-valued logic functions with program type closure operations *(Russian)* 3—26969
  linked list order maintenance 3—27042
  locality of programs, intrinsic measure 3—38063
  logic versus mathematics in computer science education 3—25847
  logic-based programming systems, parsing with logical variables 3—30229
  logical proof props. of programs 3—27028
  loop invariants and loops development, standard strategy 3—38036
  machine-specific optimisers derivation, formal framework 3—38032
  metalanguage definition generation process 3—30203
  microinstruction characterisation as destructible flow in controlled graphs 3—27037
  microprocessor software development, formal methods 3—27896
  mixed computation method to solve particular problem of given class 3—33817
  multifit algorithm for uniform multiprocessor scheduling 3—27055
  number of relational operators necessary to compute certain functions of real variables 3—38027
  numerical program proof study *(French)* 3—38057
  numerical software proof *(French)* 3—38058
  occurrence nets, discreteness, K-density and D-continuity 3—27039
  optimal register assignment using nonserial dynamic programming 3—23937
  optimality theory of concurrency control for databases 3—28071
  page faults with complete information, minimisation 3—23947
  parameter passing and implementation w.r.t. observability, parameterised specifications 3—38030
  parametric combinatorial computing and a problem of program module distribution 3—38050
  partial computation of programs *(Japanese)* 3—33899
  performance analysis of FFT algorithms on multiprocessor systems 3—38044
  performance analysis of program execution on data flow systems 3—38062
  prevention and removal of programming defects 3—39368
  probabilistic concurrent programs termination 3—38031
  program construction using state refinement rules in top-down manner 3—42231
  program proving by structural induction 3—38061
  program semantics, topology appl. 3—27032
  program verification, general model for static anal. 3—38064
  programming logic and program correctness proof *(Chinese)* 3—38033
  proving linear algebra program correctness 3—30211
  pseudorandom number generation, nonrandomness, unavoidability 3—23935
  randomised algorithms, bibliography 3—33892
  recursive calls, redundancy elimination 3—38028
  reducibility of Petri nets 3—30210
  referential translucency 3—23946
  rewriting systems, uniform termination and restricted termination 3—23944
  semantic definitions, correctness, example in LCF 3—33900
  sequential programs, algebra of algorithms and dynamic parallel execution 3—42232
  similarity measures for sets of strings 3—23899
  smoothsort's behavior on presorted sequences 3—35025
  software reliability measurement 3—27045
  software reliability modelling 3—27044
  straight-line programs, simplification and equivalence 3—38052
  structural synthesis of programs justification 3—38037
  structured programs, multilevel synthesis 3—42233
  synchronisation skeletons synthesis using branching time temporal logic 3—38038
  term rewriting systems and their applications: a survey *(Japanese)* 3—30206
  theorem prover *(Japanese)* 3—33898
  tools, methods and languages for scientific and engineering computing, conf. Paris, France (May 1983) 3—39072
  transition systems, global and local invariants 3—42235
  unwinding of flow-charts with stacks 3—27023
  vacancies in associative binary trees, semantic and syntactic manipulation 3—33894
  validity proof of complex simulation models *(German)* 3—27021
  variables, local vs. global 3—30213
programs (computer listings) *see complete computer programs*
project engineering
  see also design engineering; electromagnetic compatibility; quality control; reliability; scheduling; systems engineering
  automobile computer for automatic fuel management system, reliability 3—31985
  development methodology implementation pitfalls for DP departments 3—32334
  large computer project problems and causes 3—36417
  resistor network production automation 3—36000
  robotic assembly, systems integration and risk minimisation 3—29914
  rock concentrator computerisation, project organisation 3—41895
  system development, PPDS method of preparing objectives tree *(Japanese)* 3—25777
  VLSI CAD, one company's approach to implementation 3—43793
  water resources management in river basins, simulation methods used in East Germany *(German)* 3—37383
project evaluation review techniques *see PERT*
projectiles
  see also missiles; rockets; weapons
  artillery projectile applications of recoverable digital memory telemeters 3—42549
  artillery projectile PCM telemetry package and system 3—41617
projectors (optical) *see optical projectors*
PROM
  8K CMOS EEPROM, Hughes HNVM 3008 3—38544
  64K 40 ns junction-shorting PROM 3—27374
  128K ROM/E^{2}PROM combination 3—24205
  256K EPROMs, using fast programming, equipment *(German)* 3—38531
  2816 E^{2}PROM, nonvolatile, HMOS technology, reliability 3—38551
  alterable, non-volatile memory, overview of alternatives 3—42530

PROM continued
autopatch, design 3−24179
bipolar EAROM cells, nonvolatile electrically reprogrammable memory types *(French)* 3−30583
bipolar PROMs, Intel 3636B and 3632, for high system throughput 3−38557
bipolar PROMs, programmer *(German)* 3−42432
bulk storage applications 3−34443
byte wide concepts for microcomputer designs 3−38562
CMOS 150 ns access time 288K EPROM with redundancy 3−27375
CMOS 1Mb PROM with on-chip error-correcting code for yield enhancement 3−27368
CMOS EEPROMs, technology and capabilities 3−38554
CMOS EPROM, 64K, static, sub 100 ns access time, on-chip test functions 3−27356
CMOS microcomputer MC1468705G2 with on-chip EPROM 3−38177
CMOS PROM, fusible link, design 3−38556
controllers for variable-reluctance and permanent-magnet stepping motors *(Bulgarian)* 3−41618
diagnostics and cascadability of Monolithic Memories Inc. family of PROM packages *(French)* 3−30566
digital pulsewidth modulator employing advanced modulation techniques, appl. in induction motor drive 3−37493
E^{2}PROM, 16K self supporting device 3−24206
E^{2}PROM, 5 V-only, fabrication by HMOS-I FLOTOX technology using 1.5 μm lithography 3−27371
E^{2}PROM, system architecture *(German)* 3−27329
E^{2}PROM and bubble memory for telecommunications appls. 3−42531
E^{2}PROM and EAROM memories developments, using NMOS and FAMOS technologies *(Czech)* 3−34430
EAROM, MOS stacked gate memory cells, device survey and performance aspects *(French)* 3−27348
EAROM and E^{2}PROM, state of art and future prospects *(French)* 3−24198
EAROM for permanent storage using MNOS technology 3−34446
EEPROM, 32K, +5V-only, fabrication using ISO-SNOS process 3−27372
EEPROM, 5 V Si nitride-oxide-Si devices 3−30584
EEPROM, 64k, 5 V, fabrication using double-poly n-channel Si gate Nitrox technology 3−24187
EEPROM, 8k×8, with internal program/erase control, 5V-only operation 3−27370
EEPROM, Intel 2817 3−38523
EEPROM, new tools for added quality and reliability 3−42544
EEPROM, selection for appls., trade-offs 3−27334
EEPROM developments 3−34411
EEPROM technology, TI's TMS7000 family of microcomputers 3−34408
EEPROM/PAL applications in digital design, reliability and power/speed factor improvements 3−30345
EEPROMs, appl. in avionic embedded computers 3−34441
EEPROMs development and appls. 3−27383
EEROM, future directions, features, appls., and technology 3−30587
emulator with EPROM memory, design and characts. *(Italian)* 3−34286
EPROM, development *(German)* 3−38526
EPROM, EEPROM, SEEPROM, state of the art review *(German)* 3−30552
EPROM, n-MOS wafer device, 128 Kbit, electron beam programming technique 3−30580
EPROM 2716, programmer, hardware and software 3−30560
EPROM 2732, 32 kbit, qualification *(Italian)* 3−24185
EPROM and E^{2}PROM compatibility in microprocessor-based systems 3−34449
EPROM blowing circuit, using Fairchild 78S40 switched mode supply chip 3−42533
EPROM emulation 3−24197
EPROM Intel 256K, manufacturing method and props. *(French)* 3−24191
EPROM MCUs, single-chip microcomputers development 3−30267
EPROM microcomputers, Intel products and appls. 3−38207
EPROM programmer, appl. to Intel SDK-51 3−30565
EPROM programming, cost saving equipment and algorithm 3−24183
EPROM programming, hardware and software for PET 3−40692
EPROM programming with microcomputer, cct. and machine code/assembly language routines 3−27392
EPROM single chip microcomputers, advantage 3−38208
ePROM single-chip microcomputers 3−27295
EPROM type PM 810 memory programmer *(Polish)* 3−34429
EPROM-based versus mask ROM microcomputers, trade offs and economic considerations 3−38180
erasable nonvolatile semiconductor memories, EEPROMs, NOVRAMs 3−24181
field data logger with EPROM storage 3−41581
Fujitsu MBM27C64, UV-EPROM 3−27333
fusible-link storage devices 3−30563
Harris Semiconductor, bipolar and CMOS processes, state-of-the-art and future 3−27382
HMOS II 200 ns 256K EPROM 3−27369
HMS3264 EPROM programmer 3−30375
induction motor drives, current-source invertor-fed, selected harmonic reduction by EPROM technique 3−37518
Intel 27256, HMOS 256K EPROM, characts., developments 3−24196
Intel 27256 256 kbit EPROM, appl. techniques *(German)* 3−27336
land mobile radio, programmable operation benefits 3−33614
memory address decoding for microprocessor memory devices 3−34413
microcomputer controlled memory testers type 2702 and 2703 *(Polish)* 3−33682
microcomputer user program debugging trace firmware 3−38452
microelectronics fundamentals *(German)* 3−27102
microprocessor memory packaging standardisation, BYTEWYDE memory concept 3−34444
MNOS 16 kbit EEPROM electrical characts., reliability and application 3−34418
MNOS EAROMs, new developments 3−38553
MNOS n-channel 4K bit E^{2}PROM, data holding characts. *(Japanese)* 3−34427
MODIAC computing node, hardware features *(Italian)* 3−24214
monitoring top address bootstrapping 3−34415
MOSFET nonvolatile memory, HV driver cct. 3−38538
non-volatile 5 V RAMs and EEPROMs 3−42545
nonvolatile memories, cct. design eased with 5 V technology 3−30586
nonvolatile RAMs and EEPROM, appl. guidelines 3−30585

PROM continued
nonvolatile static RAM, Xicor X2201 3−38547
nonvolatile stores, using EEPROMs, NVRAMs *(German)* 3−38530
onchip memory, for microcomputers, EEPROM or NOVRAM 3−33996
piggyback EPROM microcomputers for low volume appls. 3−38209
plastic encapsulated PROMs, nichrome corrosion, model for failure mechanisms 3−34438
power consumption, reduction using strobing cct. 3−30307
PRG storage programming unit, based on SPU 800 *(Slovak)* 3−30367
programmable EPROM eraser, design 3−30523
programmer, based on the BLC 80/10 board *(Polish)* 3−30521
programmers for PROMs, logic arrays and single chip microcomputers 3−24182
pulse programmer interface, microprocessor-based *(Spanish)* 3−27567
Registered PROM architecture for simplified microprogramming 3−30405
registered PROMs 3−38555
reliability comparison of EEPROM and UV PROM *(Italian)* 3−34405
SAB 80315 microcomputer program memory space addition, using external EPROMs 3−42296
selection of NOVRAM or EEPROM in design 3−27335
self-programming technique, used for CMOS EPROM microcomputers 3−34281
single-chip EPROM microcomputers, economics, production manufacturing aspects 3−30293
telemetry channel automatic addressing without software 3−42036
TV tuner station memory/frequency recall system EEPROM 3−37832
UV EPROM storage programming, for MCS single-board microcomputer *(Slovak)* 3−38540
Xicor X2804A/2816A E^{2}PROMs with low-voltage write 3−27331

proportional + derivative control *see two-term control*

proportional + integral + differential control *see three-term control*

proportional + integral control *see two-term control*

proportional control
ACV heave performance computing, vent valve proportional control parameters determ. 3−31955
direct Z-domain compensator design 3−26362
disabled person's nonvocal communication aid, proportionaly controlled 3−40197
distillation column, robust multivariable control 3−23632
extrusion process, microcomputer-based control system for increasing cost effectiveness 3−26655
feedback systems design, low-order models appl. 3−37155
heat exchangers, dynamics classification using root loci 3−37435
hydraulic components for proportional control *(French)* 3−29610
hydraulic proportional control and electrical equivalent circuits and devices *(French)* 3−26513
hydraulic solenoid valves for proportional control 3−23327
motor and current control, proportional hydraulic components *(French)* 3−33297
optimal evasion strategies, effects of nonlinear kinematics 3−29974
singular systems, feedback control, proportional and derivative feedback of the state 3−29506
speed and current control of DC motor in continuous current operation 3−23405
stochastic dynamic objects, suboptimal control 3−33047
suboptimal continuous multidimensional regulators, automatic synthesis *(Bulgarian)* 3−33060
switchable P/I/PI controller for large time-constants *(German)* 3−26480
values for proportional hydraulic control *(French)* 3−29676

proportional counters
see also position sensitive particle detectors
one-dimensional position sensitive counter for image scanning in soft X-ray region 3−42088

proprioception *see mechanoception*

propulsion
see also aerospace propulsion; electric propulsion
No entries

prospecting (geophysical) *see geophysical prospecting*

prosthetic power supplies
No entries

prosthetics
see also artificial limbs; artificial organs; orthotics; sensory aids
artificial hand, flexible playback control *(Japanese)* 3−42136
disabled person's nonvocal communication aid, proportionaly controlled 3−40197
handicapped persons, computer-based aids, conf., Charlottesville, VA, USA (Nov. 1982) 3−40185
intelligent hand prosthesis, implications for robots 3−33725
robotics aspects, conf., London, England (June 1983) 3−33724
speech handicaps, Apple microcomputer as communication aid 3−40191
speech synthesis, stenographic keyboards as input media 3−27840
speech-handicapped persons' communication aids, drawbacks 3−40192

protection
see also alarm systems; corrosion protection; machine protection; power system protection; radiation protection; safety
computer-based fire protection for coal handling systems 3−26596
diesel-electric locomotives, TEZ, electrical circuits *(Russian)* 3−37468
EDP equipment, metallising techniques for EMI/RFI shielding and electrostatic discharge protection 3−38668
electronic control equipment, protection against electrical interference 3−26460
electronic vibration switch *(Dutch)* 3−41627
machine control system *(German)* 3−41732
microcomputer power supply with protection against mains failure, using 'data save' signal *(Czech)* 3−30311
optimal shut-down logic for protective systems 3−33623
protective device, optimum inspection policy 3−26146
tube-making, automated line 3−29872
VHV transmission substation automation, control and protection using digital techniques *(French)* 3−23443
VHV transmission substation operation and supervisory control scheme *(French)* 3−23442
voltage drop protection in reservoir capacitors in a system controlling high-voltage thyristor units 3−33326

modular telemetry software system 3—42037
monitor for microcomputers *(German)* 3—24779
monitor generating system, CAL, appl. to CDL programs *(Hungarian)* 3—24679
MTOS-68K multitask and multiprocessor operating system 3—43176
MULREG system, real time operating system software 3—42630
multimicrocomputer controllers, FORTH-based development system 3—42484
multiport reflectometer using 16-bit microprocessor config., design 3—30071
multiprocessor architectures, real time operating systems *(German)* 3—27469
multiprocessor computer systems software design 3—42629
multiprocessor real-time simulator, contention problem 3—24292
multiterminal computer system productivity estimation *(Russian)* 3—42592
online real-time monitoring of automated manufacturing system 3—33395
operating system, RMS68K, real time appls. 3—39442
operating systems, handling of multitasking 3—24776
operating systems, real-time, for U 880 D processor in SVPS K 1520 assembly language *(German)* 3—24792
PARCOR speech analysis by high-performance signal processors *(Japanese)* 3—42505
PICK operating system, database-oriented family of systems 3—31271
QA-2, user-microprogrammable, local host computer with low-level parallelism 3—38678
Real Time Data Acquisition System software processing 3—41968
real-time monitoring of power systems using fast second-order method 3—28577
real-time text-to-speech convertors 3—42936
REBUS distributed control system, software and protocols 3—42797
respiratory signals, real-time anal., Apple II microcomputer appl. 3—28481
REX, UNIX-based multiple-process system, for real-time data acquisition and control 3—43191
rotary printing machines, automation system design using EPOS-80 specification and design system *(German)* 3—28796

real-time systems continued
signal processing with appl. to speech synthesis 3—24146
simulation, computer performance evaluation 3—32441
simulation, to real-time appl. 3—34538
single-chip microcomputers, selection criteria for real-time programming 3—42309
software fault tolerance for real-time avionics systems 3—32040
software test language IDA *(French)* 3—35155
software testing strategy 3—31267
spectrum stabilisation software 3—42089
speech processing, real-time system, UNIX OS, programming aspects 3—43841
spread-spectrum communications, digital correlation by bit-slice microprocessors 3—35984
stiff linear differential large scale systems, real-time solution using computational architecture 3—36687
supersonic aircraft manoeuvres, real-time online automatic guidance and control flight simulation 3—26770
telephone traffic DMERT operating system for real-time architecture 3—28656
testbed for distributed real-time military appls. 3—40588
thin-walled framed structures, internal forces determ. from tensional meas. *(German)* 3—40547
turboalternator digital governor design incorporating fault tolerance 3—23495
TV image analyser, based on Apple II microcomputer 3—40477
university financial aid office, on line computer, INFAMOUS 3—35412
Unix, adaptations to real-time environments 3—24777
VAX computer use in real-time telemetry environment 3—42035
VERSAdos, real-time multitasking OS with modular struct. 3—39438
VLSI digital synthetic aperture radar processing architectures 3—30479
voltage and reactive power control, optimum computational algorithm *(Korean)* 3—23404
VRTX real time system for 16 bit microprocessors 3—39443
ZRTS, Zilog Real Time Software, systems software components 3—35115
ZRTS, Zilog real-time software, multitasking OS appl. 3—39437

reboilers *see boilers*

receivers
see also radar receivers; radio receivers; telephone receivers; television receivers; transceivers; transponders
frequency-hopped M-ary FSK waveforms, high dynamic range FET processors for multiple channel receivers 3—34359
intput mismatch effects on equiv. noise temp. 3—26243
optical binary transmitters, transmitting and receiving modules *(German)* 3—23305
phase difference characteristics, time delay estimation 3—26429
Prototype Receiver and Optical Bus Evaluation System 3—34609

receiving antennas
see also reception
phase difference of arrival technique for locating trapped miners using microcomputer 3—26258
satellite TV, alignment, microcomputer program appl. 3—31936

reception
see also radio reception; television reception
time delay estimation involving received signals 3—29341

reception quality *see reception*

reconnaissance satellites *see artificial satellites*

record players *see gramophones*

recorders
see also recording; tape recorders
digital approach to mech. engng. meas. 3—29620
digital fault recorders for recording and anal. of 400 kV network faults *(French)* 3—23274
DTA installation design using automatic curve-drawing recorder 3—23784
electronic data-acquisition and recording system 3—42821
event record generator hardware monitor for computer systems 3—30671
galvanometric recording system with position feedback *(Chinese)* 3—30038
interfacing a transient recorder to an HP-85 microcomputer 3—28601
microprocessor controlled graphic recording, based on electrical discharge technique 3—33161
Programmable Accumulator and Event Recorder hardware monitor for computer systems 3—30670
transient recorder for signal sampling and anal. *(German)* 3—38481
transient waveform recorder, computerised, capabilities and appl. 3—23745

recording
see also audio recording; magnetic recording; traffic recording; video recording
laser beam recording, hole shapes and recording characts. *(Japanese)* 3—30593

recording instruments *see recorders*

rectangular waveguides
No entries

rectification
No entries

rectifier substations
Lille Metro 20 kV power distribution cable network *(French)* 3—23459

rectifier tubes
No entries

rectifier valves *see rectifier tubes*

rectifiers
see also battery chargers; electrolytic rectifiers; mercury arc rectifiers; solid-state rectifiers
3-phase rectification equipment output voltage pulse regulation *(Russian)* 3—29758
finding the optimal variant of a rectifier-motor choke, computer aided solution 3—25319
investigation of the dynamics of an independent electricity-supply system with two rectifier machines 3—37460
microcomputer applications to power electronics *(Japanese)* 3—25460
reducing harmonics excited by network-voltage asymmetry on the DC side of a controlled rectifier 3—23456
reversible, digital control systems *(Russian)* 3—29761

rectifying circuits
see also rectification; rectifiers
electronic speed variation, multi-quadrant drives with regenerative braking *(German)* 3—29752
line phase drop-outs control by relay *(Russian)* 3—37500

rectifying circuits continued
microprocessor-based controller for a three-phase controlled rectifier bridge 3—23431
reducing harmonics excited by network-voltage asymmetry on the DC side of a controlled rectifier 3—23456

recursive functions
computability in higher types and the universal domain Pω 3—33803
computable real numbers, definitions of some complexity classes 3—27031
congruences on algebraic and iteration theories, characterisation with appls. 3—26960
digital filters, N-dimensional, frequency domain design techniques 3—38438
embedding properties of total recursive functions 3—23916
equivalence problem for attribute systems 3—30174
functional programming language and semantic models, algebraic definition 3—33796
Godel numberings complexity of decompositions 3—26959
implementation of recursive procedures *(Japanese)* 3—39110
minimal initial segments in recursive functionals, of computation 3—26985
modular arithmetic of iterated powers 3—37969
nonsymmetric stable half-plane recursive filters, two-dimensional, design 3—38437
partially defined Boolean function systems, expansion of recursive method for combined simplification *(Russian)* 3—33792
representability of languages in deterministic and nondeterministic automata with a countable number of states 3—30185
self-adjusting controller for single-parameter dynamics systems *(Slovak)* 3—23207
short-time signal anal., recursion 3—29326
simple nonuniform operation 3—33798
tabulation computing techniques for recursive algorithm *(Japanese)* 3—37979
Turing machines with linear alternation 3—27007
unwinding of flow-charts with stacks 3—27023
Wolverton-Wagner regression function estimate, universal consistency results, discrimination appl. 3—26215

rediffusion
see also broadcasting; radio rediffusion
No entries

redundancy
see also bandwidth compression; data compression; logic design
64K to 16 Mb DRAMs, modelling redundancy 3—27359
256K dynamic RAM redundancy techniques 3—30556
adaptive filtering for noisy failures 3—32601
aircraft airstream data collection, distributed processing and fibre-optic links 3—37902
aircraft engine controlled, dual redundant, reliability anal. 3—33530
AS220H automation subsystem with redundancy feature and high level of availability 3—37338
AXE switching system central control, fault tolerance 3—37813
CMOS FFT processor, 16 MHz single chip device, design and redundancy features 3—34357
communication fault-tolerant system using regular expressions 3—39454
complex multiple redundant systems, reliability evaluation 3—22914
computerised control oxygen plant using two HP 1000 computers *(Czech)* 3—23618
control computers, validation of fault-tolerance in August Systems machines 3—27495
data communications, double-redundancy scheme, majority voting ccts. 3—24332
data transmission, error correction using time redundancy 3—38805
digital systems, fault detection without total replication 3—27496
digital telecommunication switching systems, reliability 3—37815
distributed control, interprocess communication primitives 3—42796
distributed DBMSs, redundant data-storage and deferred updates 3—28109
error correction in arithmetic operations using time redundancy 3—38120
facsimile, reduction of local and global redundancy *(German)* 3—27957
fail safe control systems, reliable software development 3—42632
fail-safe alarm design using redundancy 3—23736
fault-tolerant combinational circuit using alternate-data retry strategy *(Japanese)* 3—27018
fault-tolerant productive redundancy of separate task processors 3—42589
fault-tolerant redundancy multiple-module multi-microcomputer system, design of voter 3—38714
flight control system, afTI/F-16 DFCS developed summary redundancy management system 3—33560
flight control system design using robust output observers 3—29986
flight critical systems, generic faults and architecture design considerations 3—26751
floating redundancy for fault-tolerant digital systems 3—42439
hierarchical multi-microcomputer systems with high reliability and safety, realisation method *(German)* 3—24229
irredundant logic circuit design by decomposition 3—30328
J211 Redundancy Supervisor for 584 control system monitoring in industrial plants *(German)* 3—23516
laser programmable redundancy technique for MOS dynamic RAM 3—27378
magnetic bubble 2 Mb memory board, design, redundancy feature, 2.5 Mb/s operation *(Japanese)* 3—27327
magnetic cassette tape systems, redundancy aspects *(German)* 3—27311
microprocessor based real-time control systems, fault-tolerant and fail-safe *(Chinese)* 3—25452
molecular warm standby redundant system anal. 3—29216
multivalued logic, two-input gates and switches *(Russian)* 3—27065
N-modules parallel structure, replacement imperfection study 3—26150
optimal multilevel redundancy problems, sequential optimisation appl. 3—29217
optimal reliability design by transformation technique 3—32595
optimum choice of the number of doubled blocks in microprocessor computing systems *(Bulgarian)* 3—38660
parallel redundancy, two unit system with imperfect switch, reliability analysis 3—26152
periodically repaired n—1/n parallel redundant systems, reliability 3—36696
process control system, computer based, hierarchical and fully redundant 3—37554
processor oriented VLSI memories, structural and logical realisation 3—42541
programmable controller systems 3—29630

redundancy continued
  programmable-controller system with redundancy 3—26474
  protocols in distributed systems, voting and redundancy management 3—38882
  RAM, dynamic, $MoSi_2$ fusible links for cell redundancy facility 3—27380
  RAM, dynamic, poly-Si fuses for redundancy feature 3—27379
  recursive calls, redundancy elimination 3—38028
  recursive functionals, computation using minimal initial segments 3—26985
  reliability analysis of an intermittently used system with repair facility 3—26151
  robust data structure scheme with checking loops 3—39178
  self-repairing flight control systems for combat aircraft 3—33565
  semiconductor memories, testing 3—30564
  standby redundancy, three mode two unit system, stochastic behaviour and failure analysis 3—26155
  standby redundant system, Bayesian reliability assessment study *(Japanese)* 3—41145
  standby redundant system, three mode operation, stochastic behaviour and failure analysis 3—26154
  Synapse N+1 multiprocessing system with high availability 3—27490
  systolic processor arrays, interstitial fault tolerance 3—38362
  Tritium Systems Test Assembly, TSTA, redundant control systems 3—37446
  two unit standby redundant system, failure and preventive maintenance, stochastic behaviour analysis 3—41137
  two-unit standby redundant system with different failure time distrib., reliability anal. *(Japanese)* 3—29223
  two-unit warm standby system with inspection time, busy period analysis 3—26157
  VLSI high-speed multiplier using redundant binary addition tree *(Japanese)* 3—38372
  wafer-scale restructurable arrays, area and delay penalties 3—35923
redundancy theory *see redundancy*
reed relays
  magnetically controlled contact-vibrators in installations for relay protection and antifailure automation 3—37380
  miniature relay selection and specification for interfacing control systems with equipment being controlled 3—33143
reed switches *see reed relays*
reeling *see winding (process)*
reference circuits
  No entries
references (standards) *see standards*
refining, oil *see oil refining*
reflector antennas
  see also antenna reflectors
  microprocessor-controlled antenna positioning system for radar studies 3—37828
reflex klystrons
  No entries
refrigeration
  see also cryogenics; freezing; low-temperature production
  condensing unit operational control system *(Japanese)* 3—41674
